Summary of Libertarian VS Conservative by Joel Skousen: Emphasis on Enforcing Penalties for Negative Consequences of Free Actions

The following is shared with permission in September of 2021. It is a note from Joel Skousen in response to my inquiry about where he is libertarian and where conservative in his politics:

I'm a libertarian on almost all issues when carefully defined. My solutions are not, however, in line with the Libertarian party. For example, I anti-abortion under the libertarian principle that a person can walk away from the consequences of their free choices. People are free to have sex with anyone they want, but **neither the man or woman is free to walk away from the consequences of pregnancy**. When they create new, independent life at conception, they can't violate the fetuses' life. While I believe people are free to take drugs, or drink alcohol, they are **not free to walk away from consequences if under the influence they violate other's rights**. I would propose **enhanced penalties** for damage or death to others under the influence of alcohol or drugs sufficient to become a heavy deterrent. In my view people are free to engage in homosexual behavior but it would be a **violation of other's rights for government**, which has to represent everyone **to recognize their cohabitation as a marriage**. **Governments only role in defending marriage is to make sure children as a product of marriage are cared for by the parents**. It should not be against any law to do pornography, or be immoral, but **the marriage contract should be enforceable by civil suit against both the partner who violates their marriage covenant and the person they do it with**. Sending pornographer or **making it available to a minor would be a violation of the parental-child relationship and would be subject to civil action**. All these things take government out of the business of enforcing Biblical mandates, but makes all these sins **accountable under contract violations**.

Lastly, you make libertarian law enforceable on others by a citizenship compact. **Everyone has to qualify for citizenship when reaching 18 years of age**, ---not citizenship by birth to non citizens, and children live under the citizenship of their parents until 18 or they rebel against the parents and are stripped of parental protection. Those who don't want to abide by the citizen compact and be subject to these laws are expelled from the country. There

would also be a resident category for those who have yet to qualify for citizenship---they would still be required to obey all laws, and pay taxes but **wouldn't be able to own titled property until the qualified for citizenship**. They'd have to rent things.

I outline all this in my law and government section at Joelskousen.com

Best, Joel

Mr. President, We're Already Mostly Socialist! Joel Skousen, 2/8/19

An excerpt by Joel Skousen from the weekly briefing at WorldAffairsBrief.com, this was critiquing a State of the Union Address where Trump vowed that we would never become a socialist country:

"...Then came Trump's most dramatic proclamation during his talk:

"Here, in the United States, we are alarmed by new calls to adopt socialism in our country. America was founded on liberty and independence -- not government coercion, domination and control. We are BORN FREE, and we will STAY FREE. Tonight, we renew our resolve that America will NEVER be a socialist country."

But we already are, mostly. Does Trump even know how to recognize what socialism is? I doubt it. We have a fully developed welfare system that is consuming ever larger portions of the national budget, and yet he calls for more entitlements like guaranteed insurance for prior existing conditions. That's part of socialism.

We have redistribution of wealth, illegal federal mandates into wages, safety, medicine and economic controls. Sure, we don't have state ownership of industry, but modern globalists follow the Fabian Socialist model to the T: "You own it but the government controls it."

Here are some acerbic **descriptions of US Socialism by Dr. Thomas Sowell**:

On Socialist Welfare System: “The welfare state is the oldest con game in the world. First, you take people’s money away quietly and then give some of it back (to others) flamboyantly.

“No society ever thrived because it had a large and growing class of parasites living off those who produce.” “Our tax system penalizes those who are producing wealth in order to subsidize those who are only consuming it.”

On taxing the wealthy: “I have never understood why it is “greed” to want to keep the money you have earned, but not greed to want to take somebody else’s money (through government taxation)”.

Notes on Joel Skousen’s Annual Overview Briefing:
2021

The lecture went in much greater detail than I share here. Often these are recorded and made available, I'll update this article later with a link to the full presentation if it comes out. Some of it went way over my head, apologies in advance for a few fragmented ideas in my notes.

