THE WHITE HOUSE RELEASES LIST OF POLITICAL AGITATORS — Blames Democrats' "Gestapo"

Rhetoric for Dallas ICE Attack and 1,000% Surge in Assaults on Federal Agents

[The White House](#) on Friday published an article naming more than two dozen prominent Democrat officials as political agitators, accusing them of fanning the flames of domestic violence through "Gestapo-style" rhetoric.

- Gov. Tim Walz [smeared](#) ICE as the "modern-day Gestapo."
- Gov. Gavin Newsom [likened](#) ICE to "secret police," [calling](#) them "authoritarian" and [proclaiming](#) a "right to push back."
- Gov. JB Pritzker [claimed](#) the country is becoming "Nazi Germany" because ICE [is](#) "grabbing people off the street... and disappearing them."
- Rep. Robin Kelly [smeared](#) ICE as the "Gestapo" and a "betrayal."
- Rep. Jasmine Crockett [compared](#) ICE to "slave patrols."
- Rep. Sylvia Garcia [referred](#) to ICE agents as "thugs."
- Rep. Delia Ramirez [attacked](#) ICE as "a terror force."
- Rep. Pramila Jayapal [called](#) ICE agents "deranged," [accused](#) them of "kidnapping," and [said](#) "resistance" to ICE is "inspiring."
- Rep. Rashida Tlaib [said](#) ICE is "terrorizing our communities" and "turning our country into a fascist police state," and [called](#) it a "rogue agency."
- Rep. Ayanna Pressley [said](#) ICE is "terrorizing our communities."
- Rep. Max Frost [compared](#) ICE operations to "some of the worst horrors and crimes against humanity" in history.
- Rep. John Larson [said](#) ICE is "the SS" and "the Gestapo."

- Rep. LaMonica McIver [incited](#) people to "shut down the city" because "we are at war."
- Rep. Stephen Lynch [smeared](#) ICE agents as "the Gestapo" and "nondescript thugs."
- Rep. Dan Goldman [compared](#) federal agents to "secret police" who must be unmasked.
- Rep. Becca Balint [called](#) ICE agents "vigilantes" who can't be trusted.
- Rep. Ilhan Omar [said](#) ICE agents are "vile and beyond cruel," and that the agency should be abolished.
- Rep. Nikki Budzinski [called](#) ICE agents "dangerous and reckless."
- Sen. Bernie Sanders [asked](#) people to "figure out a way to stop ICE from what they are doing as soon as possible."
- Sen. Elizabeth Warren [claimed](#) ICE is "intentionally stoking fear" and "tear[ing] communities apart."
- Rep. Hakeem Jeffries [implored](#) people to "fight" the Trump Administration "in the streets" and [declared](#) ICE agents "will be unsuccessful" in protecting their identities "no matter what it takes."
- Boston Mayor Michelle Wu [compared](#) ICE agents to the neo-Nazi group NSC-131.
- Chicago Mayor Brandon Johnson [accused](#) ICE of being "secret police" who are "terrorizing our communities."
- Los Angeles Mayor Karen Bass [spread](#) a disgusting, fabricated hoax that ICE "kidnapped" a woman on her way to work.
- Rep. Gil Cisneros [claimed](#) ICE has "terrorized" people through "racial profiling."
- Rep. Eric Swalwell [said](#) it was his "priority" to ensure ICE agents "are no longer faceless," comparing them to "some 1800s bank robber or some KGB officer in Russia."
- Rep. Alexandria Ocasio-Cortez [said](#) ICE "should not exist."
- Rep. Kweisi Mfume [challenged](#) the Trump Administration to "a street fight."

- Rep. Jerry Nadler [accused](#) ICE agents of “hiding misbehavior because otherwise why would they be wearing masks?”

[FBI Confirms "Targeted Attack" At Dallas ICE Facility, Finds Bullet With "Anti-ICE" Message](#) Sep 25, 2025 [ZeroHedge](#) Sniper attack by leftist Joshua Jahn, 29 (confirmed by Daily Mail), killed two detainees at an ICE facility in Dallas and critically injured another. Jahn then killed himself with his rifle. The FBI described the incident as "an act of targeted violence." The shooter opened fire from an elevated position. Investigators found an unspent round with "Anti-ICE" political messaging. Jahn's alleged socials show ties to far-left causes.

[1 Dead, 2 Injured in Shooting at Dallas ICE Facility: Officials](#) Sep 25, 2025 [The Epoch Times](#) The Homeland Security secretary says that ICE officials are ‘facing unprecedented violence’ in recent days.

[Transgender Leftist Sentenced To 19 Years In Prison For Terror Attacks](#) Sep 25, 2025 [ZeroHedge](#) For every terror attack by a transgender leftist or Antifa militant that you hear about in the news, there's many attacks that you don't hear about. The establishment media has been very careful to obscure these incidents with ambiguous reporting, denials and outright lies. For example, Nicholas Roske, the man who attempted to assassinate Supreme Court Justice Brett Kavanaugh in 2022, identifies as transgender. This fact has been quickly buried by the media, just as the man's political affiliations were ignored at the time of his arrest. Though, Wikipedia was very quick to change Roske's gender and refer to him as "her" on their Brett Kavanaugh assassination plot page.

["This Was Absolutely Sabotage": Trump Rages After UN Escalator, Teleprompter 'Mishaps'](#) Sep 25, 2025 [ZeroHedge](#) And third, after making the Speech, I was told that the sound was completely off in the Auditorium where the Speech was made, that World Leaders, unless they used the interpreters' earpieces, couldn't hear a thing. The first person I saw at the conclusion of the Speech was Melania, who was sitting right up front. I said, “How did I do?” And she said, “I couldn't hear a word you said.” This wasn't a coincidence, this was triple sabotage at the UN.

[About half of college students say socialism is better than capitalism, poll says](#) Sep 26, 2025 [Campus Reform](#) A Yale Buckley Institute survey finds nearly half of undergraduates favor socialism over capitalism, with some even praising countries like Cuba. Liberal students were most supportive, highlighting ideological bias on campus and concerns over suppression of opposing views.

[Suspect In Sacramento ABC Station Shooting Left Note Behind, Prosecutors Say](#) Sep 25, 2025 [Epoch Times](#) “For

[UK's Keir Starmer Government Goes All In On Digital Identity](#) Sep 25, 2025 [Naked Capitalism](#) The government is finally admitting the truth: it wants to launch a universal digital ID dubbed “Britcard” — despite the fact it's a smartphone app.

[After Pre-Speech 'Sabotage', Trump Unleashes Hell At UN](#) Sep 24, 2025 [ZeroHedge](#) Trump's most notable quotes: Climate change is "the greatest con job ever perpetrated on the world." "You're destroying your countries. They're being destroyed." The "number one political issue of our time" is "the crisis of uncontrolled migration."

[Turning Point USA Holds First College Event Since Charlie Kirk Assassination](#) Sep 24, 2025 [ZeroHedge](#) The University of Minnesota-Twin Cities hosted the event on Sept. 22, which was scheduled before Kirk's death, and held one day after his memorial service at State Farm Stadium in Glendale, Arizona. "This event was originally supposed to be a conversation between me and Charlie," said conservative commentator Michael Knowles, who hosted the Monday event

[The Hidden Risk in 90 Percent of America's Drinking Water—And How to Reduce It](#) Sep 24, 2025 [The Epoch Times](#) While chlorine and other disinfectants keep tap water free of deadly pathogens, their chemical byproducts carry uncertain risks.

[Would-Be Trump Assassin Tried To Stab Himself In Neck After Guilty Verdict](#) Sep 24, 2025 [ZeroHedge](#)

[Another Leftist Shooter Attacks Country Club Wedding In New Hampshire](#) Sep 22, 2025 [ZeroHedge](#) Witnesses heard the man scream "The children are safe, free Palestine!" as he started shooting, killing one person and wounding two others before he was hit in the head with a chair by a female party member and ran away with his head bleeding.

[The Real Story Behind Jimmy Kimmel's Firing](#) Sep 21, 2025 [ZeroHedge](#) To recap, during Kimmel's opening monologue on Monday, he suggested that Tyler Robinson - the 22-year-old charged in the fatal shooting at Utah University - was aligned with conservatives. “The MAGA gang [is] desperately trying to characterize this kid who murdered Charlie Kirk as anything other than one of them.” By Wednesday, he was fired - leading to cries of censorship and 'free speech' by the left, which is hilarious.

[Is There a Strategic Nuclear Arms Race?](#) Sep 21, 2025 [Real Clear Wire](#) Yes, there is a nuclear arms race. But the U.S. is not in it and has not been since the end of the Cold War and the collapse of the USSR. On the contrary, the U.S. has significantly reduced both its reliance on nuclear weapons and its inventory of nuclear forces by over 90%.

[CDC Advisers Recommend Against Combo Vaccine for Young Children](#)

Sep 21, 2025 [The Epoch Times](#) Advisers said the CDC should not recommend the combined vaccine against measles, mumps, rubella, and varicella for young children.

[27 State AGs Urge SCOTUS to Safeguard Citizens' Access to Large Capacity Firearm](#) Sep 21, 2025 [American Greatness](#) In upholding the ban, a majority of Washington Supreme Court justices held that commonly-owned firearm magazines do not qualify as "arms" which are protected by the Second Amendment.

[Proof That At Least 6 Radical Leftists On Social Media Knew In Advance That Charlie Kirk Would Be Assassinated](#) Sep 19, 2025 [End of the American Dream](#) It appears that a lot of people had advance knowledge of the plot to kill Charlie Kirk. In fact, quite a few of them seemed to know that the assassination attempt would specifically take place on September 10th. As word of what Tyler Robinson was planning to do got around, some of the people that were aware of what was going to happen just couldn't resist bragging about it on social media.

[Where's The Bullet That Killed Charlie Kirk?](#) Sep 19, 2025 [Emerald Robinson Substack](#) When the FBI wants to investigate a crime, it preserves the crime scene and it brings trained investigators. When the FBI wants to conduct a cover-up of a crime, it allows the crime scene to be destroyed or cleaned. Right now, the UVU crime scene where Charlie Kirk was assassinated is apparently being cleared out and construction is already underway.

[FBI Institutionalized Liars – Ryan Bundy Arm Bullet Evidence – Bundy Family Public Statement](#) Sep 19, 2025 [Defending Utah](#) We cannot remain silent as falsehoods are institutionalized as "bravery." The award citation describes a sequence of events that is demonstrably false: Clandestine Meeting The award states that La Voy and others were traveling to a "clandestine meeting." In fact, La Voy was en route to a publicly announced meeting with Grant County Sheriff Glenn Palmer, scheduled for that afternoon, attended by hundreds of citizens. Ramming a Vehicle and Pinning an Agent The award citation claims La Voy rammed his truck into an FBI vehicle, trapping an agent. The FBI's own aerial video shows La Voy's truck swerving off the road into a snowbank to miss hitting an officer after being blocked by law enforcement. There was no ramming. There was no pinned agent. In-fact the footage shows that La voy intentionally swerved further into the snow to avoid hitting an officer.

[Keto, Ivermectin, & Fenbendazole: New Cancer Treatment Protocol Gains Momentum](#) Sep 18, 2025 [American Greatness](#) [1] a therapeutic ketogenic diet high in fats and protein but low in carbs. [2] moderate exercise (aerobic heart rate) for 45-75 minutes three times a week, such as cycling, running, swimming, etc. [3] high-dose (non-toxic level) vitamin C by IV, PICC, or port three times a week. [4] ivermectin daily at a

proven safe dosage. [5] fenbendazole (or mebendazole) daily at a proven safe dosage. [6] daily vitamin/mineral supplements of safe levels of vitamin D, vitamin K2, zinc, magnesium, and potassium, with a lab test every two weeks to monitor liver and kidney function and potassium and vitamin D levels for safety.

[US Official Warns of New Deadly Synthetic Opioid From China](#) Sep 16, 2025 [The Epoch Times](#) U.S. authorities are warning of a new synthetic opioid from China that can be up to 50 times more potent than fentanyl. Nitazenes pose an emerging threat because they are more resistant to naloxone, a medication that can reverse opioid overdoses. They are often mixed with other drugs and delivered in the form of counterfeit pills

[How Charlie Kirk Challenged and Inspired a Generation of Rising Political Influencers](#) Sep 16, 2025 [The Epoch Times](#) Hallie said she was able to revamp the College Republicans chapter at Santa Fe College in Gainesville, thanks in large part to the influence of Kirk and Turning Point USA. "Charlie Kirk was a huge portion of that. He had a huge impact on politics on college campuses, especially in Santa Fe," she told The Epoch Times. "You had all these students that were like, 'wow, my conservative values are being represented in a way that really had never been represented before.'"

[New Bill Could Punish Lenient Judges Following Charlotte Train Stabbing](#) Sep 16, 2025 [ZeroHedge](#) Video of Zarutsk's senseless murder in Charlotte, North Carolina, went viral on social media, fueling outrage over lawlessness and soft-on-crime judges across the country. Fine said the bill is designed to hold judges accountable for failing to protect the public from repeat offenders. The bill would allow civil penalties on judges who fail to impose bail on repeat offenders who go on to commit violent crimes.

[Kirk's Assassination Supercharges Turning Point USA: 32,000 Requests For New Chapters Nationwide](#) Sep 16, 2025 [ZeroHedge](#) "I wanted to share a pause report from TPUSA. The organization has received over 32,000 inquiries in the last 48-hours to start new campus chapters. To put that in perspective, TPUSA currently has 900 official college chapters and around 1,200 high school chapters, with a presence on 3,500 total. Charlie's vision to have a Club America chapter (our high school brand) in every high school in America (around 23,000) will come true much much faster than he could have ever possibly imagined," Kolvet, who is also a TPUSA spokesman, wrote on X.

[RFK Jr. Names New Members to CDC Vaccine Advisory Panel](#) Sep 15, 2025 [The Epoch Times](#) Milhoan has spoken out about COVID-19 vaccines. He told The Epoch Times in June that he has seen an increase in myocarditis, a form of heart inflammation, in children following COVID-19 vaccination.

[Vax Stocks Tumble As Trump Admin To Link COVID Shots To Child Deaths](#) Sep 15, 2025 [ZeroHedge](#) The findings are based on VAERS, a federal database that tracks vaccine

injuries operated by the CDC. Trump health officials plan to include the pediatric deaths claim in a presentation next week to an influential panel of advisers to the CDC that is considering new coronavirus vaccine recommendations, which affect access to the shots and whether they're free.

[BLM Grifter Pleads Guilty To Fraud, Spending Donations On Herself](#) Sep 16, 2025 [Headline USA](#) She was accused of using nonprofit funds—out of a total budget of \$1 million—from 2017 to 2021 for personal expenses. The charges, announced in 2022, amounted to a staggering 27-count superseding indictment. The expenditures included car and insurance payments, high-end salon visits, luxury dinners, and a Maryland vacation.

[Researchers Found Unvaccinated Children Healthier Than Vaccinated, Didn't Publish Findings](#) Sep 15, 2025 [The Epoch Times](#) After 10 years, 57 percent of the vaccinated children had a chronic health condition such as asthma, compared to just 17 percent of the unvaccinated children. "This study found that exposure to vaccination was independently associated with an overall 2.5-fold increase in the likelihood of developing a chronic health condition, when compared to children unexposed to vaccination," the authors wrote. "This association was primarily driven by asthma, a topic disease, eczema, autoimmune disease and neurodevelopmental disorders. This suggests that in certain children, exposure to vaccination may increase the likelihood of developing a chronic health condition."

['Delete This': New Smoking Gun Emails Reveal Fauci COVID Coverup](#) Sep 12, 2025 [ZeroHedge](#) ... "The coverup began while the virus was barely on America's radar. Just one day after the Feb. 1, 2020 Proximal Origins call, Fauci, Francis Collins, and Jeremy Farrar plotted how to "get ahead of the science and the narrative" under WHO. Fauci ended with: "Please delete this..."

["Dark Moment For America" - Trump Addresses The Nation After Kirk Assassination](#) Sep 12, 2025 [ZeroHedge](#) President Trump addressed the nation from the Oval Office on the senseless political assassination of Charlie Kirk at a Turning Point event at Utah Valley University, calling it a "dark moment for America." Trump called Kirk a "martyr for truth" and vowed to crack down on the radical left...

[Suspect in Charlie Kirk Shooting Is Tyler Robinson of Utah, Governor Confirms](#) Sep 12, 2025 [The Epoch Times](#) A family member told local officials that Robinson had spoken about Kirk in recent days, Cox said, adding that Robinson had sent messages on the Discord platform.

[Appeals Court Upholds \\$83 Million Ruling Against Trump](#) Sep 12, 2025 [The Epoch Times](#) Judges said the president defamed E. Jean Carroll.

[Appeals Court Allows EPA to Cancel \\$16 Billion in Climate Grants](#) Sep 12, 2025 [The Epoch Times](#) A federal appeals court

ruled a lower court judge had no authority to halt the termination of the program.

[Employees Fired, Suspended for Celebrating Charlie Kirk's Death](#) Sep 15, 2025 [The Epoch Times](#) Airline pilots, educators, and retail workers have been fired or suspended, while users continue to flag offending posts on social media.

[Charlie Kirk Assassination Suspect's Bullet Casings Had Messages: What We Know](#) Sep 15, 2025 [The Epoch Times](#) "Investigators asked if [the roommate] would show them the messages on Discord," Cox said at the news event. "He showed several messages to investigators and allowed investigators to take photos of the screen ... these photos consisted of various messages, including content of messages between the phone contact named Tyler with an emoji icon, and Robinson's roommate's device. "The content ... included messages affiliated with the contact Tyler stating a need to retrieve a rifle from a drop point, leaving the rifle in a bush. Messages related to visually watching the area where a rifle was left, and a message referring to having left the rifle wrapped in a towel."

[Leftists Cheer For Charlie Kirk's Assassin Then Falsely Claim He Is "Right Wing"](#) Sep 15, 2025 [ZeroHedge](#) Then there was an effort to spread fake images featuring Robinson wearing a Trump t-shirt. The images have been identified as manipulated and the accounts spreading them have been exposed.

[France in Flames As the 'Block Everything' Protest Movement Sweeps the Country – PJ Media](#) Sep 12, 2025 [PJ Media](#) France and its hapless President Emmanuel Macron are in deep trouble. On Monday, Macron's government failed to survive a "no-confidence" vote as the country spiraled into crisis. What's most worrying for Macron is that the vote wasn't even close. Prime Minister François Bayrou was dumped overwhelmingly in a 364-194 vote. At issue: Bayrou's sensible but unpopular notion that France had to cut spending to address a growing debt crisis.

[FBI Releases Photos of Person of Interest in Charlie Kirk Assassination](#) Sep 12, 2025 [The Epoch Times](#) The FBI and local authorities said in a news conference earlier that they recovered a high-powered, bolt-action rifle that was discarded.

[Texas A&M Ousts 2 Officials After Student and Professor Clash Over Gender Identity Lesson](#) Sep 9, 2025 [The Epoch Times](#) The disputed lesson included teaching that there are more than two genders. In another clip, the professor told the student she was "very free to leave, and now is the time to do that." Harrison also released audio in which the student appealed directly to Texas A&M University System President Mark A. Welsh III to dismiss the professor. Welsh replied, "That's not happening."

[FDA Chief Says No Solid Evidence Supporting Hepatitis B Vaccine at Birth](#) Sep 9, 2025 [The Epoch Times](#) The CDC first recommended the hepatitis B vaccine in 1982, the year after it

was cleared, for people deemed to be at high risk, such as drug users, pregnant women, and infants born to mothers who had hepatitis B. By 1992, the recommendation for infants shifted to the first day of life and was broadened to all newborns because of “the difficulty of vaccinating high-risk adults,” according to the CDC. Three doses of the vaccine are on the CDC’s childhood immunization schedule

[BLMers Launch GoFundMe For Subway Stabber, Charlotte Mayor Urges Video Censorship](#) Sep 9, 2025 [PJ Media](#) Unlike the legacy media that refuses to touch rampant and totally disproportionate black-on-white crime on pain of death, Athena Thorne covered the story for PJ Media. In more recently released audio to accompany the video, the killer can be heard congratulating himself: “I got that white girl.”

[Trump Condemns Stabbing of Woman on Charlotte Train](#) Sep 9, 2025 [The Epoch Times](#) Trump later took to social media to say that the accused was a career criminal who had been released on cashless bail a total of 14 times. “What ... was he doing riding the train, and walking the streets? Criminals like this need to be LOCKED UP,” the president wrote, adding that the victim’s “blood is on the hands of” politicians who refuse to put bad people in jail. The killing has drawn national attention, with Republicans tying the incident to national debates over criminality.

[Why Washington’s Panic Over Kennedy Tells Us He’s Close to the Truth](#) Sep 8, 2025 [PJ Media](#) But read the captions closely: The questions weren't really about medicine; they were about power. Secretary Kennedy has been working to dismantle a system that thrives on crisis, contracts, and revolving door profits. His punishment wasn't the result of his hard work, which put errors into the spotlight. Instead, he was punished for the simple act of touching the money tree.

[The Image That Killed the Democrats in 2026 and Beyond](#) Sep 8, 2025 [PJ Media](#) A violent lunatic with fourteen previous arrests under his belt but who still freely roamed the streets randomly and viciously stabbed a young woman on the train, killing her. The murder occurred over two weeks ago, and they had every reason to believe the “local crime story” was as dead as the beautiful young victim. But then, the video emerged. It's chilling and terrifying, the horror that every urban female (and plenty of males) fears. The still image of the moment the madman's knife begins its descent is the most damning optic I've seen in years, and it will now become the face of the modern Democrat party.

[Japan's Prime Minister Ishiba Resigns, Most Likely To Be Replaced With Hard-Line Conservative](#) Sep 8, 2025 [ZeroHedge](#) For much of the past two months, ever since the historic loss of Japan's LDP in July's parliamentary elections, we have mocked the highly unpopular Japanese PM Shigeru Ishiba, who was clinging to the post despite record

disapproval and a clear shift in popular sentiment that had clearly stripped him of mandate to be Japan's leader.

[Biased Wikipedia Hurls Brickbats at Fox and Newsmax, Bouquets at CNN and MSNBC](#) Sep 7, 2025 [The Daily Signal](#) Even their leftist tilt is questioned! “In October 2019, American socialist magazine Jacobin argued that ‘MSNBC embodies the politics and sensibility of Trump-era liberalism, but argued that MSNBC ‘wasn’t always liberal.’” Then they quoted Tom Jones, the Poynter Institute’s version of Brian Stelter, who “argued that the primary distinction between MSNBC and Fox News is not left bias vs. right bias, but rather that much of the content on Fox News, especially during its prime-time programs, is not based in truth.” So, Fox is even maligned in the Wikipedia entry on MSNBC.

[‘We Are Being Lied To’: RFK Calls Out CDC Cover-Ups](#) Sep 7, 2025 [The Daily Signal](#) “The data from that study showed that black boys who got the vaccine on time had a 260% greater chance of getting an autism diagnosis than children who waited,” Kennedy said. But the chief scientist on that study, Dr. William Thompson, was called into an office by the head of the Immunization Safety Branch of the CDC “in order to destroy that data.” “Then, they published it without that fact,” Kennedy said.

[Number Of US Abortions Rises Post-Dobbs](#) Sep 7, 2025 [ZeroHedge](#) the rise of virtual-only appointments actually increased access to abortions for women in rural areas independent of the legal status of abortion in their state.

[Damning New Evidence Emerges in Biden Autopen Scandal](#) Sep 7, 2025 [PJ Media](#) Most tellingly, Dixon noted in her email that “the president did not review the warrants.” The expectation that autopen would handle Biden’s pardons and commutations says everything about how his White House operated and raises legitimate questions about who was really running the country. Staffers routinely mechanically applied Biden's signature to legal documents, and now we know his own counsel admitted he never actually reviewed what he was supposedly signing.

Note: In his hall of fame, Trump put a picture of an autopen for Biden!

[Sen. Rand Paul Criticizes the Trump Administration’s Bombing of Boat Near Venezuela](#) Sep 7, 2025 [Anti-War](#) “It’s hard to have any sympathy for drug dealers trying to import product into our country,” Paul said in an appearance on Newsmax. “But at the same time, I guess, you might ask the question, ‘Where does it end? Are we the world’s policemen?’”

[Do Doctors Make Money Off Vaccines? A Look at Incentives and Bonus Structures](#) Sep 6, 2025 [The Epoch Times](#) “Doctors are being paid to vaccinate, not to evaluate,” Health Secretary Robert F. Kennedy Jr. said in a recent video. “They’re pressured to follow the money, not the science.” Doctors

administer dozens of vaccines to many children in the United States. Adults are also advised to receive multiple shots.

['You've Taken \\$855,000 From Pharmaceutical Companies': Kennedy Spars With Senators During Wild Testimony](#) Sep 6, 2025 [ZeroHedge](#) WYDEN: Former CDC Dir. Texas pushes Lord’s prayer in public schools after losing legal battle over Ten Commandments in classrooms

Attorney General Ken Paxton slammed by First Amendment groups after ‘encouraging’ schools to recite Christian prayer

After losing a court battle over state law requiring the Ten Commandments in every public school classroom in the state, the top law enforcement official in Texas is now urging students to recite the Lord’s prayer.

Texas lawmakers recently approved voluntary periods of prayer and Bible reading in public schools. But Texas Attorney General Ken Paxton is going a step further with his vision for state-backed Christian education by “encouraging” schools to “begin the legal process of putting prayer back in classrooms.”

Paxton “encourages all Texas schools to implement dedicated time for prayer and the reading of scripture,” his office said this week.

“In Texas classrooms, we want the Word of God opened, the Ten Commandments displayed, and prayers lifted up,” he said

on government letterhead, with a copy of the Lord's prayer printed beneath his statement.

He claimed "twisted, radical liberals want to erase Truth" and "dismantle the solid foundation that America's success and strength were built upon, and erode the moral fabric of our society."

"Our nation was founded on the rock of Biblical Truth, and I will not stand by while the far-left attempts to push our country into the sinking sand," he said.

[Study Claiming No Link Between Aluminum in Vaccines and Autism Riddled with Flaws, Critics Say](#) Jul 25, 2025 [Children's Health Defense](#) But that's not what the Danish scientists did. Instead, they compared children who received vaccines containing aluminum to children who received vaccines with slightly less aluminum. Not only that, but there was only a one-milligram difference between the amount of aluminum in the vaccine doses received by the children in one of the groups compared to those in another group. Comparing children with similar aluminum levels rather than comparing children with low levels of aluminum to children with high levels of the metal further muddled the findings...

What began as an anti-Immigration and Customs Enforcement (ICE) protest, coordinated by rogue Marxist-aligned nonprofits, on Friday night in downtown Los Angeles quickly spiraled into riots and chaos, escalating by Sunday into what sure seems like ‘insurrectionist behavior’ against the federal government. ...What appears evident is that elements within the Democratic Party—from local L.A. leaders to D.C. elites, along with the law firms behind their sprawling dark-funded leftist NGO network—are orchestrating a coordinated color revolution. The goal appears to be placing Trump in politically difficult situations to shift public sentiment against the administration. This mirrors the strategy deployed by Democrats in 2020, when Marxist nonprofits, such as Black Lives Matter, were activated and mobilized to generate widespread unrest.

If abortion in general is truly as safe and effective as the procedure’s advocates claim, they should have no problem with medical providers collecting and reporting the data to prove it. Women have a right to know the risks of any medication they might consider taking. Hillary Clinton's latest act of hypocrisy stuns Americans as she attacks Elon Musk

Hillary Clinton was criticized for a remarkable act of hypocrisy after accusing Elon Musk of a 'blitzkrieg-style' coup to access secure government data - all while ignoring her own massive email scandal. -

Clinton, who famously mishandled classified information during her tenure as Secretary of State, called for Americans to protest the administrative actions taken by Musk and DOGE.

In a post on X and Instagram Tuesday, she urged Americans to stand against Musk for allegedly accessing sensitive government systems.

US military trying to remove transgender service members, legal filing says

President Donald Trump's administration is moving to remove transgender service members.

A legal filing seeks a temporary restraining order against the executive order.

Civil rights groups request maintaining current policies while the court reviews the case.

The order gave Defense Secretary Pete Hegseth 60 days to implement changes including a ban on "invented" pronouns. It did not spell out how, or if, the U.S. military would remove transgender forces since there is no requirement to identify as transgender.

Blackhawk Helicopter was on a "Continuity Of Government Mission" - DOD Head Pete Hegseth

<https://old.bitchute.com/video/16ofuhBmTN0n/>

Defense Secretary Pete Hegseth said the helicopter involved in Wednesday's collision with a passenger jet over the Potomac River was due to a mistake made as part of a training exercise for a Continuity of Government (COG) mission.

Continuity of Government (COG) protocol is a mostly classified process by which the federal government can maintain control over essential functions in the event of nuclear war, natural disaster or other catastrophe that affects high level government officials.

Those tasks are usually handled between two people from 10am until 9:30pm, according to the report.

After 9:30pm the duties are typically combined and left to one person as the airport sees less traffic later in the night.

A supervisor reportedly decided to combine those duties before the scheduled cutoff time however, and allowed one air traffic controller to leave work early.

The FAA report said that staffing configuration 'was not normal for the time of day and volume of traffic'.

It remains unclear why the supervisor allowed [the worker to clock off early on Wednesday night](#), just before the midair collision.

Dec 29, 2024 [Children's Health Defense](#)

A Dec. 13 article in Fortune called the polio vaccine “not only safe but also effective” and claimed that “20 million people who would've otherwise been paralyzed by polio are walking today.” But how accurate are those statements? And what basic facts critical to a full understanding of polio vaccines did Fortune not share with readers? the WHO said, “if it is allowed to circulate for sufficiently long enough time, it may genetically revert to a ‘strong’ virus, able to cause paralysis,

resulting in what is known as circulating vaccine-derived polioviruses.” Vaccine-derived polioviruses were responsible for the recently reported cases of polio in Gaza and the 2022 case reported in New York. In March 2023, seven children were paralyzed by vaccine-derived polio linked to the novel oral polio vaccine type 2 (nOPV2) developed by the Bill & Melinda Gates Foundation, according to health officials in the Democratic Republic of the Congo and Burundi and the Global Polio Eradication Initiative.

HEALTH VAX FAMILY: [18 Vaccines in one day turns unvaccinated 5 year old autistic. A tragic case.](#)
Oct 25, 2024 [Dr. Rowan](#)

Many children receive vaccines without “apparent” neurological injury. But many children seem to regress some time shortly after vaccination. This heartbreaking story involves a 5 year old who was spared vaccination by religious parents until a divorce came around and the judge promised custody to the parent who would vaccinate the child. Evidently the mother did, and the kid got a multitude of vaccines (18) all at once. Shortly after, he developed severe regressive autism. In a case like this, at age 5, there could be no question but that this was a vaccine induced injury. On the other hand, I have to admit that he might be loaded up with other environmental toxins, and the instant vaccine load pushed him over the brink. My understanding is that after fighting over custody, and the mom running out to get the myriad of vaccines all at once, she has abandoned the child to the father, with the attitude that she did not “sign up for this.” (“this” meaning continuing to raise her own vaccine injured child),

Democratic Kentucky Gov. Andy Beshear issued an executive order Wednesday that bans “conversion therapy” for minors, but did not include a prohibition against sex change treatments. The order states that it would be illegal to use state

or federal funding in providing conversion therapy for minors, and would give licensing boards the ability to take action on licensees if they are caught performing conversion therapy on a minor. Beshear vetoed a bill banning sex changes for minors in 2023 that was eventually overridden by the state Legislature.

Sep 11, 2024 [Thomas Neuburger Substack](#)

Kamala was hauled before three liberal judges who were outraged by her sloppiness. In response, Kamala lied under oath to all of them, trying to blame it on the police department crime lab... When an attorney presents evidence to a court, she or he vouches for it. Kamala should have been disbarred as a result, but San Francisco is a liberal “old boys” network, and liberals protect even lying, unethical DAs. When the dust cleared, 1,100 FELONIES had to be dismissed — and by Democratic judges. In the history of American jurisprudence, I don't think this has ever happened. Just think of what it means to have 1,100 felonies dismissed for defective chain-of-custody. Harris was willing to allow 1,100 people to go to prison for years because she wouldn't admit her errors.

This tax is in addition to the existing 10% to 11% federal excise tax that sellers already pay, which funds wildlife conservation efforts. That federal tax, also known as the Pittman-Robertson Wildlife Restoration Act, has been in effect since 1937, and has been heralded for funding wildlife conservation success in all 50 states.

The order allowed people to keep up to \$100 in gold coins, along with gold “as may be required for legitimate and customary use in industry, profession or art within a reasonable time,” and “rare” coins. It read, in part: “Deliver on or before May 1, 1933, to a Federal Reserve Bank or a branch or agency thereof or to any member bank of the Federal Reserve System all gold coin, gold bullion, and gold certificates now owned by them or coming into their ownership on or before April 28, 1933.” In return, the Federal Reserve Bank would give individuals an equivalent amount in “any other form of coin or currency coined or issued under the laws of the United States” at the rate of \$20.67 per ounce. Once the government got the gold at that price, it did what governments do – it changed the price-fixing to its advantage, raising the price to \$35 and devaluing the paper money people received in exchange for their gold.

[Navigating the Slippery Slope: How Hoover's Interventions Paved the Way for the Great Depression](#)

Mar 28, 2024 [The Mises Institute](#)

Hoover recognized the issues of overproduction and subsequently plummeting prices, but he was oblivious to the role that the government had played in overproduction by encouraging overexpansion. He advanced the idea of cooperative marketing associations in the belief that by banding together to sell their products, farmers could stabilize prices and increase their bargaining power, which would mitigate the influence of middlemen and reduce market volatility. This agricultural crisis saw the US becoming heavily protectionist, with heavy tariff impositions on imports (in 1921 and 1922) to prop up domestic agricultural prices. Every possible action was undertaken to avoid the temporary pain of trimming overexpanded industries, which would have allowed capital, labor, and land to find more profitable uses than agriculture.

Feb 17, 2024 [The Epoch Times](#) - Other researchers have noted that "The major protein modifications that occur during UHT treatment are denaturation and aggregation of the protein, and chemical modifications of its amino acids." Damaged milk proteins are likely to cause allergies. Today, milk allergy is the number one allergy and according to statistics provided by the Asthma and Allergy Network, we can estimate that modern milk causes approximately twenty deaths from anaphylactic shock per year! Most milk sold today in supermarkets is UHT milk—even organic milk is UHT. But it is not used in fermented products—check the labels for sour cream or cheese. These products are made from pasteurized—not UHT milk—most likely because UHT milk is so dead that it will not ferment. That's another way of saying that UHT milk is indigestible, as fermentation is a form of digestion.

Yet a government in the Australian state of Victoria has trodden on the sacred space of one's own inner prayers, all in the name of protecting people who identify as LGBTQ. The Change or Suppression (Conversion) Practices Prohibition Act 2021, which went into effect in August 2022, forbids certain practices aimed at changing or suppressing an individual's gender identity or sexual orientation. The law also bans "carrying out a religious practice, including but not limited to, a prayer-based practice, a deliverance practice or an exorcism."

Incredibly, he didn't really know how this came about. “It just sort of appeared,” he told the subcommittee, which was an unusual answer since he otherwise said 100 times

No, the story is that "conservatives" used plagiarism as a "weapon" against Gay. Let's back up just a moment to take a good, long, objective look at what we are talking about... In her already unimpressive scholastic career, Claudine Gay committed so much plagiarism (some 47 instances, according to the far-left New York Times) that the first black woman to hold the top job at Harvard was forced to resign. The fact that this woman is Claudine Gay is immaterial. Do you have any idea how much plagiarism has to be committed before a black woman loses her job as the first black woman of anything?

Harvard's student newspaper, that she was "sorry" and noted that her "words amplify distress and pain." She said she had "got caught up in what had become at that point, an extended, combative exchange about policies and procedures," adding that she "failed to convey what is my truth." Stefanik, a Harvard graduate, condemned Gay's apology. "No, Dr. Gay. You were given an opportunity to speak your truth," Stefanik responded to Gay on X, formerly Twitter. "And you did. Not once. President Biden recently repeated the claim that high prices are caused by greedy businesses. Biden is not alone in trying to gaslight the people into thinking price inflation is rooted in the actions of private individuals and not the fiat money system Americans have lived under since 1971. In the media we see excessive consumer spending on luxury items, for example, being blamed for continued price inflation. The fact is that increased consumer demand can only cause prices to rise in those sectors of the economy subject to the increased demand. Prices increasing across the economy are always the result of the Federal Reserve's conduct of monetary policy.

Kissinger would eventually obtain a tenured professorship at Harvard in 1962. Yet he was not destined for academia; his appetite was for high-stakes policymaking. He was the foreign policy advisor for Nelson Rockefeller's failed presidential campaigns and in 1968, when Nixon won the Republican nomination, Kissinger made it clear that he wanted to be part of the potential Nixon Administration. (Kissinger was adept enough to leave open the possibility of a position in the Humphrey administration, had he defeated Nixon.)

Previously: In Part 1, we introduced how the U.S. Food and Drug Administration (FDA) relaxed the rules for mRNA vaccines compared to mRNA therapies and discussed the available data regarding LNP distribution throughout the body based on animal testing, the fact that human testing was not done, and the lack of mRNA or spike protein biodistribution data. In Parts 2 and 3, we explored how the LNPs are constructed and how they behave in the body and affect health. Now we turn to another problem—the cargo contained in the LNP capsules: the mRNA and its encoded spike protein. We introduce the inflammatory response to the spike protein — [The Epoch Times](#)

Most Intensive Ivermectin Use Had 74 Percent Reduction in Excess Deaths in Peru: New Study

Aug 20, 2023

According to a new peer-reviewed ecological study, a natural experiment occurred when the government of Peru authorized ivermectin for use during the COVID-19 pandemic resulting in evidence of the drug's effectiveness and ability to reduce excess deaths. The paper's results, published August 8 in Cureus, found a 74 percent reduction in excess deaths in 10 states with the most intensive ivermectin use over a 30-day period following peak deaths during the pandemic. When analyzing data across 25 states in Peru, researchers found these reductions in excess deaths correlated closely to ivermectin use during four months in 2020. When ivermectin was available without restriction, there was a fourteenfold reduction in nationwide excess deaths. Once access to

ivermectin was restricted by the government, a thirteenfold increase in excess deaths was observed in the two months following the limitation of its use. — [The Epoch Times](#)

Justice Shrugged: The Persecution of Donald Trump

Aug 16, 2023

The four-count indictment most recently brought against Trump by Special Counsel Jack Smith is intended to make a victory in 2024 nearly impossible. The Deep State in this case represents the entrenched bureaucracy of the federal government as well as the individual states' election officials. This is the same Deep State that gathered up 51 national security officials to sign a statement prior to the 2020 election that falsely claimed that Hunter Biden's laptop “has all the classic earmarks of Russian disinformation.” It had none of them. No wonder Trump was disinclined to accept their conclusions that the election was secure and fair. Trump sought to prove his concerns about the legitimacy of the 2020 election by pursuing a vigorous legal strategy as was guaranteed to him under the First Amendment's right “to petition the government for a redress of grievances.” — [Real Clear Politics](#)

Crime has become so bad in Oakland, California, that residents are leaving the city. So if that calls for some, whoever commits the crime, to be prosecuted, so be it.” The NAACP in Oakland has actually called on the city to put more cops on the streets of Oakland. But I won't hold my breath while waiting for things to change. Our nation has been afflicted with a spirit of lawlessness.