Sections:

3 major worldwide conspiracies all accept as fact

Covid

Church

Freedoms lost from Covid

Conscience

WW3

Preparation

Other notes on Globalist Conspiracy

3 major worldwide conspiracies all accept as fact:

1. phony fall of soviet union. It just went underground. Gave orders to student unions to go forward with protests. Told police to stay home and not arrest the students. News said KGB was fleeing, but who from? It doesn't make sense. US

2. phony war on terror is 2nd. Deep state hired the terrorists. Wasn't the named ones. Many named still alive. And the few named couldn't have loaded the bomb. 19 hijackers is false conspiracy to cover for the US gov. It took weeks of preparation. Both towers were sealed off, all lights out, that's when they (US gov) set up all the explosives then.
3. COVID pandemic is 3rd, and is the worst.

COVID

1. Never deadly except to immunodepressed overweight people. CDC says less than 10% of those attributed to covid death were just due to covid.
2. PCR test was never used to track viral infection before. Can inflate it however want. The labs just get RNA doping and follow instructions.
3. "Asymptomatic carriers"
4. Developed in a lab and enhanced, but not that dangerous.
5. When viruses mutate they get less dangerous.
6. Can't test without full genome sequence, hardly any can do that, if they say its Omicron it's a lie.
7. Case numbers are based on testing not symptoms.
8. Almost all omicron cases are from people who were vaccinated (vax causes it?). Minor symptoms only.
9. Covid conspiracy is unique: requires not just believing them, but participating. 80% of Americans are participating, didn't even question it.
10. The only hope is the courts striking down Biden mandate. But they'll never give up.
11. Stay out of hospitals and public schools and universities, all will buy into vax mandate
12. Vax is the real bio weapon. Spike proteins damaging neurons, heart, many systems. 75 documented symptoms of the spike protein damage, hard to trace.

13. 18k have died from vax around the world
14. Good people are buying into this, making it very difficult to combat
15. Plan to get out of the establishment, they are relentless, giving in to their wishes won't stop
16. You can't trust anything our gov says or does anymore, that's the bottom line

Church

1. This instruction to be vaccinated isn't a revelation from the Lord, it's the brethren speaking of wise leaders who aren't wise
2. It isn't fair when people say you aren't following counsel from church on this

Freedoms lost from Covid

1. Pray to thank god for the few remaining freedoms that we have. This gets the message to people without preaching to them.
2. So many businesses no more open to non-vax people
3. Internet searches produce mainstream articles for the first 12 or more pages

Conscience

1. Following the frequent whisperings of conscience is the real test of this life, little promptings on what to eat, buy, exercise, etc.
2. you are penalized when ignore little temporal promptings
3. just knowing the constitution and truth isn't going to save you; only listening to conscience will
4. If something is underpriced, give them more than they are asking. Don't haggle people down on price as we have a

tendency to do here in Utah. Conscience tells to not be too cheap with people, and to foster good relations (treat them as you would be)

WW3

1. you won't see WW3 coming, we will be distracted and busy dodging covid tyranny etc.
2. WW3 will begin with a swift nuclear strike
3. PDD60 the policy is to absorb a first strike as a good gesture we aren't a threat, its suicide. They say we can retaliate afterwards, but with what? (We will be dead/disarmed).
4. The war will be preceded by an EMP strike. Only Russian and China have the capacity, you need super EMP and minor. Fries everything connected to the internet.
5. Fuel will be gone in 3 days. Most even in Utah only have a 3 month supply. If you share supply, once there's full famine you'll all be starving in a week. (parable of 10 virgins, can't share?)
6. West desert Utah where missiles are stored will be hit, same with Hill AF base. Utah county will get it. You need some kind of fallout shelter. Wind from elsewhere will bring it to your home so be ready regardless of your location.
7. Fallout protection is 3x cheaper than blast protection
8. There'll be famine for at least a year as the US doesn't stockpile any of the transformers (which'll be wiped by the EMP).
9. You need ability to produce your own electricity.
10. China will probably attack Taiwan. (Russia/Ukraine and North/South Korea and Israel/Iran are the other hot spots)
11. Women: don't register for the draft, don't go in, don't do anything, get ready to hide if a war starts. Don't ever let your women into military, rape is epidemic in military in submarines ships etc.