Conservatives are among the most ardent proponents of the Pledge. That's ironic because it was written by a self-avowed socialist, a man named Edward Bellamy. One of the funniest parts of the history of the Pledge was the manner in which public-school students were expected to recite it. American students were long expected to extend their right arms outward while reciting the Pledge. You know, like the Nazi salute. Officials decided, for appearance's sake, to change it to the right hand over the heart. Another interesting aspect to the Pledge is that our American ancestors lived without it for the first 100 years of American history. Pfizer Knowingly Allowed Dangerous Components in its Vaccines
Feb 22, 2023

Pfizer's COVID-19 vaccine contains truncated mRNA, which the EMA flagged as a reason for its "major objection," indicating a preclusion of their approval. Pfizer has not investigated the detrimental outcomes of truncated mRNA in its vaccines. Pfizer submitted Western blot figures to the Food and Drug Administration (FDA) and the EMA that were digitally generated—not from actual experiments. There has been an alarming lack of action taken by health authorities on this issue. Truncated mRNA potentially contributes to multiple vaccine-related injuries, including misfolded spike protein-induced fibrous blood clots, autoimmune disorders, and cancer. These problems with the Pfizer vaccine could have resulted in drastic product quality variations from batch to batch. This could explain the difference in adverse events experienced by vaccine recipients. — [The Epoch Times](#)

"The Trials Should Have Been Halted": Rate Of 'Serious Adverse Events' Closely Tracks Spike In Post-Vax Disabilities
Feb 20, 2023

Now, the data has begun to speak for itself, thanks to people like former Blackrock portfolio manager Ed Dowd, who has devoted the last several years to deep-dive research and analysis of pandemic-related data (in fact, he's written an excellent book on the topic). Dowd, along with partners Carlos Alegria and Yuri Nunes, launched Phinance Technologies - where, aside from traditional macroeconomic analysis, they have produced comprehensive reports on pandemic-related disabilities and excess deaths using official data. Their latest analysis reveals that the rate of Serious Adverse Events in the

mRNA Covid-19 vaccine clinical trials closely tracks a spike in disabilities reported after the vaccine rollout.

New Medical Codes for COVID Vaccination Status Raise Concerns Among Experts

[Masterpiece Cakeshop Loses Appeal Over Gender Transition Cake](#)

Jan 30, 2023

Many years ago, I wrote an academic piece on how anti-discrimination laws would inevitably collide with free-speech and free-exercise rights. Those conflicts continued to mount across the country. In 2018, the court was thought to be ready to clarify the applicable standards in the case of a religious cake shop owner who refused to make cakes for same-sex couples. The court ultimately punted in Masterpiece Cakeshop, leaving uncertainty over the constitutional limitations on cities and states under anti-discrimination law. Smith's case has long been a focus for some of us. I have written in favor of taking a free-speech approach to these cases rather than treating them as conflicts under the Constitution's religion clauses. For that reason, one aspect of this grant of review was immediately notable. The court agreed to consider only one question:

"Whether applying a public-accommodation law to compel an artist to speak or stay silent violates the Free Speech Clause of the First Amendment." — [Jonathan Turley](#)

[UPDATES: Ammon Bundy Warning Letter to Gadiantons of Idaho](#)

Jan 27, 2023

Each week, going on 5 months now, Diego and I have received mountains of court documents. Holland & Hart is sending documents to my business, home and associates, by personal service companies, Gem County Sheriff's deputies, US Postal Service, Fed-Ex and UPS.

Some documents are too big to print so they send electronic files in packages to contain it all. Without exaggerating, I could have filled up a garbage dumpster to contain the amount of legal documents I have received from Holland & Hart. After speaking to an Idaho law firm (in hopes to defend myself) I was told that it would take at least 3 full time attorneys to respond to Holland & Hart's litigation on this case. Because this case may continue for several years, it is not impractical to calculate that it would take hundreds of thousands of dollars to properly defend against the onslaught of litigation paid for by donations given to St. Luke's Hospital. I was informed by two very creditable, independent sources (one a high-ranking Ada County Official and the other an attorney who works with St. Luke's hospital) that St. Luke's CEO gave Holland & Hart a blank check to financially destroy Diego and I for speaking out against them in the role they played in taking baby Cyrus. So, rather than taking action to ensure that the situation with baby Cyrus does not happen again, instead, St Luke's CEO, Chris Roth, has authorized hundreds of thousands of dollars of donations given to St. Luke's Hospital to pay a law firm to financially destroy baby Cyrus' family and those who stood with them. I don't believe this is why people donate to St. Luke's Hospital. I believe those who donate to St. Luke's Hospital are under the impression that their donations are going to medically help children and other patients, not to fund a team of \$600 per hour bureaucrat attorneys sent to even a political score. To date, St Luke's team of attorneys have used the courts to put a lien on my home, forcing me to sell it. — [Defending Utah Baby Cyrus Was Kidnapped by CPS and Meridian Police!](#)

Vaccinated Americans a majority of COVID deaths for first time in August – Kaiser Family Foundation says, 'We can no longer say this is a pandemic of the unvaccinated', Nov. 23, 2022, FOX News – "The paper described a "troubling trend" as the share of deaths of people who were vaccinated has been "steadily rising" over the past year." Steadily rising? It has since mid-2020 and it is mass murder. Do all you can to get your city council member to watch it as hospitals, clinics and pharmacies continue to jab people and the screeching to get jabbed will only ramp up now winter is here. They have the power over those corporations/companies' business licenses in cities. The same for your state rep and senator. Why You Need to Start Paying Attention to the 'Twitter Files'

Dec 28, 2022

For those of you not following the “Twitter Files” drops, let me catch you up on what I believe are some of the most important parts: The FBI paid Twitter \$3.5 million to censor conservatives. The FBI pressured Twitter to give them information that would legally require warrants, though they did not have warrants. Leading up to the 2020 election, the FBI would eventually hold weekly meetings with Twitter and tell them whose tweets to squelch and which accounts they wanted to be suspended. Almost all were those of conservatives. The FBI knew the Hunter Biden laptop story was real, they knew it was coming out — weeks before the 2020 election — and they told Big Tech to expect a “Russian disinformation” drop and squelch the story. That means the FBI corrupted the election to help Joe “totally showered with his daughter, Ashley” Biden. There are so many former FBI employees at Twitter that they have their own Slack channel. — [PJ Media](#)

British Woman Arrested For Silently Praying Near Abortion Clinic

Dec 28, 2022

While there have been numerous attempts to degrade the 1st Amendment in America, being arrested outright by police for your thoughts alone is not a low we have sunk to yet. In the UK and through most of Europe it's a different story. UK laws designed to prevent the obstruction of businesses have opened the door to policies called Public Space Protection Orders, which create a "buffer zone" around certain areas or buildings and prohibit activities that, in the words of UK authorities, foster "anti-social behavior." Yes, this is as Orwellian as one could imagine, but it gets even worse. — [ZeroHedge](#)

Is the Latest Polio Scare Actually Caused by the Vaccine?
Aug 23, 2022

What They're Not Telling You In the U.S., polio was officially declared "eradicated" in 1979, and its eradication was attributed to a successful mass vaccination campaign. What the New York health department is not telling you, though, is that when polio strikes these days, it's almost always caused by a vaccine strain. In contrast to CBS, the CNBC actually mentions this in its report:³ "The polio strain the adult in Rockland County caught suggests the chain of transmission did not begin in the United States. The strain the individual contracted is used in the oral polio vaccine, which contains a mild version of the virus that can still replicate. This means people who receive the oral vaccine can spread the virus to others. — [Dr. Mercola](#)

[Hawaii Electricity Prices To Skyrocket As Final Shipment Of Coal Arrives](#)

Aug 2, 2022

The Kapolei plant has been Oahu's largest single generator for three decades, meeting about 16% of the island's peak electricity demand. Its closure on Sept. 1 means eliminating 180 megawatts of power, or about one-tenth of what Oahu needs. There is no ready replacement for this source of energy which is about to go offline. But wait, it gets funnier: one year ago, Hawaii was stunned to learn that the "green facility" which is replacing the Kapolei coal plant, the 185-MW Kapolei Energy Storage Facility, will be charging its "enormous battery" ... with oil! In other words, Hawaiians will be trading one fossil fuel (coal) for another, albeit one far more expensive. Or as the chair of PUC, Jay Griffin, complained, Hawaiians are "going from cigarettes to crack." — [ZeroHedge](#)

Peer-Reviewed Studies Confirm That Vaccine and Mask Mandates Did Not Stop COVID Spread in Schools and Universities

Jun 5, 2022

Toward the end of the semester in 2021, the almost completely vaccinated Cornell University shut down its campus due to a surge in COVID cases. "Mask mandates have failed to control the spread of infection in schools, as this analysis of schools with and without mask mandates demonstrates. Greenwald: The Demented - And Selective - Game Of Instantly Blaming Political Opponents For Mass Shootings

May 17, 2022

This principle is not only a jurisprudential or constitutional one. It is also a rational one. Those who express ideas without advocating violence are not and cannot fairly be held responsible for those who decide to pick up arms in the name of those ideas, even if — as in the case of James Hodgkinson — we know for certain that the murderer listened closely to and was influenced by people like Rachel Maddow and Bernie Sanders. In such cases, we understand that it is madness, and deeply unfair, to exploit heinous murders to lay blame for the violence and killings on the doorsteps of our political adversaries. But when a revolting murder spree is carried out in the name of right-wing ideas (or ideas perceived by the corporate press to be right-wing), everything changes — instantly and completely. In such cases, often before anything is known about the murderer — indeed, literally before the corpses are even removed from the ground where they lie — there is a coordinated effort to declare that anyone who holds any views in common with the murderer has "blood on their hands" and is essentially a co-conspirator in the massacre. — [Glenn Greenwald](#)

Biden Wants \$2.6 Billion for Gender Equity Worldwide

Apr 7, 2022

With few guidelines and little oversight, there's no telling where these funds will end up. The budget request will soon be sent to Congress, which ultimately decides what funding to approve, but the Democratic majority in the House of Representatives will likely try to incorporate the president's priorities into its bill. It's likely that \$2.6 billion for gender equity for foreign assistance programs will make its way into the final bill. #WasteoftheDay It's Your Money! — [Real Clear Policy](#)

Court Rules California's Corporate Diversity Law Unconstitutional

Apr 5, 2022

A Los Angeles court determined on April 1 that a California law requiring certain workplace boardroom quotas of underrepresented communities is unconstitutional. Conservative watchdog group Judicial Watch filed a lawsuit (pdf) in early October 2020 arguing that any spending of taxpayer funds or taxpayer-paid resources on the quota law is "illegal under the California Constitution." The lawsuit was filed days after California Gov. Gavin Newsom signed it into law. The measure required publicly traded companies to have a minimum of one director from an "underrepresented community" on its board by the end of last year and potentially more such directors by the end of 2022, depending on the number of members on a given board. — [The Epoch Times](#)

The US Bombed A Vital Dam In Syria, Lied About It, & Called Anyone Who Reported The Truth "Crazy"

Jan 25, 2022

Many years too late, it appears The New York Times has suddenly discovered that the United States has been committing war crimes in Syria, coming long after it was clear Washington was pursuing regime change in Damascus. With Assad still in control of most of the country, US efforts have turned to far-reach sanctions of late, which have greatly increased the sufferings of common Syrians. Like with Bush's disastrous invasion of Iraq before, the Times was the foremost cheerleader for that war, laundering Pentagon and admin propaganda, and only many years later admitting the truth that it was all based on lies... so now it seems to be going with Syria. — [ZeroHedge](#)

October 26 2021

The question then arises: what prompted the FBI's six-month slumber on Epps, and then their sudden purger on July 1? Well, they panicked. Two major media reports (discussed below) came out on June 30, each of which touched the Ray Epps "Third Rail" from different angles, and the FBI likely realized it was no longer safe to maintain a digital record acknowledging they ever knew who this guy was. Then, the FBI hoped no one would notice the purged files, or would either politely look away or actively assist with their cover-up. — [Revolver News](#)

A Brief History of the Assault on Conservatives as 'Violent Extremists'

August 21 2021

The assault on conservative Americans began several decades ago with attacks on traditional principles and values. Belief in individual liberty and responsibility, free enterprise, and the rule of law was willfully conflated with "right-wing extremism." Pride in America, a desire to protect our borders, and opposition to illegal immigration were branded as xenophobic. Championing the constitutional right to bear arms was decried as gun-

crazed zealotry. Belief in religion, natural law, and the sanctity of human life was maligned as backward and anachronistic. — [American Thinker](#)

August 3 2021

The clearest problem with the admonition to “believe in science” is that it is of no help whatsoever when well-credentialed scientists—that is, bona fide experts—are found on both (or all) sides of a given empirical question. Dominant parts of the intelligentsia may prefer we not know this, but dissenting experts exist on many scientific questions that some blithely pronounce as “settled” by a “consensus,” that is, beyond debate. This is true regarding the precise nature and likely consequences of climate change and aspects of the coronavirus and its vaccine. Without real evidence, credentialed mavericks are often maligned as having been corrupted by industry, with the tacit faith that scientists who voice the established position are pure and incorruptible. It’s as though the quest for government money could not in itself bias scientific research. Moreover, no one, not even scientists, are immune from group-think and confirmation bias. — [Sheldon Richman](#)

[The Many Ways in Which COVID Vaccines May Harm Your Health](#)

June 4 2021

COVID-19 vaccines are capable of causing damage in a number of different ways. Disturbingly, all these different mechanisms of harm have synergistic effects when it comes to dysregulating your innate and adaptive immune systems and activating latent viruses. The worst symptoms of COVID-19 are created by the SARS-CoV-2 spike protein, and that is the very thing gene-based COVID vaccines are instructing your body to make. While the natural spike protein is bad, the spike protein your body produces in response to the vaccine is even worse, as the synthetic RNA has been manipulated in such a way as to create a very robust and unnatural spike protein. The spike protein is toxic in and of itself, and has the ability to induce vascular, heart and neurological damage. The COVID-19 vaccine disables the Type I interferon pathway, which explains why vaccinated patients are reporting herpes and shingles infection following COVID-19 vaccination — [Dr. Mercola](#)

February 13 2021

As Americans continue to watch the 2020 election controversy unfold, the very same publications that spent years lying about President Trump's "Russia collusion" are once again telling us what we are dutifully supposed to believe. The Los Angeles Times, for instance, assures us that Trump's "baseless" and "dangerous" claim "that the election was rigged to benefit Joe Biden" has been thoroughly "debunked." [1] The New York Times proclaims that "Trump's false election fraud claims" are founded upon nothing more than a "torrent of

falsehoods." [2] Sneering at "how Trump drove the lie that the election was stolen," The Washington Post mocks Republicans who "are still pretending that there was election fraud." [3] And CNN.com warns that "Trump's obsession with overturning the election" has now begun to spiral "out of control." [4] But so much for what the comic books have to say. What follows is a compilation of vital facts that will demonstrate, to anyone interested in following the truth wherever it may lead, that the 2020 presidential election was indeed rife with fraud, and that Joe Biden, if he should in fact be sworn into office next month, will be an illegitimate president from the very start. — [Front Page Mag](#)

Big Brother is watching you. Sadly, most people don't realize how extensive the surveillance grid has now become. As you drive to work or to school, license plate readers are systematically tracking where you travel. In major cities, thousands of highly advanced security cameras (many equipped with facial recognition technology) are monitoring your every move. If authorities detect that you are doing something suspicious, they can quickly pull up your criminal, financial and medical records. Of course if they want to dig deeper, your phone and your computer are constantly producing a treasure trove of surveillance data. Nothing that you do on either one of them is ever private. — [Michael Snyder](#)

The U.S. would also seek to embed these policies and priorities in new trade treaties and multilateral agreements. President Biden has already begun this process by rejoining the Paris Climate Accord, which actually doesn't mean much; it's mostly for show. The Paris Accord is also a platform for

pursuing the Green New Deal. But it's difficult to conceive of any other program that would do more harm to the U.S. economy and give more of a boost to the Chinese, Russians and Iranians. Biden has temporarily halted all new oil and gas drilling leases and permits on federal lands. He's moving quickly to make the ban permanent. This ban will kill the fracking industry and help to destroy what's left of the coal industry. Because of reduced supply, it will raise energy prices globally. When Briand looked at the 2020 data during that seasonal period, COVID-19-related deaths exceeded deaths from heart diseases. This was highly unusual since heart disease has always prevailed as the leading cause of deaths. However, when taking a closer look at the death numbers, she noted something strange. As Briand compared the number of deaths per cause during that period in 2020 to 2018, she noticed that instead of the expected drastic increase across all causes, there was a significant decrease in deaths due to heart disease. Even more surprising, as seen in the graph below, this sudden decline in deaths is observed for all other causes. — [Johns Hopkins](#)

That is because three Silicon Valley monopolies — Amazon, Google and Apple — abruptly united to remove Parler from the internet, exactly at the moment when it became the most-downloaded app in the country. If one were looking for evidence to demonstrate that these tech behemoths are, in fact, monopolies that engage in anti-competitive behavior in violation of antitrust laws, and will obliterate any attempt to compete with them in the marketplace, it would be difficult to imagine anything more compelling than how they just used their unconstrained power to utterly destroy a rising competitor. — [Glen Greenwald](#)

2) Hunter Biden's laptop: The ability to bury the Hunter Biden story throughout the 2020 presidential campaign ranks as one of the greatest victories in the history of propaganda. Hunter is the son of former Vice President Joe Biden, and his acknowledged history as a drug addict is now considered his strong suit. The Senate Homeland Security Committee found extensive evidence that Hunter has made hundreds of millions of dollars for the Biden family by selling access to his father, so when Hunter's laptop turned up with first-person incriminating evidence, it was pretty obvious that Joe Biden had a lot of answer for. Except that the media never made him answer for anything. It preferred to rest on the bizarre assertion from 50 former U.S. intelligence officials that clear evidence of foreign collusion on Hunter's laptop had all the earmarks of a "Russian disinformation" campaign. The CASE Act Is Just the Beginning of the Next Copyright Battle

The CASE Act is supposed to be a solution to the complicated problem of online copyright infringement. In reality, it creates a system that will harm everyday users who, unlike the big players, won't have the time and capacity to negotiate this new bureaucracy. In essence, it creates a new "Copyright Claims Board" in the Copyright Office that will be empowered to adjudicate copyright infringement claims, unless the accused received a notice, recognizes what it means, and opts out—in a very specific manner, within a limited time period. The Board will be staffed by "claims officers," not judges or juries. You can appeal their rulings, but only on a limited basis, so you may be stuck with whatever amount the "claims board" decides you owe. Large, well-resourced players will not be affected, as they will have the resources to track notices and simply refuse to participate. The rest of us? [Persuading Employees into Vaccine Compliance](#)