Prepare

1. Exercise not just to lose weight, enough to be tough enough to flee to the New Jerusalem, the only place where people won't be at war with each other (D&C 45). You won't drive there in a vehicle.
2. Secure Home book covers solar generators, shelters, etc.
3. The high security shelter book on how to do shelter in an existing basement for 10-15k. New is 2 or 3 times that.
4. Utah is a pretty safe state, probably don't need to relocate from there. But he does have a book on relocation.
5. Keep up to date on events weeklyworldaffairsbrief.com

A few other notes on Globalist Conspiracy, etc.:

Communists were put in by globalists, not communists.

Biden isn't puppet of Chinese, he is puppet of the globalists. Communists aren't controlling Biden. Globalists use communism to break the social border to come in in the chaos.

Eisenhower was responsible for killing 20,000 German prisoners of war. Speaks of his globalist acts. Forced Europeans to be repatriated to Russia.

Cleon's Naked Communist catalogs the betrayals.

Read Dagger in the Heart by Madio Lasso.

Real story of Cuban Missile Crisis and the aftermath. US gave up all our missiles in Turkey aimed at Russia to get a few small Russian missiles in Cuba, which we weren't allow to inspect to see if they were actually taken out.

Book Nicaragua Betrayed by Samosa.

Documented blatant pro communism betrayal. But again these were usually globalists trying to break social order in Nicaragua via communism.

Mainstream Republican doesn't fight conspiracy or for constitutional rights.

The Endowment for Democracy said you can have any government so long as it isn't the same as the US.

Central/south American governments are socialist.

KSL is the worst propaganda for the left in Utah. Hinckley brought in credentialed people (meaning on the left) and it was taken over.

Coordinated attack on Trump every hour, even on local.

The media doesn't cover the surviving supposed 9-11 hijackers so they don't need to kill them. They won't show the footage of who got on the flight it wouldn't show the same hijackers. There are some faked footage.

There's radar that the planes swapped places with remote control planes with missiles under wing, it was all very sophisticated, couldn't have been by terrorists.

Notes on Joel Skousen's Annual Overview Briefing: 2020

This
Skousen
2020

political,

first half
the phony
election

lecture from Joel
summarizing
answers lots of
questions,
moral, and
otherwise. The
is mainly about
virus and
fraud, but he

gives the big picture of the globalist conspiracy. In the last parts he goes into how we need to take better care of our health to qualify for word of wisdom blessings, how we can better listen to conscience, homeschooling, and other important things. My notes are shared with his permission.

These are my notes and do not represent the complete message presented. For the full lecture, see <https://www.youtube.com/watch?v=g7uorqpUJBY&list=PLMFvYACK6oX2wnX3G6KOW6WX0qoL32fgh&index=67>

The Soviet Union never fell it went underground there were orders to stand down and let the rioting take place

Chinese leader said we're not going to make the same mistakes as the Nazis when we crush the Americans we're going to be ruthless kill as many as we can with biological weapons

There's the American conspiracy of Russian conspiracy and Chinese conspiracy all of these are inspired by Satan and all of them are promised that they're going to win

The Chinese are the most ruthless in their conspiracy but the American globalists are the most sophisticated in theirs

the American conspiracy is going to tell you that you're free when you're locked up just like the virus mandates they say that it's for your health and safety but it has nothing to do with that it's to take control

9/11 was an American globalist conspiracy from preloading the buildings with explosives to training false pilots in Sesna airplanes. Their plans were switched out to more sophisticated pilots. And why was everything covered up? If it was an independent terror attack they wouldn't have covered it up they covered it up because it was a government operation

The CDC has admitted they do not they have not isolated the virus so how do you create a test for a virus you have not isolated.

there was a big PR meeting with all the heads of the vaccine companies saying it was 94% effective they don't know that and the CEO of one of these is in his 30s how did he get there.