A few months ago, when it was becoming obvious that Covid-19 propaganda wasn't going away after a couple weeks of flattening the curve, the New England Journal of Medicine published Ensuring Uptake of Vaccines against SARS-CoV-2. The recommendation in this article is that employers be able to either mandate or, offer incentives to employees to get the Covid-19 vaccine. The incentives could be in the form of punishments such as loss of pay or suspensions. The reasoning for this was based on the knowledge that forcing the vaccine onto society through means of law was unconstitutional and unlikely to work. The journal also cited the fact that forcing families to get their children vaccinated before going to school was an effective means of ensuring they received their required vaccinations. It stood to reason then, as far as the journal was concerned, that enlisting employers as a means of ensuring vaccine uptake would be an effective route. — [Defense of Our Nation](#)

However, according to an

August 2012 Defense Intelligence Agency report (only released to the public in May 2015), this is anything but the case. The report was critical of the policies of then President Obama as a direct igniter for the rise of ISIS and the creation of a "caliphate" by Syria-based radical Islamists and al-Qaeda. The report also identified that arms shipments in Libya had gone to radical Islamist "allies" of the United States and NATO in the overthrowing of Col. Muammar al-Gaddafi. [The Hiroshima Myth](#)

...The stark fact is that the Japanese leaders, both military and civilian, including the emperor, were willing to surrender in May of 1945 if the emperor could remain in place and not be subjected to a war crimes trial after the war. This fact became known to President Truman as early as May of 1945. The Japanese monarchy was one of the oldest in all of history,

dating back to 660 BC. The Japanese religion added the belief that all the emperors were the direct descendants of the sun goddess, Amaterasu. The reigning Emperor Hirohito was the 124th in the direct line of descent. After the bombs were dropped on August 6 and 9 of 1945, and their surrender soon thereafter, the Japanese were allowed to keep their emperor on the throne and he was not subjected to any war crimes trial. The emperor, Hirohito, came on the throne in 1926 and continued in his position until his death in 1989. What Spike? Hospitalization Data Show No Indication of a Second Wave

...an attempt to estimate the true number of infections would be little better than a guess. And this presents a problem with the daily updates. To say that a particular state or city is seeing a “spike” in cases is to say that recently they have had an uptick in positive test results. That could be due to more testing and more ways of testing, or it could be a hint of growth in the infection rate. — [American Institute for Economic Research](#)

Radicals just passed a bill through a committee in Colorado (20-14) to reduce available exemptions on vaccinations for school-age children. This bill offers “online education modules” for parents who want a different vaccination schedule than what the state demands. Submitting a “certificate of completion” from the re-education classes is one way to receive the state-sanctioned vaccine exemption. In addition, the bill forces all doctors and medical staff to give vaccinations with no exemptions, even if they are in a situation where they believe it would not be in that child's best interest. Google Erases the Existence of Those Who Speak Unwelcome Truths

Daniel Greenfield, the peerless Shillman Fellow and FrontPage writer, tweeted the news on May 7: “Google just erased my Sultan Knish blog and Front Page Mag articles from the first pages of results for my name doubt very much this is accidental.” I did too, so I checked for myself, and sure enough: a Google search for “Robert Spencer” now does not bring up Jihad Watch, where most of my writing outside of books has been published for the last seventeen years, but it does give you defamatory and distorted attack pieces from the far-Left Southern Poverty Law Center and the Saudi-funded Bridge Initiative, and nothing that doesn’t portray me and my work in the most unfavorable possible light. No More "Mr.Clean" - Inside The "Scandal-Free" Years Of Obama's Presidency

Looking back, there were so many, big and small scandals such as the fast and furious, the operation that sent guns into the hands of drug gangs in Mexico, they became difficult to track. In Las Vegas, the GSA went on a spending spree. A large number of sexual assaults occurring in the military. Solyndra which should be placed in the dictionary and defined as "what happens when politicians and bureaucrats play businessman with taxpayer money" failed. The CIA had a "prostitutes fiasco" in South America. Fisker Automotive failed, this deal reeked of government cronyism and waste. 68% Of Unemployed Workers In The U.S. “Are Eligible For Payments That Are Greater Than Their Lost Ea

Can anyone explain how we are going to motivate unemployed workers to go back to work when most of them can actually make more money camped on their sofas watching Netflix? Over the past couple of months, 36.5 million Americans have filed new claims for unemployment benefits, and Congress understandably wanted to do something to address this unprecedented spike in unemployment. But by giving all of these unemployed workers a repeating 600 dollar bonus on top of existing unemployment benefits, Congress has actually created a very powerful incentive for Americans to be unemployed and to stay unemployed for as long as the bonuses last. — [The Economic Collapse Blog](#)

Why Calls For A “National Quarantine” May Be More Rhetorical Than Legal

Below is my column in the Hill on how the calls for a “national quarantine” ignore both the historical and legal

In March, US Deaths From COVID-19 Totaled Less Than 2% Of All Deaths

average daily number of deaths from December through March is over eight thousand. So far, total death data is too preliminary to know if there has been any significant increase in total deaths as a result of COVID-19, and this is an important metric, because it gives us some insight into whether or not COVID-19 is driving total death numbers well above what would otherwise be expected. — [The Mises Institute](#)

Banks To Make Risk-Free Killing On Small Business Bailout: Fed Will Buy Payroll Loans Issued By Bank

And just like that, the big banks are about to make a killing (again) thanks to the Fed. As a reminder, as part of the SBA and Treasury's Payroll Protection Program plan to bail out small and medium business, it gave America's banks and credit unions some \$350BN in guaranteed cash to use to make loans to America's struggling small and medium business, which proceeds would be used to fund payroll. However, in a bizarre twist, the banks were reluctant to pass through the money to America's middle class, ostensibly due to concerns about the low rate on the loans (which was originally 0.5%, and was subsequently raised to 1%) and also concerns who these loans could be sold and/or repackaged to if and when the economy turned sour and banks were stuck holding hundreds of billions in NPLs. — [ZeroHedge](#)

Manufactured Pandemic: Testing People for Any Strain of a Coronavirus, Not Specifically for COVID-19

I work in the healthcare field. Here's the problem, we are testing people for any strain of a Coronavirus. Not specifically for COVID-19. There are no reliable tests for a specific COVID-19 virus. There are no reliable agencies or media outlets for reporting numbers of actual COVID-19 virus cases. This needs to be addressed first and foremost. Every action and reaction to COVID-19 is based on totally flawed data and we simply can not make accurate assessments. This is why you're hearing that most people with COVID-19 are showing nothing more than cold/flu like symptoms. That's because most Coronavirus strains are nothing more than cold/flu like symptoms. The few actual novel Coronavirus cases do have some worse respiratory responses, but still have a very promising recovery rate, especially for those without prior issues. — [Global Research](#)

Americans Will Have To Cure The Coronavirus Epidemic on Their Own

It is difficult to believe public health authorities are doing all that can be done to prevent disease, save lives and promote health. That is because what is obvious, what is essentially free (sunshine vitamin D), and what is logical, is not being done. The Centers for Disease Control (CDC) is a one-trick pony — vaccination. Inject a little bit of a disease into people under the presumption all will develop antibodies against infectious diseases. Everyone on the planet is expected to hold their breath, metaphorically speaking, and wait for a future vaccine that will, by my predictions, end up hospitalizing many and leading hundreds of thousands of high-risk individuals (diabetics, smokers, drinkers, the frail elderly) to their early demise because these are the people who do not develop sufficient antibodies following vaccination. — [Lew Rockwell.com](#)

Neither the Trump administration nor Congress has the legal authority to shut down American life absent at least baseline due process. One Third Of All Coronavirus Cases Show No Symptoms, Classified China Data Reveals

...According to the South China Morning Post, which cited classified data from the Chinese government, as many as a third of the people who test positive for the coronavirus - also known as "silent carriers" - may show delayed symptoms or none at all. The data show that 43,000 people in China tested positive by the end of February, but had no actual symptoms, the newspaper reported. They were quarantined and monitored, though as we noted last month, in a radical change in how China is underreporting the severity of the disease, asymptomatic cases aren't included in China's tally of those infected with the virus. — [ZeroHedge](#)

"Critical Medical Supply Shortage": The Moment US Woke Up To Disaster Of Always Outsourcing To China

Italian Virologist Says Concerns Over “Racism” Crippled Italy’s Coronavirus Response

Senate Releases Full Text Of \$2 Trillion Stimulus Bill: Here's What's In It

Cash for citizens, gig workers Airlines to get loans, cash-for-equity bailouts Small businesses get cash injections Money for hospitals in healthcare ‘Marshall Plan’ Mortgage relief for wide swath of borrowers Emergency aid for farmers: State and local governments get relief ...No aid for Trump properties: Democrats won language that bars any business owned by President Donald Trump or his family from getting loans from Treasury. Businesses owned by members of Congress, heads of executive departments and Vice President Mike Pence also would be blocked from receiving aid under the stimulus program. Oil Industry: A \$3 billion provision in the original GOP bill to buy oil for the nation's Strategic Petroleum Reserve was cut by negotiators. The funding for the emergency stockpiles had been requested by the Trump administration for the purchase of up to 77 million barrels of crude oil to support the domestic industry and boost reserves at cheap prices. Democrats sought to add billions in funding for clean energy in exchange and in the end both were scuttled. — [ZeroHedge](#)

Why Did Hundreds Of CEOs Resign Just Before The World Started Going Absolutely Crazy?

In the months prior to the most ferocious stock market crash in history and the eruption of the biggest public health crisis of our generation, we witnessed the biggest exodus of corporate CEOs that we have ever seen. In life, timing can be everything, and sometimes people simply get lucky. But it does seem odd that so many among the corporate elite would be so exceedingly “lucky” all at the same time. Stimulus Bill: The Fed and Treasury's Slush Fund Is Actually \$4 Trillion

Americans got their first whiff that this was going to be another massive giveaway to Wall Street banks, just as happened from 2007 to 2010, when White House economic adviser Larry Kudlow appeared at the White House briefing yesterday evening. Kudlow revealed that the stimulus plan is actually a \$6 trillion package — \$2 trillion to struggling Americans and \$4 trillion to dispense as Treasury Secretary Steve Mnuchin and the Federal Reserve see fit. Since the Federal Reserve has seen fit since September 17 of last year to flood the trading houses of Wall Street with \$9 trillion cumulatively in revolving loans, one can reasonably expect that this is where the new \$4 trillion will be going. — [Wall Street on Parade](#)

Coronavirus Is Not Even Close to America's Biggest Problem

The COVID-19 pandemic can be used to illustrate two problems that are both more destructive than the virus. Wuhan Ultra Biohazard Lab Was Studying "The World's Most Dangerous Pathogens"

...A quick read of what this lab was meant to do, prompts the immediate question whether the coronavirus epidemic isn't a weaponized virus that just happened to escape the lab: The Wuhan lab cost 300 million yuan (US\$44 million), and to allay safety concerns it was built far above the flood plain and with the capacity to withstand a magnitude-7 earthquake, although the area has no history of strong earthquakes. It will focus on the control of emerging diseases, store purified viruses and act as a World Health Organization 'reference laboratory' linked to similar labs around the world —

Afghanistan Papers – Washington Post

The News Churn Memory Hole: How The MSM Lies Even When Telling The Truth – on Afghanistan papers etc. - Medium.com

The Washington Post has published **clear, undeniable** evidence that US government officials have been lying to the public about the war in Afghanistan, a shocking revelation for anyone who has done no research whatsoever into the history of US interventionism. In all seriousness it was a very good and newsworthy publication, and those who did the heavy lifting bringing the Afghanistan Papers into public awareness deserve full credit. The frank comments of US military officials plainly stating that from the very beginning this was an unwinnable conflict, initiated in a region nobody understood, without anyone being able to so much as articulate what victory would even look like, make up an extremely important piece of information that is in conflict with everything the public has been told about this war by their government.

NSA Allowed To 'Unmask' US Citizens Without Surveillance Warrant: US Court. — ZeroHedge

A US court of appeals ruled on Wednesday that the US government may collect information about a US citizen without first obtaining a surveillance warrant, as long as it was done so inadvertently while legally monitoring a non-national abroad, according to Reuters

Lights, Camera, Greta! Teen Environmentalist's 'Viral' Rise Has Been A Documentary This Whole Time (Highly Choreographed) — ZeroHedge

...Which begs the question; did Greta's famous parents - opera singer Malena Ernman and actor Steve Thunberg - use their industry connections to prepare their daughter to become a celebrity? As RT notes, "Her rise has been meticulously choreographed, her school strike made famous on its first day by Ingmar Rentzhog of the climate change social network 'We Don't Have Time.' Rentzhog, already friends with Thunberg's parents, has already been accused of using the girl's image to raise millions of dollars for his company – making her a household name in the process."

Latvian government says it flagged 'suspicious' Hunter Biden payments in 2016 — John Solomon Reports

As the U.S. presidential race began roaring to life in 2016, authorities in the former Soviet republic of Latvia flagged a series of “suspicious” financial transactions to Hunter Biden and other colleagues at a Ukrainian natural gas company and sought Kiev’s help investigating, according to documents and interviews. The Feb. 18, 2016 alert to Ukraine came from the Latvian prosecutorial agency responsible for investigating money laundering, and it specifically questioned whether Vice President Joe Biden’s younger son and three other officials at Burisma Holdings were the potential beneficiaries of suspect funds.

Senate Sends Mammoth \$738BN Defense Bill To Trump's Desk, Creating Space Force — ZeroHedge

The U.S. Senate has joined the House of Representatives in passing the National Defense Authorization Act (NDAA) for Fiscal Year 2020, and it will now go to the White House where President Trump is expected to sign it into law. The Senate passed the massive \$738 billion defense spending bill on Tuesday, which as we previously noted when it cleared the House last week, also officially establishes the president's much sought after 'Space Force' as a sixth branch of the military.

Pollak: Line by Line, A Complete Debunking of the Democrats' Articles of Impeachment — Joel B.

Pollack/Breitbart

Not only did the Democrats back away from charging Trump with bribery, obstruction of justice in the Mueller investigation, campaign finance violations, treason, or any of the other wild claims they floated, but the two articles themselves are fraudulent, based on blatantly false claims of law and fact. Line by line, here they are:

First Made-In-China Aircraft Carrier Enters Active Service — ZeroHedge

...Before Shandong, the People's Liberation Army Navy (PLAN) operated one aircraft carrier called the Liaoning, which was built on a Soviet-era vessel, refitted as an aircraft carrier and launched into service back in 2012. Construction of Shandong began in 2013 and was launch at the Dalian Shipyard in 2017. By 2018, the vessel started several sea trials, and it wasn't until late 2019 that the ship completed eight tests, including transiting the Taiwan Strait and the South China Sea.

A Quarter Of Kids Treated At Transgender Clinics May Just Be Autistic, New Study Finds — ZeroHedge

...The Australians also quoted 'definitive findings' from a US study of almost 300,000 children, which discovered those with autism "were over four times as likely to be

diagnosed with gender dysphoria" compared to those without autism. Last year The Mail on Sunday unearthed an internal study by GIDS in London, also known as the Tavistock Clinic, which found 35 per cent of children and teenagers referred there between 2011 and 2017 had "moderate to severe autistic traits."

Former NBA Player Fined for Not Looking at Chinese Flag During Anthem — Breitbart

A French former NBA player has been fined by the Chinese Basketball Association (CBA) for not showing proper respect to the communist nation's flag during the playing of their national anthem. Guerschon Yabusele, a former Boston Celtic who plays for the CBA's Nanjing Monkey Kings, bowed his head and did not look at the Chinese flag during the anthem. As a result, Yabusele was fined 10,000 Yuan (\$1,400).

The Campaign to Lie America Into World War II — Hunter Derensis/The American Conservative

Before Pearl Harbor, there was an elaborate British influence operation of forged documents, fake news, and manipulation....But before Japan opened this door to war, the United States had been the target of an elaborate, covert influence campaign meant to push public opinion, by hook or by crook, into supporting intervention on the side of the British. Conducted by the United Kingdom's MI6 intelligence service, it involved sometimes witting (and often unwitting) collaboration with the highest echelons of the U.S. government and media establishment.

Have Fannie and Freddie Learned Nothing? — Liberty Nation

Some analysts find pockets of weakness in the real estate market as proof that the housing bubble 2.0 is about to pop. One of the biggest markets in the country, Los Angeles, has

witnessed a 31% plunge in condominium sales in the third quarter. The sky is not falling because this incident has a reason: Buyers from Beijing accounted for half of condo acquisitions since 2014, and now Chinese cash is drying up. In New York City, a quarter of new luxury apartments are unsold and empty.

300+ Trump ads taken down by Google, YouTube — CBS News

60 Minutes reviewed the archive to learn more about President Trump's problematic political ads. We found that over 300 video ads were taken down by Google and YouTube, mostly over the summer, for violating company policy. But the archive doesn't detail what policy was violated. Was it copyright violation? A lie or extreme inaccuracy? Faulty grammar? Bad punctuation? It's unclear. The ads determined to be offending are not available to be screened. We found very little transparency in the transparency report.

Second Amendment Sanctuaries: Rhetoric vs. Reality — The Mises Institute

Politicians in a growing number of local governments are claiming to have created "2nd Amendment Sanctuaries." But, so far they've missed the mark by a wide margin. Contrary to the rhetoric being spread in support of these efforts, virtually none of these jurisdictions have passed laws equivalent to even the most modest immigration "sanctuary city" policy. In fact, most of them aren't passing laws at all.

CNN's resident lunatic Brian Stelter went above and beyond his regular whackery Sunday, wheeling out a 'cult expert' on his "Reliable Sources" show, who claimed that President Trump is a "destructive cult" leader, a la Jim Jones, and that he is using "mind control" to direct supporters.

Dems Sneak PATRIOT Act Renewal Past the American People — Liberty Nation

House Democrats have voted to keep funding the PATRIOT Act in a flurry of partisan hypocrisy. The surveillance legislation that should have every person fearing for their rights and privacy was recently shoehorned through the House, folded into a resolution to keep the federal government funded for three more months. The spending bill was pushed through with not a single Republican vote.

The Minimum Wage Is the Enemy of the Poor — Future of Freedom Foundation

I think most people can see the fallacy of trying to end poverty in this manner. Businesses could not afford to pay all of their workers \$1,000 an hour. If the government were to force them to do so, they would quickly go bankrupt. How does the employer know how much to pay an employee? It is entirely subjective. He subjectively places a value on the employee's work and then decides whether it's worth it to him to pay that amount. The employee does the same thing. He decides whether the amount being offered is worth it to him. If they both agree that the amount is worth it, they enter into the deal.

New Legislation Will Throw People in Jail for Disrespecting Cops—Seriously — The Free Thought Project

...In a vote this week, lawmakers in the Monroe County Legislature passed a proposal in a 17-10 vote to fine and/or jail a person who annoys, alarms or threatens the personal safety of an officer. The jail sentence is up to one year and the fine is up to \$5,000. According to the legislation, the anti-disrespecting applies to all first responders, not just cops.

NY Times admits the real goal of mass immigration is to win elections for Democrats — Natural news

...The New York Times now admits that four to five decades of mass immigration — where about 1.2 million legal immigrants are admitted to the United States every year — has shifted Virginia into a blue state. It's true. Suburbs that were once solid red bastions of Republican strength turned purple then, with elections last week, bright blue. And why? Immigration.

My Socialist Hell: Living in Post-Electricity Venezuela — Breitbart

...The inevitable collapse of our power grid in March 2019 dialed the problems up to eleven and as a result, water distribution has been extremely erratic. Throughout the year, we've suffered through several days without water, sometimes over a week. Nowadays, we're lucky if we get more than 36-48 hours of water per week. The excuses have been as absurd as it gets, from simple "low pressure issues" to "we haven't been authorized to open the valves for that region yet." Power has become relatively stable in Caracas, with sporadic

blackouts and fluctuations in power here and there – this is the capital, after all, the seat of power of this Socialist Revolution, and it must be kept afloat at all costs. Things are even direr and more inhumane outside this city's borders; my father tells me that he only gets water for two days — every three months.

Climate Activists Want to Cancel Thanksgiving to Save the Planet — Liberty Planet

Recently, a number of articles have been published by left-wing outlets like HuffPost encouraging Americans to kick the Thanksgiving tradition for good. Environmentalists begin by whining about how many carbon emissions are produced by growing turkeys. Ironically, turkeys are one of the eco-friendliest animals raised for their meat, but that's not good enough. What's more, people who eat turkey commit other "climate sins" by adding meat byproducts such as butter and cream to the Thanksgiving meal.

Impeachment Frenzy: TV Networks Blast Trump With 96% Negative News — NewsBusters

Overwhelmingly Negative: MRC analysts have reviewed all coverage of President Trump and his administration on the ABC, CBS and NBC evening newscasts since 2017.

45 Population Control Quotes That Show The Elite Are Quite Eager To Reduce The Number Of People On T — TMIN

At one time, the elite at least attempted to conceal their boundless enthusiasm for population control from the general public, but now they aren't even trying to hide it anymore. On Tuesday, an alarming new study that advocates global population control as one of the solutions to the "climate emergency" that we are facing was published in the journal BioScience. This document has already been signed by 11,258 scientists from 153 different countries, and it openly calls for a reduction in the human population of our planet. This has always been the endgame for the climate change cult, but now a big push is being made to make the public believe that there is a "scientific consensus" that this is necessary.

The Ministry of Wiki-Truth — Unz Review

...In the anti-establishment circles I move in, Wikipedia is notorious for this kind of stuff, which is unsurprising when you think about it. It's a perfect platform for manufacturing reality, disseminating pro-establishment propaganda, and damaging people's reputations, which is a rather popular tactic these days. The simple fact is, when you google anything, Wikipedia is usually the first link that comes up. Most people assume that what they read on the platform is basically factual and at least trying to be "objective" ... which a lot of it is, but a lot of it isn't.

When they can take your children away... how free are you? — Sovereign Mann

A 'Red Army of Mediocrities': Our Soviet-Style University System— Thomas DiLorenzo/Lew Rockwell.com

In an April 15 Boston Globe article entitled "A Message to All Professional Thinkers: We Either Hang Together or We Hang Separately," historian Niall Ferguson described the now-

routine “outing” of conservative professors at American Universities by the hard-Left Marxists who control most of them. The usual procedure is to first lie about something the conservative (or libertarian) supposedly said to whip a “Twitter mob” into a hateful frenzy. The local media then pick up on it and pile on. Spineless faculty “colleagues” either cower in fear or join the mob by signing a petition to curry favor with the administration (to increase their chances of another 1 percent pay raise). If the conservative or libertarian professor is not tenured, he or she is fired. Otherwise, he or she is marginalized, harassed, discriminated against, and “encouraged” to leave voluntarily to avoid such a miserable existence. No human resources bureaucrats are ever concerned about “hostile work environments” when it comes to academic conservatives or libertarians; only the Left is to be protected from hostility and “insensitive” speech.

The BBC Thought Police— Gatestone Institute

Celebrated interfaith activist Lord Indarjit Singh has sensationally quit BBC Radio 4 after accusing it of behaving like the “thought police”. He alleges that the corporation tried to prevent him discussing a historical Sikh religious figure who stood up to Muslim oppression -- in case it caused offence to Muslims, despite a lack of complaints. The Sikh peer, who has been a contributor on Radio Four's Thought For The Day programme for more than three decades, is also accusing Radio Four bosses of “prejudice and intolerance” and over-sensitivity in relation to its coverage of Islam, after he says he was “blocked” from discussing the forced conversion of Hindus to Islam, under the Mughal emperors in 17th century India.

The Problem with Elizabeth Warren's Wealth-Tax Plan— Mises

... The first consequence will be the significant expansion of federal authority over the economy. Even if, in theory, the Warren wealth-tax plan targets only the super wealthy at first, this does not mean that the middle-class is exempted from a potential rise in income tax. For Elizabeth Warren to fund all the programs that she wants to implement, taxing the

billionaires — even at a very high level — won't be enough. The middle-class will eventually be forced to contribute to the funding of these programs, which means that the plan, instead of alleviating the wealth gap, will reduce the purchasing power of the middle-class. This means that ordinary citizens will have a hard time saving for their retirement or to invest in business ventures. Moreover, the plan gives the federal government more extensive power and authority over the allocation of resources and the economy as a whole.

Homeschoolers are Educated, Not Indoctrinated— Ron Paul

.... The trend toward allowing students to miss school for political protests is an example of how indoctrination in left-wing ideology and politics has replaced actual education in many government schools. Some teachers may have seen their students' eagerness to show support for authoritarian policies like the "Green New Deal" as confirmation of the teachers' success in convincing students that the "science is settled" regarding climate change. The truth is that science regarding the causes, extent, and effects of climate change is far from settled. But you won't learn that in most government schools.

Merkel Admits German Multiculturalism Has "Utterly Failed"— ZeroHedge

German Chancellor Angela Merkel says her attempt to create a multicultural society has "utterly failed," and that too little had been required of immigrants who refuse to integrate into German culture.

Here's Why 97% Of Congress Get Re-Elected Each Year— ZeroHedge

...We followed the money and found a culture of conflict-of-interest. The confluence of federal money, campaign cash, private employment, investments, prestigious committee appointments, political power, nepotism, and other conflicts are a fact pattern. Furthermore, members of Congress own investment stock in, are employed by, and receive retirement pensions from federal contractors to whom they direct billions of taxpayer dollars.

Dramatic Footage Shows National Spanish Police In Brutal Catalonia Protest Crackdown— ZeroHedge

Increasingly violent protests continue to rage in the Catalonia region of Spain, with unrest bringing Barcelona to a standstill for a second day, after some 500,000 pro-independence marchers converged on the city Friday from other towns and the countryside, following nearly a week of ongoing protests against Monday's supreme court verdict sentencing at least nine Catalan independence leaders to between 9 and 13 years in prison.

ESPN: Quick to Criticize America, Silent on China's Real Human Rights Abuses— Breitbart

Over the last decade, ESPN has been quick to attack America for not being progressive enough on rights for minorities, women, and gays. However, the NBA's flap with the oppressive Chinese government and ESPN's reaction to it, has cast a harsh light on the sports network's lack of credibility on those issues.

Wrongly Convicted Former Rep. Steve Stockman Sentenced to 10 Years in Prison— Townhall.com

Democrats are gloating over the sentencing of former Rep. Steve Stockman (R-Texas) last week. He was ordered to serve 10 years in prison for the vague charges of mail fraud, wire fraud and money laundering. Whenever prosecutors want to get someone who hasn't actually committed a crime, they use those vague but scary sounding charges. He was also ordered to pay \$1,014,718.51 in restitution, to be divided between him and two other co-defendants.

Without encryption, we will lose all privacy. This is our new battleground— Edward Snowden/Via The Guardian

To justify its opposition to encryption, the US government has, as is traditional, invoked the spectre of the web's darkest forces. Without total access to the complete history of every person's activity on Facebook, the government claims it would be unable to investigate terrorists, drug dealers money launderers and the perpetrators of child abuse – bad actors who, in reality, prefer not to plan their crimes on public platforms, especially not on US-based ones that employ some of the most sophisticated automatic filters and reporting methods available.

William Barr Wants to Kill Privacy and Security... 'For the Children'— Liberty Blitzkrieg

U.S. Attorney General William Barr, along with co-conspirators in the UK and Australia, recently wrote a letter to Mark Zuckerberg requesting he not move forward with a plan to implement end-to-end encryption across Facebook's messaging services. A draft of the letter was published earlier this month by BuzzFeed, and it's worth examining in some detail.

While Trump Congratulates Communist China on Its 70th Anniversary, Senate Republicans Condemn It— National Review

Seventy years ago today, Mao Zedong declared the People's Republic of China after his Communist forces had conquered most of the mainland. A decade later, Mao's Great Leap Forward killed perhaps 45 million people. The Communist regime still denies its people freedom of religion, freedom of speech, and has imposed a policy of forced abortion. At the present moment, China has detained something like 1.5 million Uighurs and other Muslim minorities in re-education camps. Its crackdown on Hong Kong escalated this week, when a protester was shot in the chest.

There's Nothing Natural About Socialism — Allen Gindler/The Mises Institute

Social democracy, or democratic socialism, as it has become known in the US, chose a middle path. Evolutionary socialists have not explicitly called for the expropriation of private property, nor they have advocated for the establishment of a totalitarian state. On the contrary, they have been supporting democratic institutions and private enterprises, especially while being in opposition. Their modus operandi is to gradually undermine capitalism from within and portray this process as a natural development of human society.

FBI finds gunman in Dayton, Ohio, rampage was obsessed with violence — Reuters

The gunman who killed his sister and eight other people in Dayton, Ohio, before he was slain by police had a history of violent obsessions and previously mused about committing mass murder, an FBI official said on Tuesday [...And? News stories are leaving out all the other aspects of the Dayton shooter: strong supporter of Democrat presidents, communist and satanist.]

Dayton Shooter Was A Pro-Satan Leftist Who Supported Warren, Sanders, Antifa And Communism — ZeroHedge

...And while the media was eager to quickly expose the El Paso shooter as a right-wing extremist with the implication that he is merely following Trump's belligerent rhetoric, only few details had emerged about the Dayton, Ohio

shooter although we certainly understand why the mainstream media may not have rushed to make these alleged details public - because according to Heavy.com, the Dayton shooter was an Elizabeth Warren (and Bernie Sanders) supporter who advocated for socialism, communism and supported Antifa.

Ex-girlfriend says Dayton shooter heard voices, talked about 'dark, evil things' — Washington Post

During his senior year of high school, Connor Betts seemed to always have caffeine pills in one hand and an energy drink in another. He was unable to sleep, he told his then-girlfriend Lyndsi Doll, because of dark, animal-like shadows that tormented him at night. Seven years after they dated, Doll recalls Betts as a serious and reserved kid who wrestled with hallucinations and menacing voices in his head.

Peter Thiel Slams "Treasonous" Google For Choosing China Over US Military — ZeroHedge

During a talk Sunday at the National Conservatism conference in Washington, Peter Thiel, perhaps the most visible tech entrepreneur to back President Donald Trump, earning the eternal enmity of his fellow Silicon Valley denizens (and necessitating a move to LA), had some harsh words for his one-time friends. The billionaire investor singled out Google for agreeing to work closely with China, trying to get its search engine back into the Chinese market, while deciding to let a US defense

department contract that gave the military access to its artificial intelligence tools lapse.

The Death of Privacy: Government Fearmongers to Read Your Mail — Strat

It is discouraging to note just how the United States has been taking on the attributes of a police state since 9/11. Stories of police raids on people's homes gone wrong are frequently in the news. In one recent incident, a heavily armed SWAT team was sent to a St. Louis county home. The armed officers entered the building without knocking, shot the family dog and forced the family members to kneel on the floor where they were able to watch their pet struggle and then die. The policemen then informed the family that they were there over failure to pay the gas bill. Animal rights groups report that the shooting of pets by police has become routine in many jurisdictions because the officers claim that they feel threatened.

Pelosi Advises Illegal Immigrants on How to Avoid ICE — National Review

"An ICE deportation warrant is not the same as a search warrant. If that is the only document ICE brings to a home raid, agents do not have the legal right to enter a home. If ICE agents don't have a warrant signed by a judge, a person may refuse to open the door and let them in," said Pelosi, reading from prepared remarks at her weekly press conference.

Ann Coulter: How we became the world's suckers on immigration — Ann Coulter/The Hill

...Why would any country make the calculated decision to reward illegal immigration by granting the full privileges of citizenship to the children of illegals or foreign visitors who arrange to have the births take place on its soil? As a matter of fact, “we” didn’t make such a decision. The late Supreme Court Justice William Brennan invented the anchor-baby policy out of whole cloth and snuck it into a footnote of an opinion written in 1982. Yes, this ancient bedrock principle, this essence of “Who We Are,” dates all the way back to the Reagan administration.

Startling Study Reveals Majority Of U.S. Packaged Food Is Ultra-Processed — Study Finds

It’s no secret that many Americans struggle to maintain a healthy weight, but attempting to pin down just one absolute cause for rising U.S. obesity rates has proven difficult. For example, some people say they can’t find the time to regularly exercise, while others may just have an affinity for fast food. Now, a new study out of Northwestern University has identified another contributing factor: the overwhelming majority of packaged foods available in the U.S. in 2018 were ultra-processed and unhealthy.

...There are countless other examples. Pirates of the Caribbean: At World’s End saw half the scenes featuring Chinese pirate captain Sao Feng removed by censors for “vilifying and defacing the Chinese,” the official Xinhua news agency reported in 2007. All of this is reminiscent of another time when Hollywood bent low and bowed before foreign censors. In his book The Collaboration: Hollywood’s Pact with Hitler (2013), Harvard scholar Ben Urwand found that Hollywood studios agreed not to make films that attacked Nazis or that depicted their harsh treatment of Jews. With barely a whimper, studios gave the Nazis veto power over films depicting almost every aspect of Nazi Germany

A Complete List of Alternatives To The Google Search Engine — Arjun Walia/Collective Evolution
 Being a researcher myself, the amount Google has changed over the past 10 years is pretty crazy, and it's not longer a useful neutral search engine as many sources of information have been completely blocked by their algorithms. Here at CE, we don't use Google anymore for pretty well any of our searches. We are also in the process of moving away from any other Google products we use like Gmail. Currently, most of us use DuckDuckGo here at CE.

Free Speech Crisis - Walter Williams/Lew Rockwell.com
 Christian Americans have been hounded for their refusal to cater same-sex weddings. For those who support such attacks, we might ask them whether they would seek prosecution of the owner of a Jewish delicatessen who refused to provide services for a neo-Nazi affair. Should a black catering company be forced to cater a Ku Klux Klan affair? Should the NAACP be forced to open its membership to racist skinheads? Should the Congressional Black Caucus be forced to open its membership to white members of Congress?

Jeffrey Epstein, a Billionaire Friend of Presidents Trump & Clinton, Arrested for Sex Trafficking — Democracy Now

... You then asked me about the charges today. I think what's so interesting about the charges today is that they're the result—the indictments that are going to be unsealed are the result not only of the FBI's work, but of the Public Corruption Unit, which does suggest—and obviously I'm speculating here—that bribery may have been involved. And why that's so important is, for me, who tried to expose this man for what he is back in two thousand and—I was actually reporting it late 2002, the piece ran in 2003—is he has, ever since then, got away. He's been untouchable. His money has somehow bought him the ability to evade justice. And so I'm fascinated by the fact that the Public Corruption Unit has been involved in this investigation, as well as the FBI.

U.S. dream pulls African migrants in record numbers across Latin America — Reuters

Marilyne Tatang, 23, crossed nine borders in two months to reach Mexico from the West African nation of Cameroon, fleeing political violence after police torched her house, she said. She plans to soon take a bus north for four days and then cross a tenth border, into the United States. She is not alone - a record number of fellow Africans are flying to South America and then traversing thousands of miles of highway and a treacherous tropical rainforest to reach the United States. Tatang, who is eight months pregnant, took a raft across a river into Mexico on June 8, a day after Mexico struck a deal with U.S. President Donald Trump to do more to control the biggest flows of migrants heading north to the U.S. border in more than a decade.

Armed Utah teachers practice responding to school shootings — AP

Active shooter training for educators is becoming more common nationwide, and Utah is one of several states that generally allow permit holders to carry guns in public schools. Other states, including Florida and Texas, have programs that allow certain teachers to be armed if they are approved under a set of stipulations. Utah County Sheriff Mike Smith said the popularity of concealed carry permits in Utah makes such trainings even more important. About half the teachers brought their own handguns to the shooting range.

All life essentials will be free. Jobs will fall like manna from heaven. There will be a guaranteed income. Retirement will be secure. You get the impression of government as some magic fairy who bestows goods and services on people without the annoying part of having to forgo income to get them. It's a world without prices, without demands, without cost, a bounty that comes to one and all merely because powerful people legislated it to be so. The power of a piece of paper backed by law!

How the Fed Wrecks the Economy Over and Over Again — Schiff Gold

You simply cannot grasp the economic big-picture without understanding how Federal Reserve monetary policy drives the boom-bust cycle. The effects of all other government policies work within the Fed's monetary framework. Money-printing and interest rate manipulations fuel booms and the inevitable attempt to return to "normalcy" precipitates busts. In simplest terms, easy money blows up bubbles. Bubbles pop and set off a crisis. Rinse. Wash. Repeat.

North Korea has continued to “relentlessly” build its nuclear arsenal, he said. “As a whole, it was more of showbiz and optics rather than serious diplomacy,” Chun said of the surprise DMZ summit. “I will judge the outcome on the basis of how the meeting translates into North Korea’s freeze of fissile material production and reduction in nuclear capabilities.”

It's No Bitcoin: Facebook's Libra Currency Is Tied to Government Currencies — The Mises Institute

... and here is the rub, the Libra is not a naturally limited good, as Bitcoin is, but can be multiplied to infinity. It is not stabilized by reference to a basket of commodities as Hayek recommended. Rather, it will be defined by a changeable basket of fiat currencies! That’s right. Facebook and Libra’s cooperating founding organizations (including PayPal, Visa, Uber ...) hope to provide a stable cryptocurrency by tying it to a group of government currencies

NSA Caught Illegally Collecting Americans' Phone Data...Again — SHTF Plan

According to RT, the government spy agency unlawfully gathered a “larger than expected” volume of call and text records from one United States telecom provider under the metadata-collection program known as Section 215. According to a document obtained by the American Civil Liberties Union (ACLU) as part of its ongoing lawsuit against the agency, the heavily redacted file does not reveal which company was affected, or how many of its “call detail records” were illegally collected between October 3 and 12, 2018.

Christians In Africa: "You Have Three Days To Go Or You Will Be Killed!" — Gatestone Institute

Some say it began in Algeria in the 1990s, when 19 monks, bishops, nuns and other Catholics were killed during the civil war. Since then, in Nigeria, Christian faithful have been massacred in their churches; in Kenya, Christians have been killed in universities; in Libya, Christians have been beheaded on beaches; in Yemen, nuns have been assassinated and in Egypt, massive anti-Christian violence is prompting an exodus. It is the new African archipelago of persecution. Distressingly, these Christians have been finding themselves in the blind spot of the West: they are “too Christian” to get the Left’s attention, but too far away for the Right. Africa’s Christians are orphans. They have no “allies”, John O’Sullivan writes.