If it's 95% effective why do we need several doses it's because there were so many adverse side effects that to avoid rebellion of the public they cut the dose

by half then by fourth etc.

at 50% strength 80% had adverse side effects and at 100% strength 100% had adverse side effects

the drug companies get tons of money from the government because they're making it for doses instead of one

before the election the globalists said Trump would think he is winning but the Democrats would come from behind and win and that's exactly what happened they knew that because they made it happen

Every time Obama spoke it was on Prime Time all of the programs were canceled same for George W bush but never for Trump.

this speech Trump gave of detailing election fraud was only aired on Facebook and most media outlets didn't even mention that he gave the speech they didn't want people going and looking it up for themselves

Millions of illegal aliens and dead people were registered to vote

Trump's legal team run by Rudy Giuliani his deep state he did much cover up of 9/11. A new building 7 was coming down but he did not warn the firefighters the retired firefighters of New York hate him because they know he knew.

Back when Romney was running for president six Democratic newspapers came out supporting John McCain for Republican president because they didn't want Romney. This was back before Romney became bad. He's not completely globalist but he is trying to impress the establishment. Be compromised on homosexuality medical Care socialism welfare etc to be a governor.

Trump correctly blamed Obama Bush etc for being easy on North Korea but then he went and did it himself and now he's responsible for them having their intercontinental weapons.

Trump rejected TPP but let all that same stuff into the USMC

Trump's instincts are good he wants to make America great again but he didn't have any of the tools to do it and he was easily won over by flattery

Trump went into the White House knowing zero conservatives so he had to go fill 4,000 jobs in the west wing of the White House without knowing anyone

Christopher Ray the replacement of James Comey is also deep State because he was involved in the 9/11 cover-up. Call me was betraying Trump on the Russia investigation and was fired but this new guy is not good either.

Brett Kavanaugh is deep State he covered up the Vince Foster murder he was in charge of intimidating the witnesses to change their story.

John Roberts is deep State whenever there's a crucial case he always votes the wrong way he gets that phone call in the night you have to pull another favor for me John. he gets in because he portrays himself as a conservative but they have dirt on all the justices. Except Barrett but she is mainstream she's never voted against any big corporation and she goes with the government every time.

to drain the swamp you would have to get the NSA to spy on people to catch them plotting against the government

Millions of votes for Trump specifically in the swing states were removed and in addition hundreds of thousands were flipped. The data showed the tally went up for Biden directly proportional to how the tally went down for Trump. This was seen in the Edison data.

Boats coming in through the postal Service get shuffled but yet we see in the data lump after lump for Biden indicating they were directly inserting this rather than things getting shuffled. This happened in four states.

Fox news announced Virginia for Biden even before the bumps for Biden in that state Trump was ahead and Fox news called it for Biden and only later were major inserts of that ballots for Biden inserted.

In Georgia we have surveillance footage of an organizer telling the ballot counters were done for the day go home they leave and 2 minutes later the organizer lady and three of her minions pull out massive suitcases from under a covered table frantically and start processing all the ballots in them. The time stamp from these indicates all or mostly Biden.

The media talking point is that there is no evidence of vote fraud.