Orwell's 1984 No Longer Reads Like Fiction: It's The Reality Of Our Times — rt.com

70 years ago, the British writer George Orwell captured the essence of technology in its ability to shape our destinies in his seminal work, 1984. The tragedy of our times is that we have failed to heed his warning.

Hypocrisy At The Border: Trump Villified For Obama's Immigration Policy — ZeroHedge

If “caging kids” was okay for Obama, what makes it inhumane for Trump? Now that the first round of Democratic debates are out of the way, it’s time to hammer down on the left’s constant caterwauling about the president’s immigration policies and caging of kids. The relentless barrage of insults aimed at Donald Trump for his cruelty and inhumane actions towards illegal aliens, families, and children is reminiscent of rabid wolves looking for their next victim. They are so far out of their minds with Trump Derangement Syndrome they can’t see the truth: These heinous tactics and policies were instituted before the Trump administration.

Twitter Wants To Make Sure We NEVER Have Another President Like Trump — Michael Snyder/End of the American Dream

...They started by deleting, shadowbanning and greatly suppressing the accounts of prominent conservatives. Personally, my own account has been shadowbanned for a very long time. I have over 16,000 followers, but if you check out my account you will notice that I barely get any retweets at all these days. However, a few years ago there was a ton of interaction with my tweets. An expert looked into it and found that just like so many other prominent conservatives, I had been shadowbanned. But all of the censorship that we have seen so far is apparently not enough for the control freaks at Twitter, and so now they are going after President Trump himself.

SABOTAGE: DHS Secretary Kevin McAleenan Accused of Leaking Info on ICE Raids, Putting His Own Agents — The Gateway Pundit

Acting Homeland Security Secretary Kevin McAleenan was accused of putting his own agents in danger by leaking details about the massive Immigration and Customs Enforcement operation to the media in order to sabotage it.

Supreme Court Overturns Precedent In Property Rights Case — A Sign Of Things To Come? — NPR

The 5-4 decision overturned decades of precedent that barred property owners from going to federal court until their claims had been denied in state court. Federal courts are often viewed as friendlier than state courts for such property claims. The decision, with all five of the court’s conservatives in the majority, may have particular effects in cities and coastal areas that have strict regulations for development.

MSM Silent After Google Election Meddling Bombshell; Video Scrubbed From YouTube — ZeroHedge

As noted by Infowars' Jamie White, "CNN, WaPo, CNBC, HuffPost, The New York Times, Vox, Vice, Newsweek, Politico, and even The Daily Beast haven't written a single piece on the devastating evidence." Meanwhile, YouTube parent Google has scrubbed the video from its video sharing platform (also ignored by the MSM).

Google Just Scrubbed Natural Health Websites From Its Search Results; Whistleblower Explains How and Why

— Activist Post

Earlier this month, in one devastating algorithmic stroke, Google removed many of the top natural health and health freedom websites from their organic search results — some losing as much as 90% of their traffic. In fact, the term “organic” should no longer be used to describe Google’s referral traffic, as a jaw-dropping undercover investigation by Project Veritas reveals: Google surreptitiously manipulates its search results and auto-suggestions to conform to a very specific set of sociopolitical and economic agendas intended to manipulate elections and promote private interests.

Google Buries Mercola in Their Latest Search Engine Update — Dr. Joseph Mercola/Lew Rockwell.com

... This year, we’ve seen an unprecedented push to implement censorship across all online platforms, making it increasingly difficult to obtain and share crucial information about health topics. If you’ve been having difficulty finding articles from my website in your Google searches of late, you’re not alone. Google traffic to Mercola.com has plummeted by about 99% over the past few weeks. The reason? Google’s June 2019 broad core update, which took effect June 3, removed most Mercola.com pages from its search results

Supreme Court rules against Trump over census citizenship question — The Hill

...Chief Justice John Roberts joined with the court’s liberal wing in delivering the court’s opinion. Roberts wrote “that the decision to reinstate a citizenship question cannot be adequately explained in terms of [the Department of Justice’s] request for improved citizenship data to better enforce the VRA.”

African migrants raft cross Mexico border — with no National Guard in sight — American Mirror

“Just watched 2 groups of Africans from Congo and Angola cross illegally into Mexico from Guatemala across the Suchiate River on tube rafts,” The Epoch Times’ Charlotte Cuthbertson posted along with a video on Twitter. “8 men, 4 women, 6 kids.” The video captured a typical morning along the river, with smugglers using push poles and inner tubes fastened together with rope and plywood to escort groups of migrants across. The makeshift ferry service continues to run “all day long between the two countries,” Cuthbertson reports, with goods like coffee and black market Corona crossing back into Guatemala.

Robert F. Kennedy Jr., 120 others at Statehouse blast vaccinations — Columbus Dispatch

About 120 activists, many of them wearing red, listened in the atrium as a panel of speakers described the ways they believe regulators and pharmaceutical companies are hiding the truth about damage caused by vaccines. The anti-vaccine event’s headliner was Robert F. Kennedy Jr., the founder of Children’s Health Defense who has become the celebrity face of the national anti-vaccine movement. “We have the most aggressive vaccine schedule in the world, and we have the sickest children in the developed world,” Kennedy said at the event, chastising pharmaceutical companies, regulators and lawmakers. Rep. Ron Hood, R-Ashville, is sponsoring a bill that would prevent employers from taking adverse action against workers who refuse to be vaccinated for medical reasons or “reasons of conscience,” including religious beliefs.

Backdoor Sharia Law? Lawmakers Aim to Define “Islam” as a Race — The New American

Now some British lawmakers and activists want to transition Islam into a race. “It’s a backdoor approach toward enforcing Islamic blasphemy laws,” writes one commentator — using the “Islamophobia” label as cover. As the Gatestone Institute’s Soeren Kern reports: Days after the British government rejected its preferred official definition of Islamophobia, the Muslim Council of Britain, the biggest Islamic organization in Britain, called for the ruling Conservative Party to be officially investigated for Islamophobia.

Truth About Bilderberg - Behind The Deep State — The New American

In this episode of Behind the Deep State, Alex Newman exposes the Bilderberg group, a semi-secret society of powerful globalists and useful idiots who meet annually to advance their agenda.

Clint Eastwood to Film New Movie in Georgia Despite Hollywood Boycott Over 'Heartbeat Bill' — CNS News

Despite the boycott of filming in Georgia launched by Hollywood liberals angry over the state's new pro-life "Heartbeat" law, legendary actor/director Clint Eastwood will be making his latest movie, "The Battle of Richard Jewell," in Atlanta this summer, reported NBC Charlotte and other media. "Clint Eastwood will perform new film in Georgia despite abortion bill boycott," tweeted NBC Charlotte on June 25. The movie is about Richard Jewell, a police officer and security guard who discovered a bomb at the 1996 Summer Olympics in Atlanta, Ga., and saved countless lives. Jewell was initially hailed as a hero and then was viewed as a suspect.

Reparations for Slavery — Walter Williams/The New American

...Let's pretend for a moment that the reparations issue makes a modicum of sense. There's the question of responsibility. More explicitly, should we compensate a black person of today by punishing a white person of today, by taking his money, for what a white person of yesteryear did to a black person of yesteryear? If we believe in individual accountability, we should find that doing so is unjust. In other words, are the tens millions of Europeans, Asian and Latin Americans who immigrated to the U.S. in the late 19th and 20th centuries responsible

for slavery, and should they be forced to cough up reparations? What about descendants of Northern whites who fought and died in the name of freeing slaves? Should they pay reparations to black Americans? What about non-slave-owning Southern whites — who were a majority of Southern whites — should their descendants be made to pay reparations?

Austrian Economics Is No Longer The Unheard Music — The Mises Institute

...Largely shut out of university economics departments after the Keynesian revolution of the 30s and 40s, brilliant Austrians like Mises and Hayek had to find audiences and funding where they could. Organizations like the Volker Fund and businessmen like Leonard Read made it possible for Mises and Rothbard to survive financially while producing books we cannot imagine not having today. Benefactors like Henry Hazlitt brought Austrian ideas to the public in the pages of The New York Times and Newsweek. Popular authors like Ayn Rand provided an intellectual defense of capitalism and publicly praised Mises's Human Action. DIY Austrians worked their way into the edges of academia, started and published their own journals, and did end runs around the gatekeepers to reach wider audiences. And slowly, over time, they succeeded.

'Family March' in Haifa is set to counter gay pride parade — Jerusalem Post

According to the organizers of the event, the march is an initiative by both religious and secular citizens who wish to stress the importance of the traditional family values. "We received massive support from everyone," said one of the event organizers. "Religious, secular, new olim and old citizens alike all supported us. A citizen who made aliyah from Russia translated the pamphlet to Russian and distributed it among his friends, the support was tremendous." Meanwhile, Facebook closed the page calling for people to join the march. "We are being fought on all possible fronts," commented Attorney Na'ama Sela, one of the event organizers.

Military's mission doesn't include enforcement, so smugglers cross Rio Grande right in front of them — Conservative Review

Does the United States military exist only to defend the borders of foreign countries in the Middle East or is it allowed to defend the borders of the U.S. against terrorist cartels, espionage, infiltrations, and smuggling? It might sound like an uncanny question given that our military was likely created exclusively to defend our own borders, but, according to one Homeland Security official I spoke to, the White House is still convinced that our own military cannot be used for what one would think of as the quintessential purpose of its existence.

California's New Sex-ed Regime Is Worse Than You Can Imagine — The New American

Over one in four California children ages 12 through 17 now identifies as "gender non-conforming," according to a recent study by the University of California, Los Angeles (UCLA). In other words, more than a fourth of the state's boys do not accept the fact that they are male, and similar numbers of girls refuse to accept being female. But if policymakers in the Golden State get their way, this is only the beginning of another revolution that will make the "Sexual Revolution" seem tame by comparison. And they are getting their way — and then some. In early May, the state's Board of Education approved a new "Health Education Framework" for kindergarten through 12th grade that should shock even the most liberal and "progressive" parents. From teaching children that there are infinite genders, to how-to manuals on sexual perversions so dangerous and obscene they cannot be described here, there seem to be no moral boundaries or taboos that are not being deliberately broken.

Insider Blows Whistle & Exec Reveals Google Plan to Prevent "Trump situation" in 2020 on Hidden Cam — Project Veritas

...Jen Gennai is the head of "Responsible Innovation" for Google, a sector that monitors and evaluates the responsible implementation of Artificial Intelligence (AI) technologies. In the video, Gennai says Google has been working diligently to "prevent" the results of the 2016 election from repeating in 2020: "We all got screwed over in 2016, again it wasn't just us, it was, the people got screwed over, the news media got screwed over, like, everybody got screwed over so we're rapidly been like, what happened there and how do we prevent it from happening again." "We're also training our algorithms, like, if 2016 happened again, would we have, would the outcome be different?"

BLACKLIST: MSM Ignores Project Veritas Bombshell Google Exposé — InfoWars

The liberal corporate media has totally ignored the explosive Google exposé by Project Veritas revealing systemic efforts by the tech company to prevent President Trump from getting reelected in 2020. CNN, WaPo, CNBC, HuffPost, The New York Times, Vox, Vice, Newsweek, Politico, and even The Daily Beast haven't written a single piece on the devastating evidence presented by a Google whistleblower and undercover footage of a Google executive discussing how to algorithmically manipulate the 2020 presidential election.

Tampering Past The Tipping Point — Real Climate Science

Yet another round of spectacular data tampering by NASA and NOAA. cooling the past and warming the present. Going back further, in 1990, the IPCC showed that earth was much warmer 800 years ago, when CO2 was 280 PPM during the Medieval Warm Period.

Sanders, liberals, out with bill to cancel student debt — AP
Days before the first Democratic presidential debates, Sen. Bernie Sanders and House progressives rolled out legislation to cancel all student debt, going farther than a signature proposal by Sen. Elizabeth Warren as the two jockey for support from the party's liberal base .

Beto Pushes "War Tax" For Non-Military Households — ZeroHedge

In order to improve healthcare for veterans (an undoubtedly needed policy change), the 2020-hopeful is proposing a "war tax" on American households without military service members or veterans. As The Texas Tribune reports, the war tax would be a progressive tax on adjusted gross income. The tax would range from \$25 for those making less than \$30,000 per year to \$1,000 for those earning over \$200,000 every year

Deepfake Technology Can Put Words In Anyone's Mouth – Even Yours — ZeroHedge

A new algorithm allows video editors to modify talking head videos as if they were editing text – copying, pasting, or adding and deleting words. A team of researchers from Stanford University, Max Planck Institute for Informatics, Princeton University and Adobe Research created such an algorithm for editing talking-head videos – videos showing speakers from the shoulders up. (source) The possible consequences of this technology are horrifying to ponder, but Melissa Dykes of Truthstream Media did just that in this chilling video.

Amazon Patents Creepy Drone Technology To Spy On Your Home — ZeroHedge

A network of delivery drones would film Amazon customers' homes from the skies while on their way to delivering packages. Artificial intelligence will observe the property for anything unusual during the flyover, such as broken windows, doors left open, and unauthorized people on the property. Customers can request security flyovers hourly, daily, or weekly, the patent said.

Pelosi's Double-standard on Need for Congressional Authorization for War — The New American

...But what has been Pelosi's record on military actions conducted by Democratic presidents? In what could be

viewed as a hypocritical stance, Pelosi supported President Barack Obama's use of military force in Libya back in 2011. At the time she was the House Minority Leader, and said that while she is "very protective of congressional prerogative" regarding military action, she believed that Obama did not need congressional authorization to take action against Libya, and furthermore, he did not need it to continue military action in Libya.

Don't Trust the Polls, Say Numerous Experienced Political Observers — The New American

A number of prominent political commentators, not all from the Right, are ignoring recent polls showing President Donald Trump losing — if the election were held today — to any number of socialist Democrats currently vying for their party's nomination. Some of them hail from outside the United States, giving them both a perspective not available from the national mainstream media and protection from that same media for going off-script in their predictions that Trump will win reelection, perhaps decisively, in 2020.

Google Chrome has become surveillance software. It's time to switch. — Silicon Valley

Over a recent week of web surfing, I peered under the hood of Google Chrome and found it brought along a few thousand friends. Shopping, news and even government sites quietly tagged my browser to let ad and data companies ride shotgun while I clicked around the web. This was made possible by the web's biggest snoop of all: Google. Seen from the inside, its Chrome browser looks a lot like surveillance software.

(note: Joel Skousen in his 7/12/19 World Affairs Brief says he uses the Avast secure browser.)

Grandmother, 75, Holds Car Theft Suspect At Gunpoint Until Deputies Arrive — CBS Local

...When Powers inched closer to her home, Black reacted because two of her grandchildren were inside watching after calling 911. "He wouldn't get down, so I shot in the air, and he realized I meant business, so he got down on his knees," Black said. It wasn't long after when deputies arrived.

Supreme Court upholds cross on public land in Maryland — AP

The justices said preserving a long-standing religious monument is very different from allowing the building of a new one. And the court concluded that the nearly 100-year-old memorial's presence on a grassy highway median doesn't violate the Constitution's prohibition on the government favoring one religion over others. Seven of the court's nine justices sided with the cross' backers, a lineup that crossed ideological lines.

A Satanic Temple member who won the right to open a regional Alaska government meeting declared “Hail Satan” during her first invocation, prompting about a dozen officials and attendees to walk out.

Powerlifting Organization Defends Ban on Biological Males Competing Against Women — The New American

...Female athletes are becoming increasingly upset over the decisions by many athletic organizations to allow biological males, who have or are in the process of transitioning to female, to compete in female events. Whether it's Cooper's attempt to dominate female powerlifting or Connecticut high-school girls being unfairly paired against biologically male athletes in track, the PC culture has gotten out of hand when it accepts this type of unfairness. And women are the ultimate victims of this nonsense.

Biden: “First thing I would do as President is Eliminate the President’s Tax Cut.” — Americans for Tax Reform

Biden's promise to repeal the tax cuts is a promise to raise taxes. If the tax cuts were repealed: A family of four earning the median income of \$73,000 would see a \$2,000 tax increase. A single parent (with one child) making \$41,000 would see a \$1,300 tax increase. Millions of low and middle-income households would be stuck paying the Obamacare individual mandate tax.

California vaccine bill amended to allow more exemptions, win Gavin Newsom's support — Sacramento Bee

... The bill would still require doctors to file a standardized form to obtain a medical exemption, and the law would hold doctors liable to perjury if the information is not “true, accurate and complete.” But the California Department of Public Health would no longer be required to create and maintain a separate database that tracks which doctors issue exemptions and for what reasons. Instead, the bill uses the existing California Immunization Registry to track the exemptions and school vaccination rates data.

World's population is projected to nearly stop growing by the end of the century — Pew Research

...Africa is the only world region projected to have strong population growth for the rest of this century. Between 2020 and 2100, Africa's population is expected to increase from 1.3 billion to 4.3 billion. Projections show these gains will come mostly in sub-Saharan Africa, which is expected to more than triple in population by 2100. The regions that include the United States and Canada (Northern America) and Australia and New Zealand (Oceania) are projected to grow throughout the rest of the century, too, but at slower

rates than Africa. (This analysis uses regional classifications from the UN and may differ from other Pew Research Center reports.)

City of Secrets: Estimated 10,000 people in DC are spies — Washington's Top

... The archetypal international spy in Washington for many years has been undercover diplomats and foreign intelligence agency assets. There are more than 175 foreign embassies, residences, chanceries and diplomatic missions in D.C. Tens of thousands of international students reside in the region. And untold numbers of business people with links to foreign intelligence services flow in and out every day.

China Killing Prisoners To Harvest Organs For Transplant, Tribunal Finds — Forbes

The China Tribunal concluded that "forced organ harvesting has been committed for years throughout China on a significant scale, [and] the tribunal has had no evidence that the significant infrastructure associated with China's transplantation industry has been dismantled and absent a satisfactory explanation as to the source of readily available organs concludes that forced organ harvesting continues till today." Central to the tribunal's findings were estimates of the actual number of transplants taking place—far higher than official statistics, implausibly short waiting times and first-hand testimony from former detainees. Some of the organ extractions were said to have been conducted on live victims who were killed during their procedures.

Remembering Tiananmen Square and Communist Rule in China — John F. McManus/The New American

... Some commentators believe that the peaceful youth-led protests in the spring of 1989 might actually have led to mass defections of police and military personnel and a change in China's government. Whether the idealistic youngsters posed a real threat to Communist rule is hard to know. But their courage and determination ended during the notorious June 3-4, 1989 crackdown known as the Tiananmen Square Massacre. Army tanks followed by highly trained troops using machine guns stormed into the youthful crowds killing hundreds and maybe thousands. An immediate clampdown on reports about the carnage ensued. Even 30 years later, few details about what occurred and how many unarmed youngsters died have come to light.

China's President Xi Jinping to Make First State Visit to North Korea — WSJ

...The two-day visit, which begins Thursday, would be the first by a Chinese leader to its neighbor and communist ally in 14 years. Announced by Beijing on Monday, the trip falls just ahead of the Group of 20 summit in Japan next week which Mr. Xi and President Trump will attend, providing a chance for them to discuss tensions that are centered on trade but have spilled over to encompass technology and a wider rivalry between the two countries. By scheduling a summit with North Korean leader Kim Jong Un before a potential sit-down with Mr. Trump, the

Chinese leader appears to be highlighting China's influence with North Korea and the vital role Beijing could play in pressuring Pyongyang to eliminate its nuclear programs, regional security experts said.

You Will be Absorbed: British Thought Police Ban Ads With "Gender Stereotypes" — The New American

...Providing further detail, the AFP writes, "Harmful gender stereotypes in ads can contribute to inequality in society, with costs for all of us," ASA chief executive Guy Parker said in a statement. "Nonsense. 'Inequality,' per se, doesn't cost society, a good thing since there's no such thing as equality in society. What does have consequences is a lack of quality, as I've explained before. And as elusive equality is emphasized, quality is de-emphasized. Imparting more wisdom, Parker also stated, "Put simply, we found that some portrayals in ads can, over time, play a part in limiting people's potential," the AFP also relates.

Bernie Plagiarizes Stalin With 'Economic Bill Of Rights' — Breitbart

.... A Bill of Rights that establishes once and for all that every American, regardless of his or her income is entitled to: The right to a decent job that pays a living wage The right to quality health care The right to a complete education The right to affordable housing The right to a clean environment The right to a secure retirement These six "rights," which define Sanders' platform, are indistinguishable from the rights identified in the 1936 Soviet Constitution, which is also known as the Stalin Constitution.

New York ends religious exemption to vaccine mandates — AP

New York eliminated the religious exemption to vaccine requirements for schoolchildren Thursday, as the nation's worst measles outbreak in decades prompts states to reconsider giving parents ways to opt out of immunization rules. The Democrat-led Senate and Assembly voted Thursday to repeal the exemption, which allows parents to cite religious beliefs to forego getting their child the vaccines required for school enrollment.

Hong Kongers alarmed by Google translation gaffe — AFP

Eagle-eyed Google users discovered that when people entered the phrase "I am sad to see Hong Kong become part of China" the suggested translation in both Simplified and Traditional Chinese converted the word "sad" to "happy". "Oh my god, I can't believe my eyes," one Facebook user commented under one of the many screen grabs of the false translation that went viral on Friday.

Facebook's Process to Label You a 'Hate Agent' Revealed — Breitbart

... Those signals include a wide range of on- and off-platform behavior. If you praise the wrong individual, interview them, or appear at events alongside them, Facebook may categorize you as a "hate agent." Facebook may also categorize you as a hate agent if you self-identify with or advocate for a "Designated Hateful Ideology," if

you associate with a "Designated Hate Entity" (one of the examples cited by Facebook as a "hate entity" includes Islam critic Tommy Robinson), or if you have "tattoos of hate symbols or hate slogans." (The document cites no examples of these, but the media and "anti-racism" advocacy groups increasingly label innocuous items as "hate symbols," including a cartoon frog and the "OK" hand sign.)

Russia and China's Alliance of Convenience — Geopolitical Futures

China and Russia conducted a six-day military exercise last week. The exercise simulated attacks on both countries from ballistic and cruise missiles. The Chinese Ministry of Defense declined to identify which country was the simulated aggressor in the exercise, but it's not hard to figure out that it was the United States. A few days into the exercise, the Trump administration published its National Security Strategy. The document is 68 pages long, but one line in particular from the second page has been quoted endlessly in the media: "China and Russia challenge American power, influence, and interests." These two developments raise the same question: Is a Sino-Russian alliance emerging?

NSA Gave Israel Access to All US Citizens' Communications Data, Leaked Documents Show — Russia Insider

Frustrated by a legal ban on sharing intelligence with Israeli operatives conducting targeted assassinations against Hezbollah, the NSA crafted a loophole giving them total access even to US citizens' data, leaked documents show. The Israeli SIGINT National Unit (ISNU), the NSA's counterpart in Tel Aviv, convinced the Americans to circumvent the legal prohibition on providing surveillance data for targeted assassinations during Israel's 2006 war with Lebanon, according to the newest revelation from the archives obtained by whistleblower Edward Snowden.

I'm a Martin Luther King scholar — and I'll never be able to see King in the same light (FBI releases memos of King) — Business Insider

In an 8,000-word article published in the British periodical Standpoint Magazine on May 30, Garrow details the contents of FBI memos he discovered after spending weeks sifting through more than 54,000 documents located on the National Archive's website. Initially sealed by court order until 2027, the documents ended up being made available in recent months through the President John F. Kennedy Assassination Records Collection Act of 1992. The most damaging memos describe King witnessing a rape in a hotel room. Instead of stopping it, handwritten notes in the file say he encouraged the attacker to continue. King was once thought of as a saint beyond reproach. After his death, it eventually emerged that he was a womanizer.

Citizens Give New Zealand's Gun Ban The Finger - Only 530 of 300,000 People Turned Guns In — The Freedom Outpost

In March, New Zealand Prime Minister Jacinda Ardern announced the "first tranche" in a number of moves to

restrict the rights of New Zealand citizens to protect themselves with firearms. This move was in direct response to the horrific murders that unfolded on March 15. Coincidentally, this is the exact move the terrorist who carried out these attacks had hoped for and predicted. The good news is, however, that most citizens are refusing to turn in their guns.

Twitter Suspends Project Veritas Over Revelation of Pinterest Documents Revealing Bias — The New American
Project Veritas, the investigative journalist organization famous for documenting the nefarious doings of Planned Parenthood, ACORN, and others, has become the latest victim of big tech's new censorship agenda. James O'Keefe, the head of Project Veritas, announced the organization's suspension from Twitter in a tweet on his personal account.

Cartoon Network Promotes LGBT 'Pride' to Children — The New American

...Also in May, The New American reported that the popular PBS children's animated series Arthur had introduced the homosexual agenda into its storyline by featuring the same-sex "marriage" of longtime character Mr. Ratburn, a rat, to his aardvark "partner" Patrick. On the air for over 20 years, the daily PBS cartoon show targets four- to eight-year-old children, often dealing with sensitive issues such as cancer, diabetes, dyslexia — and now the homosexual lifestyle.

U.S. Cities Overwhelmed With Numbers of Illegal Migrants Arriving From Ebola-Stricken Countries — InfoWars

Some U.S. cities are becoming overwhelmed with the number of illegal African migrants arriving from Ebola-stricken countries, with Portland, Maine, complaining that they are beyond capacity. Large groups of migrants are arriving from the Democratic Republic of the Congo, which has been hit by one of the biggest ebola outbreaks in history, with 2,000 recorded cases in the last 10 months.

Cheerios, Nature Valley cereals contain Roundup ingredient, study finds — CBS News

21 oat-based cereal and snack products such as Cheerios tested positive for traces of glyphosate. The chemical is the active ingredient in Roundup, which has been at the center of several trials alleging the weedkiller causes cancer. All but four of the products tested had glyphosate levels higher than what an environmental group considers safe for children.

American Medical Association: Let minors override parents' vaccination refusal — Chicago Tribune

Members of the American Medical Association voted this week to support state policies that would allow minors to override their parents' objections to vaccinations. Moving forward, the AMA will encourage state lawmakers to institute comprehensive vaccine and minor consent policies, according to a news release. The policy recommendation came Monday during the group's annual meeting in Chicago.

Obama Admin Purged 12 Years Of ICE Speeches On Immigration Crisis Hours Before Trump Inauguration — ZeroHedge

... The Caller notes that speeches from former acting ICE Director Thomas Homan were "prominently included in the deletion list," including a February 2016 speech in front of the Senate Judiciary Committee in which Homan discussed that "Unaccompanied Minor Crisis," which the Obama administration was grappling to manage at the southern border. Another example cited by the Caller was a transcript from May 2016 in which Homan explained why sanctuary cities (and counties, and states) put "the public at risk," according to the report.

Christophobia: Colorado Baker Sued for THIRD Time for Acting Christian — The New American

They just can't stop bullying the baker. First the Colorado Civil Rights Commission took legal action against Jack Phillips in 2012 for refusing to create a faux (same sex) "wedding" cake. After losing in the Supreme Court last summer, the state sued Phillips (shown) for declining to bake a cake celebrating a man's transition from superficially normal to masquerading as female (what some call "transgender"). Now that Colorado has been compelled to drop that action, the masquerading man, an attorney going by the name Autumn Scardina, has filed his own suit against the baker. For sure, persecution is a full-time job. Of course, it's no accident that Phillips, owner of Masterpiece Cakeshop, was targeted. It's part of what I've called a "pacification process," where the Left is following its culture-war victories with an effort to stamp out remaining dissent.

Vatican Takes Stand Against Notion of Gender Spectrum in Newly Released Statement — The New American

It does not take a degree in biology to understand that there exist just two sexes/genders, but that has not stopped the social-justice warriors from their tirade against the irrefutable science that gender fluidity is a symptom of a mental health crisis. Now the Vatican has weighed in on

the subject with a statement that slams gender theory and the notion of gender spectrum.

Nuclear stalemate one year after Trump-Kim summit: analysts — AFP

...The process remains deadlocked and analysts say the two sides have sobered up since. "Immediately after the Singapore summit, we had a tidal wave of completely unrealistic, almost comical expectations," said Andrei Lankov, a professor at Kookmin University in Seoul. "Then it became clear what has been obvious – the North Koreans are not going to surrender nuclear weapons," Lankov told AFP.

Climate Hysterics Use Tragic Weather to Push Agenda: "We Owe Al Gore an Apology" (instead, we see a chain of failed prophecies from Gore regarding climate) — The New American

... Through the years, Gore has warned us of several environmental catastrophes that simply didn't come to pass. To my knowledge, he has never apologized for being categorically wrong on his many predictions. In 2006, Gore claimed that we had only 10 years to save the planet. That deadline has come and gone, and we're still here. In October of 2018, the UNIPCC issued a new deadline. Now we have 11-and-a-half years left to save the planet. Gore claimed that the Arctic would be ice-free by the year 2014. He was not only wrong but spectacularly wrong. Gore predicted that the flow of the Gulf Stream would slow down and lead to climate catastrophe. Gore was wrong again. In fact, data from NASA shows that the Gulf Stream may actually be speeding up. Gore owes the world a double apology for this prediction. Not only was he wrong, but this prediction was part of the plot for the ridiculous Hollywood film *The Day After Tomorrow*.

Globalist Elites Approve of China's Censorship — The New American

Senior editor Williams F. Jasper joins Top Headline to discuss current state of China 30 years after the Tiananmen Square massacre in 1989. Jasper comments on how citizens of China are being kept in the dark by their own government regarding the truth of the day where they slain thousands of their own citizens. Jasper also adds how many of the elites of the world have gotten very cozy with China and have even begun to adopt their practices.

Men in Women's Sports? Poll Shows People Don't Buy the Trans Hype — The New American

... Of course, it's a tribute to propaganda's power and moderns' general dislocation from reality that 28 percent of Americans suppose that biology is negotiable, and that a plurality of Democrats support the policy in question illustrates the intellectual and moral rot now typifying their party. Nonetheless, as perusing Internet comments sections will also inform, the MUSS agenda does not enjoy the widespread support the media, academia, entertainment, and big business could lead one to believe. But that doesn't stop the Democrats from pushing bizarre legislation such as "the Orwellian-labeled 'Equality Act' [which] just passed the House of Representatives with eight GOP votes and would compel people to accept the claims of transgenders in bathrooms, sports, and employment," writes American Thinker.

Sweeping plans from 2020 contenders come with trillion-dollar price tags — The Hill

...Washington Gov. Jay Inslee's "Global Climate Mobilization" plan, hailed by environmental activists as the gold standard, would cost the U.S. government \$3 trillion over the next decade. Sen. Elizabeth Warren's (Mass.) proposal to eliminate tuition at public colleges and erase existing student debt carries a \$1.25 trillion price tag. And Sen. Bernie Sanders's (I-Vt.) "Medicare for All" bill, co-sponsored by four other 2020 Democrats, would require \$32 trillion in government spending, according to one study.

A Dangerous Time To Be Christian — The New American

... Not only are Christians more persecuted than any other faith group, but ever-increasing numbers are experiencing the very worst forms of persecution, according to the authors of a study by Aid to the Church in Need. "There is a war being waged against the world's Christians and unfortunately American Christians have been lulled or shamed into silence while secular and progressive voices in media and our own government have sought to keep us in the dark about the brutal, worldwide war being waged against Christianity in a growing and record number of countries," Dede Laugesen, executive director of Save the Persecuted Christians (STPC) coalition, said at the recent National Religious Broadcasters "Proclaim 19" convention in Anaheim, California.

Orwell's classic '1984' turns 70 amid enduring interest — AFP

eventy years after its publication, George Orwell's classic dystopian novel "1984" continues to fascinate readers, in particular youngsters growing up in a social media-dominated age of increasing angst. "Some students are very shocked by it, and remain shocked by it," said Michael Callanan, an English teacher and director of the Orwell Youth Prize, which supports political expression amongst young people. "It is part of the paradox of a book being 70-years-old," he added. "I think they were taken aback by how fresh and how true to our lives today it strangely is."

IRS Created "Special Project Team" of "Hundreds of Lawyers" to Hide Information from Congress — ACLJ
New testimony reveals that the Internal Revenue Service (IRS) used "hundreds of attorneys" to hide critical information from Congress's investigation of the IRS targeting of conservatives. According to new congressional bombshell testimony today, the IRS set up a previously unknown "special project team" comprised of "hundreds of attorneys," including the IRS Chief Counsel (one of only two politically appointed positions at the IRS). The "special project" this team was given? Concealing information from Congress.

Did a Vaccine Experiment on U.S. Soldiers Cause the "Spanish Flu"? — Vaccine Impact

The reason modern technology has not been able to pinpoint the killer influenza strain from this pandemic is because influenza was not the killer. More soldiers died during WWI from disease than from bullets. The pandemic was not flu. An estimated 95% (or higher) of the deaths were caused by bacterial pneumonia, not influenza/a virus. The pandemic was not Spanish. The first cases of bacterial pneumonia in 1918 trace back to a military base in Fort Riley, Kansas. From January 21 – June 4, 1918, an experimental bacterial meningitis vaccine cultured in horses by the Rockefeller Institute for Medical Research in New York was injected into soldiers at Fort Riley. During the remainder of 1918 as those soldiers – often living and traveling under poor sanitary conditions – were sent to Europe to fight, they spread bacteria at every stop between Kansas and the frontline trenches in France. One study describes soldiers "with active infections (who) were aerosolizing the bacteria that colonized their noses

and throats, while others—often, in the same "breathing spaces"—were profoundly susceptible to invasion of and rapid spread through their lungs by their own or others' colonizing bacteria." (1)

Data: Average of 124K Anchor Babies Born in U.S. This Year So Far — Breitbart

...In the first five months of 2019, about 124,000 children of illegal aliens were born on U.S. soil, thus solidifying their permanent American citizenship due to the nation's birthright citizenship policy. The total derives from a Center for Immigration Studies (CIS) analysis of Census Bureau data, which reveals that, on average, about 300,000 anchor babies are born in the country every year, with nearly 25,000 anchor babies born every month.

TSA allowing illegal migrants to fly without proper documents — Washington Examiner

The federal agency tasked with overseeing security at transportation hubs has been violating its own policy by allowing migrants who have been released from federal custody onto flights despite not having required documents, according to several Department of Homeland Security officials. For the past six months, the Transportation Security Administration has allowed migrants released from the custody of other Homeland Security agencies to board flights to other parts of the country despite the passengers lacking any of the 15 documents it states are the only acceptable forms of identification.

Dem 2020 Candidate Boomed for Denouncing Socialism — The New American

While addressing the California Democratic Party State Organizing Convention in San Francisco on Saturday night, former Colorado governor John Hickenlooper said something eminently sensible: "If we want to beat Donald Trump and achieve big progressive goals, socialism is not the answer." The audience interrupted his remarks with sustained boos that lasted for 30 seconds.

L.A. Plagued by Effects of Progressive Social Policies and Providing for Illegal Aliens — The New American

.... Commenting on Steve Lopez's reports of mountainous trash heaps overrun by rats in downtown Los Angeles, Bruce wrote, "This is the idiotic disaster brought to you by unrestrained liberal leadership as it creates problems, then births a bureaucracy that will never deal with it." Bruce cited a statement made to Fox News by Dr. Drew Pinsky, an addiction medicine specialist, who predicted that a deadly epidemic could emerge in Los Angeles during the summer months. And yet, noted Bruce, "most 2020 Democratic candidates for president want you to believe that President Trump is the problem, and the Democratic policies creating the dystopian nightmare in California should be exported throughout the nation. Yeah, no."

New Video Reveals Shots Fired In Las Vegas Shooting After Steven Paddock Was Dead — Intellihub

...In the video titled Las Vegas Shooting: If Paddock is Dead, Who is Firing These Machine Guns...?? the publisher points out how 9 different officer-worn body cameras from the night of the 1 October shooting reveal what sounds like a small caliber submachine gun, possibly an MP5, firing 5 consecutive back-to-back three round bursts. One after another. As the video points out, Paddock's Mandalay Bay hotel suite door was breached more than thirty minutes prior to the audible submachine gunfire which went out over the radio at 11:59 p.m. which means Paddock's lifeless body had already been lying on the floor for over a half of an hour at that point.

"We're Being Played": Tucker Carlson Features Leaked Syria Chemical Attack Memo — ZeroHedge

0 SHARES Twitter Facebook Reddit Email Print On Thursday night Fox's "Tucker Carlson Tonight" featured rare prime time coverage of the bombshell leaked OPCW report which refuted key events surrounding the April 2018 alleged chemical gas attack in Douma, Syria — which resulted in massive US and allied airstrikes on Damascus, nearly leading to a major war at the time. And now new allegations are looming which could once again lead to US airstrikes on Syria. The Organization for the Prohibition of Chemical Weapons (OPCW) is the international chemical weapons watchdog group which has worked in tandem with the UN to investigate claimed Sarin and chlorine gas attack sites in Syria. The smoking gun document, Tucker said in opening remarks, vindicates his and others' past skepticism. He said:

Time Magazine Columnist's Trump Quote Went Viral — Then He Admitted He Made It Up — The Daily Caller

Time Magazine columnist Ian Bremmer on Sunday tweeted a quote from President Donald Trump about North Korean dictator Kim Jong Un that quickly went viral — but it wasn't real. "President Trump in Tokyo: 'Kim Jong Un is smarter and would make a better President than Sleepy Joe Biden.'" Bremmer wrote on Twitter. While Trump did praise the North Korean dictator's insult of former Vice President Joe Biden, the president never said what Bremmer quoted him saying — because Bremmer made it up.

Indiana salmon hatchery to raise nation's first genetically modified animal cleared for human consumption — Chicago Tribune

On a winding road on the outskirts of a small Rust Belt town in eastern Indiana, a fish hatchery is poised to raise the country's first genetically engineered animal approved

for human consumption by the U.S. Food and Drug Administration. AquaBounty Technologies, a Massachusetts-based biotechnology company, altered the genetic makeup of the Atlantic salmon to include a gene from chinook salmon and DNA sequence from an eel-like species known as an ocean pout. The result is a salmon that grows to market size about twice as fast as its natural counterpart.

Two Reasons Why Socialism Repeatedly Fails — Jorge Besada/The Mises Institute

Socialism will always encounter two big problems when regimes attempt to implement it: 1) the impossibility of economic calculation without true market prices, and 2) the lack of an incentive to produce only what consumers actually want.

Your smartphone is not listening to you, but your 'free' apps are definitely spying on you — NBC Local

... If you have a smartphone, it's hard to hide. There is a privacy feature that lets you turn off certain apps that are tracking your location. But that doesn't keep them from seeing other information. "You get apps, and they're free, and there has to be a cost because the app developer has to make money," Special Agent Steven Foster with the GBI Cyber Unit said. The cost? Your privacy.

General Wesley Clark: Wars Were Planned - Seven Countries In Five Years — John Wesley Clark

... So I came back to see him a few weeks later, and by that time we were bombing in Afghanistan. I said, "Are we still going to war with Iraq?" And he said, "Oh, it's worse than that." He reached over on his desk. He picked up a piece of paper. And he said, "I just got this down from upstairs" — meaning the Secretary of Defense's office — "today." And he said, "This is a memo that describes how we're going to take out seven countries in five years, starting with Iraq, and then Syria, Lebanon, Libya, Somalia, Sudan and, finishing off, Iran." I said, "Is it classified?" He said, "Yes, sir." I said, "Well, don't show it to me." And I saw him a year or so ago, and I said, "You remember that?" He said, "Sir, I didn't show you that memo! I didn't show it to you!"

Rescuing Our Children: Alex Newman's Speaking Tour Roars From Coast to Coast (why to stop using public schools) — The New American

... Newman warns parents that if they hope to protect their children against intellectual dumbing down as well as the rampant cultural-moral-spiritual subversion, then sending them to public schools is no longer an option. "Right now," he says, "the government schools are systematically indoctrinating and dumbing down children, turning them against their parents, against their families, against their churches, against our country, against the founding fathers of our country, against our Constitution and our freedoms, and our Republic will not survive too far into the future if we allow this to continue." Newman, who is one of this country's premier investigative reporters, has been especially involved in exposing the United Nations and its global indoctrination arm UNESCO (United Nations Educational, Scientific and Cultural Organization).

Thanks in large part to his exposés in The New American of former UNESCO boss Irina Bokova, a corrupt official of the mass-murdering Bulgarian Communist Party, Bokova was prevented from being promoted to UN secretary-general. His exposure of UNESCO's corruption and subversion also helped set the dial for the Trump administration's decision to end U.S. membership in, and financial support for, UNESCO.

Undercover video reveals brutal treatment of Falun Gong prisoners inside Chinese labor camps — Fox 5 NY

A California family is taking their fight to the Chinese government after they say their loved one was tortured and killed inside of a Chinese labor camp nearly 20 years ago, simply for supporting the spiritual meditation practice known as Falun Gong. Now, never before seen undercover video given to FOX 11 is revealing what life is like for political prisoners inside of those Chinese labor camps. In 1999, the Chinese government ordered the eradication Falun Gong, calling it a “heretical” organization that threatened social stability. The communist government began arresting and imprisoning hundreds of thousands of Falun Gong practitioners, and shipped them to labor camps where they were to be “re-educated”.

Study Identifies Hundreds Of Coordinated 'Anti-Trump' Instagram Trolls — ZeroHedge

.... Well, a new study has been released this week by an independent research agency called Ghost Data, which claims to have ferreted out a net of interconnected profiles numbering roughly 350 that spout a circular ring of anti-Trump memes and vitriol, and appear to be acting with some degree of coordination. Of thousands of politically active Instagram accounts examined by the researchers, posting patterns and other indicators suggest that these accounts are mostly 'bots' - perhaps employed by forces allied with Beijing - programmed to smear the president.

Ron Paul Warns Violence Against Women Act Violates Constitution — Ron Paul/ZeroHedge

A common trick of big-government loving politicians is to give legislation names so appealing that it seems no reasonable person could oppose it. The truth is, the more unobjectionable the title, the more objectionable the content. Two well-known examples are the “PATRIOT Act” and the “Access to Affordable and Quality Care Act.” Another great example is the Violence Against Women Act. Passed in 1994, the Violence Against Women Act provides federal grants to, and imposes federal mandates on, state and local governments with the goal of increasing arrests, prosecutions, and convictions of those who commit domestic violence. Like most federal laws, the Violence Against Women Act is unconstitutional. The Constitution limits federal jurisdiction to three crimes: counterfeiting, treason, and piracy. All other crimes — including domestic violence — are strictly state and local matters.

Delaware County Church Vandalized With Abortion Rights Graffiti — CBS Local

As the abortion battle rages on across the United States, a church in Delaware County was targeted by vandals who tagged it with abortion rights graffiti and more Sunday. Heading into church for Sunday mass, parishioners at Notre Dame de Lourdes parish in Swarthmore were met with black spray paint that said, “You do not have the right to decide how others lives. #ProChoice”

Chinese-made drones are stealing data — CNN

Chinese-made drones may be sending sensitive flight data to their manufacturers in China, where it can be accessed by the government there, the US Department of Homeland Security warned in an alert issued Monday obtained by CNN. The drones are a “potential risk to an organization's information,” the alert from DHS's Cybersecurity and Infrastructure Security Agency states. The products “contain components that can compromise your data and share your information on a server accessed beyond the company itself.” The report does not name any specific manufacturers, but nearly 80% of the drones used in the US and Canada come from DJI, which is headquartered in Shenzhen, China, according to one industry analysis. US local law enforcement organizations and infrastructure operators have grown to rely on drones in recent years.

5G Danger: Hundreds Of Respected Scientists Sound The Alarm About Health Effects As 5G Networks Go U — End of the American Dream

.... 5G waves are “ultra high frequency” and “ultra high intensity”, but they are also easily absorbed by objects such as buildings and trees. So although cell towers will be much, much smaller, but they will also have to be much, much closer together than before. According to CBS News, it is estimated that the big cell phone companies will be putting up at least 300,000 of these small towers, and it has been projected that it will cost hundreds of billions of dollars to fully set up the 5G network nationwide.

Some US Cities Are Moving Into Real-Time Facial Surveillance — Wired.com

The report says agencies in Chicago and Detroit have bought real-time facial recognition systems. Chicago claims it has not used its system; Detroit says it is not using its system currently. But no federal or state law would prevent use of the technology. According to contracts obtained by the Georgetown researchers, the two cities purchased software from a South Carolina company, DataWorks Plus, that equips police with the ability to identify faces from surveillance footage in real time. A description on the company's website says the technology, called FaceWatch Plus, “provides continuous screening and monitoring of live video streams.” DataWorks confirmed the existence of the systems, but did not elaborate further

DNA tests reveal 30% of suspected fraudulent migrant families were unrelated — Washington Examiner

In a pilot program, approximately 30% of rapid DNA tests of immigrant adults who were suspected of arriving at the southern border with children who weren't theirs revealed the adults were not related to the children, an official

involved in the system's temporary rollout who asked to be anonymous in order to speak freely told the Washington Examiner Friday. "There's been some concern about, 'Are they stepfathers or adopted fathers?'" the official said. "Those were not the case. In these cases, they are misrepresented as family members." In some incidents where Immigration and Customs Enforcement told the adults they would have to take a cheek swab to verify a relationship with a minor, several admitted the child was not related and did not take the DNA test, which was designed by a U.S. company.

Homeland Security Releases 9K Illegal Aliens into U.S. in 8 Days; 1.1K Released Every Day — Breitbart

President Trump's Department of Homeland Security (DHS) has released about 9,000 border crossers and illegal aliens into the interior of the United States over the last eight days, federal data confirms. Catch and release totals obtained by Breitbart News confirm that between May 6 through May 13, roughly 9,000 border crossers and illegal aliens were released into a variety of American communities by DHS. This indicates that at least 1,100 border crossers and illegal aliens have been released into the country every day in the past week.

Putin hails new Russian laser weapons — AP

...Peresvet is a high-energy laser, whose specific data and purpose have remained secret. It's believed to be capable of blinding enemy electro-optical devices and downing drones. Putin told officials that some other new laser weapons under development "until just recently only figured in science fiction." He added that such weapons "will determine the combat potential of the Russian army and navy for decades ahead."

Americans Clueless About Border Invasion, Illegals Dumped Into the Heartland — The New American

One reason the illegal-alien invasion and colonization of the American southwest continues with no end in sight for either the besieged Border Patrol or the American taxpayers is that most Americans are unaware of the invasion's magnitude or threat to their health and safety.

Legal battle heats up as more states test strict abortion bans — Roll Call

Advocates are preparing for a legal battle after Alabama passed the strictest abortion bill in the country late Tuesday, part of a growing national push by abortion opponents to test whether the courts will curb constitutional protections for the procedure. [No, the procedure is not protected by the constitution.] Alabama's move, which would essentially ban abortion in most cases,

could open the door to restrictions in other states — even though they will all likely be challenged in court. Other states are already pursuing and defending laws to ban abortion after six weeks of pregnancy. [Watch for the supposedly conservative majority in the courts to overturn these laws.]

Big Tech Tyranny: Facebook Is at It Again, Trying to Sway an Election — The New American

... This said, not just GoogTwitFace's profits but also its passions dictate leftist action. For example, not wanting a repeat of the 2016 election — in which a "populist," Donald Trump, unexpectedly won — GoogTwitFace actively suppressed conservative entities prior to the 2018 midterms. The New American's experience reflects the result: Along with that of thousands of other conservative websites, our traffic dropped precipitously shortly before the midterms, partially as a result of Facebook manipulation. Interestingly, GoogTwitFace relented post-election and TNA's traffic recovered. Yet this damningly tells the tale. After all, if suppressing a bad actor (i.e., us, supposedly) and not election manipulation really was the goal, why the post-election reprieve? How did TNA go from valid to "dangerous and fake" to valid again over the course of months when it never changed its editorial policies?

China: Social Credit System Has 'Restored Morality' by Blacklisting over 13 Million People — Breitbart

China's state-run newspaper Global Times revealed in a column defending the nation's authoritarian "social credit system" Monday that the communist regime had blacklisted 13.49 million Chinese citizens for being "untrustworthy." The article did not specify what these individuals did to find themselves on the list, though the regime has revealed the system assigns a numerical score to every Chinese citizen based on how much the Communist Party approves of his or her behavior. Anything from jaywalking and walking a dog without a leash to criticizing the government on the internet to more serious, violent, and corrupt crimes can hurt a person's score. The consequences of a low credit score vary, but most commonly appear to be travel restrictions at the moment.

Survey: Only 2-in-15 Americans Aware of Soaring Illegal Immigration to U.S. — Breitbart

Less than two-in-15 American voters are aware of the soaring levels of illegal immigration across the United States-Mexico border, a new survey finds. The latest Harvard/Harris Poll reveals that when Americans are asked how many illegal aliens are arriving at the U.S.-Mexico border, only about 13 percent answer correctly. Meanwhile, about 76 percent of Americans believe illegal immigration levels are vastly lower than they actually are.

Whole Foods cuts workers' hours after Amazon introduces minimum wage – The Guardian

In response to public pressure and increasing scrutiny over the pay of its warehouse workers, Amazon enacted a \$15 minimum wage for all its employees on 1 November, including workers at grocery chain Whole Foods, which it purchased in 2017.

All Whole Foods employees paid less than \$15 an hour saw their wages increase to at least that, while all other team members received a \$1 an hour wage increase and team leaders received a \$2 an hour increase.

But since the wage increase, Whole Food employees have told the Guardian that they have experienced widespread cuts that have reduced schedule shifts across many stores, often negating wage gains for employees.

"My hours went from 30 to 20 a week," said one Whole Foods employee in Illinois.

Green New Deal Reveals the Naked Truth of Agenda 21 – The New American

"...Of course, such harsh terms had to be hidden from the American people if the plan was to be successfully imposed. They called it a "suggestion" for "voluntary" action — just in case a nation or community wanted to do something positive for mankind! However, while using such innocent-sounding language, the Agenda 21 shock troops lost no time pushing it into government policy. In 1992, just after its introduction at the Earth Summit, Nancy Pelosi introduced a resolution of support for the plan into Congress. It's interesting to note that she boldly called it a "comprehensive blueprint for the reorganization of human society." In 1993, new President, Bill Clinton ordered the establishment of the President's Council for Sustainable Development, with the express purpose of enforcing the Agenda 21 blueprint into nearly every agency of the federal government to assure it became the law of the land. Then the American Planning Association issued a newsletter in 1994, supporting Agenda 21's ideas as a "comprehensive blueprint" for local planning. So much for a voluntary idea!"

For over a decade, under multiple administrations, the U.S. government had a secret agreement with the ruthless Mexican Sinaloa drug cartel that allowed it to operate with impunity, an in-depth investigation by a leading Mexican newspaper confirmed this week. In exchange for information and assistance in quashing competing criminal syndicates, the Bush and Obama administrations let the Sinaloa cartel import tons of drugs into the United States while wiping out Sinaloa competitors and ensuring that its leaders would not be prosecuted for their long list of major crimes. Other

revelations also point strongly to massive but clandestine U.S. government involvement in drug trafficking.

A donor to the Clinton Foundation, Russian oligarch Viktor Vekselberg, led the Russian side of the effort, and several American donors to the Clinton charity got involved. Clinton’s State Department facilitated U.S. companies working with the Russian project, and she personally invited Medvedev to visit Silicon Valley. UN and N.Y. Times Target Anti-Vaxxers, Push to End Exemptions – The New American

...The media seized on the WHO's attack to launch phase two of the campaign. In an editorial headlined "How to Inoculate Against Anti-Vaxxers," the radical New York Times editorial board cited WHO's jihad on vaccine hesitancy as justification for its own effort to instigate official persecution of concerned parents. Among other strategies, the Times celebrated the elimination of religious, philosophical, and all other exemptions to mandatory vaccine statutes in the state of California, thereby forcing all parents to vaccinate their children in order to attend school. "Other states ought to follow this lead, and the federal government should consider tightening restrictions around how much leeway states can grant families that want to skip essential vaccines," the Times said. Setting aside the editorial board's ignorance or hatred of the U.S. Constitution — the feds have no constitutional power to impose "restrictions" or give "leeway" to state governments in their vaccine policies — the policies they are demanding are downright totalitarian. Following a measles outbreak in California in which many of the victims were already vaccinated, totalitarian state lawmakers funded by Big Pharma seized the opportunity to smash liberty. The chief stooge behind the push to eliminate the exemptions was State Senator Richard Pan, a far-left Democrat who was the top recipient of pharmaceutical industry cash. Of course, the same pharma companies buying lawmakers to mandate drugs also bought lawmakers to exempt themselves from liability when their vaccines kill and maim people.

For the operating year running from October 1, 2016 to September 30, 2017, Planned Parenthood performed a total of 332,757 abortions, an increase of 11,373 of the murder procedures it was responsible for in 2016 and the most abortions it has performed annually since 2012. The latest reporting means that during FY 2017 Planned Parenthood performed an average of 911 abortions each day.

Privacy at Risk: Security Expert Warns "Smart Device" Users to Beware – The New American

That expert, Charles Henderson, was quoted in two articles for the New York Times earlier this week. Henderson is the global head of X-Force Red, a professional hacking team at IBM Security. He told the Times that convenience is the major selling point of turning a home into a Smart Home powered by Internet of Things (IoT) devices. "Consumers don't just want this convenience, they expect it — they demand it." The result is that too often, common sense and security — especially where privacy is concerned — take a back seat to that convenience. Many people seem never to consider the risks involved. The New American has already written about some of these risks in previous articles. In a May 11 article, we noted the various security issues associated with reports that Amazon's "Alexa-powered" Echo will be an standard "appliance" in many new homes:

Is Big Tech Merging With Big Brother? Kinda Looks Like It – Wired

A friend of mine, who runs a large television production company in the car-mad city of Los Angeles, recently noticed that his intern, an aspiring filmmaker from the People's Republic of China, was walking to work. When he offered to arrange a swifter mode of transportation, she declined. When he asked why, she explained that she “needed the steps” on her Fitbit to sign in to her social media accounts. If she fell below the right number of steps, it would lower her health and fitness rating, which is part of her social rating, which is monitored by the government. A low social rating could prevent her from working or traveling abroad.

New York Times Editorial On Vaccines: A Pseudoscience Mess! – Dr. Brownstein

...Did vaccines lower the death rate for their respective illnesses? We don't know since the rates were already declining dramatically before the mass vaccination program began. To imply that vaccines were responsible for this dramatic decline in pediatric infectious deaths in the 20th Century is nothing more than FAKE NEWS! One of the best indicators of the health of a country is the infant mortality rate. Researchers correlated the number of vaccines given to infants and the mortality rate for ages five and under. Guess who gave the most vaccines and guess who had the highest infant mortality rate? If you guessed the US, you win.

Whistleblower: Obama-era Deep State Surveillance Program Spied on Trump, Judges, Others – The New American

...Klayman's claim is not new. In fact, it is not even really his claim. It comes from his client, former NSA and CIA contractor Dennis Montgomery, who “left the NSA and CIA with 47 hard drives and over 600 million pages of information, much of which is classified,” showing “the spy agencies were engaged for years in systematic illegal surveillance on prominent Americans, including the chief justice of the Supreme Court, other justices, 156 judges, prominent businessmen such as Donald Trump” and Larry Klayman himself, according to an op-ed piece written by Klayman in March 2017. The purpose of that illegal Deep State surveillance — Klayman surmises — is “for potential coercion, blackmail or other nefarious purposes.” Given the way the Deep State (and its Democrat political accomplices) have attacked, derided, smeared, and undermined Donald Trump since as soon as he became a viable candidate, it is easy to follow — and believe — Klayman's assertion

Facebook Refuses Ads for 'Roe v. Wade' Film – Breitbart Networks Trashed Trump With 90% Negative Spin in 2018 – NewsBusters

As it was last year, the Trump presidency was the biggest story of 2018, accounting for almost 87 hours of coverage, or 28% of all evening news airtime. But that's down from 99 hours of coverage in 2017, perhaps a sign the networks are wearying of treating every Trump tweet as deserving of crisis-level coverage. ? The tone of coverage remains incessantly hostile: 90% negative, vs. just 10% positive (excluding neutral statements), matching the historically bad press we documented in 2017. Yet despite the media's obvious disapproval, public opinion of the President actually improved slightly during 2018, from an average 40% approval on

January 1 to 42.7% approval on December 31, according to RealClearPolitics. ? For the second year in a row, the Russia investigation was the single most-covered topic amid the networks' Trump coverage, garnering 858 minutes of airtime. Since January 20, 2017, the Russia probe has received 2,092 minutes of coverage on just the three evening newscasts.

Things Democrats Have Funded that Cost More than the Border Wall – Grabien News

..In 2018, the feds spent \$4.173 trillion overall, meaning the border wall would amount to just 1/10th of 1 percent of current annual federal spending.) Indeed, these lawmakers have happily funded various projects over the years that cost far more than the border wall — and many of which had very questionable value. Below are some examples of wasteful federal spending projects that individually cost more than the proposed border wall (data courtesy of Citizens Against Government Waste): “Rural Utility Service.” This program costs taxpayers \$8.2 billion/year and has no actual purpose after its original intent — bringing electricity to rural communities — was long ago achieved. It's now being used to bring broadband access to small communities (usually with populations of less than 20,000). However there's no indication the “beneficiaries” of this expensive government agency actually appreciate the program, and the majority of its projects are not completed on time or within budget. Sugar Subsidies. America, as Democrats frequently intone, faces a health crisis. What they don't tell us is that it's largely of their own making, as Congress subsidizes the production of unhealthy foods like sugar and high-fructose corn syrup. Eliminating sugar subsidies alone would save \$6 billion, enough to fund the border wall; it would also have the added benefit of helping curb the nation's obesity epidemic.

Some people have deleted their Facebook accounts in protest of the company’s lapses, while others simply want to make sure they have the option to do so. Many Android phone users have begun to question Samsung’s deal to sell phones with a permanent version of Facebook — and some of them are complaining on social media.