In Utah the worst propaganda is KSL
it's top secret at KSL who's actually writing the stories you try to look it up they only tell you the talking heads.
Those writing the scripts are hardcore leftists.

in Democratic states where they didn't need as much vote fraud they didn't use it this made it harder to trace

Sean Hannity is a conspiracy denier

Tucker Carlson won't talk about the conspiracy or he'll get fired

O'Reilly fired for sexual allegations was a avid conspiracy denier

Rush Limbaugh used to talk about conspiracy before he got the big million dollar contract. the radio station was bought out and the next day his listeners who were used to him talking about conspiracy suddenly heard him denying conspiracy and yelling at anyone who brought it up.

the deep State lets you think that the Democratic party is the Boogeyman but never lets you know that the deep state is in charge of both political parties at the higher levels

Details how the real evidence didn't get into the court cases

General Michael Flynn is a great guy but too optimistic about Trump winning there's no chance the federal case on election fraud will win because none of the evidence was even brought to the minor courts

The Kate Dally radio station is excellent.

Gary Herbert is a mainstream hack afraid to say anything against the mainstream even though his son Nathan informs him he chooses to reject all of that.

we can't declare martial law and arrest a bunch of people because we don't have the names of who initiated all this voter fraud

The military flat out ignored Trump's orders to withdraw troops from Afghanistan. when he wanted to pull troops out of Syria they lied to him and told him there were none or there weren't very many.

Nothing Q has said has ever come to pass and he is always cryptic but real conservatives are not cryptic they're straightforward and honest. He claims to talk to the NSA etc. monthly but anyone who would do that and release information would be caught. when this stuff is allowed to continue it means it's disinformation too good to be true.

The national war college system which picks the top generals is a very globalist

system they don't let you become a general when you're not a globalist. You don't even get past Colonel if you become known as someone who doesn't approve of this stuff so no there's not going to be a military coup against the globalists and against Biden.

The coronavirus scandals are more of a threat than election fraud because even if Trump wins he's not going to do much he didn't do much in his first four years every time his intelligence told him about Syria and Iran he fell for it and he unjustifiably attacked Syria three times.

General Soleimani was not the greatest terrorist he was in charge of fighting us backed terrorism. United States created ISIS. The United States took United States funded terrorists in Syria and told about 50% of them your name is now ISIS go create trouble. Deep state in Germany France etc were in charge of the Paris attack etc.

We won the war in Iraq by buying off the opposition pallet loads of \$100 bills and we refused to leave Iraq so they hate us. we bought off the drug lords and since the US has been in charge the drug problem has increased tenfold.

In Mosul the United States surrounded ISIS but left the path for them to escape and they have footage of this and us helicopters coming in rescuing ISIS leaders and taking them away.

us hired 50 semi trucks to go into Raqqa and save the families of Isis and their heavy weapons, they took them back to Syria and reintegrated them with the Syrian

Israelis were buying isis oil the Russians sent in fighter jets and bombed the tankers of the fuel and said to America this is what you should be doing if you really want to fight isis but the media never told us about this . Later after that the US did bomb and oil convoy but sent out leaflets warning them all that the bomb was coming so they all got out of the way that's the last time that the US did that bombing of the isis oil supply.

Trump wanted to stop birthright citizenship there's no reason to have that policy it just encourages more illegal aliens but Trump got pushed back from Paul Ryan and others so he backed off. Trump has good instincts but he doesn't have the legal arguments to back those up.

Kamala Harris is a radical leftist who slept her way to power.

Democrats want Puerto Rico and DC as new States so they get four more

Democratic senators a permanent majority in the Senate that we cannot overcome.

The corona emergency orders are flatly unconstitutional and there's been no court case challenging that. Fundamental rights enumerated in the Constitution are being nullified from the words of a governor.

Though some have challenged aspects of the emergency powers no one has challenged the fact that the emergency Powers themselves are unconstitutional This is because in Lost world they teach case law and lawyers are terrified against going up years and years of case law.

in a raw democracy the legislature has power to legislate away your fundamental rights but not so in a constitutional republic

On one occasion the governor's emergency order was ruled unconstitutional so he just tweaked it a little bit and released another emergency order and it has not yet come to trial they're taking their time getting to those trials

the Constitution is dead because they can violate any right they want and the courts support it

They've stopped us from going to church from protests from speaking freely therefore the Constitution is gone.

The Highland City Hall wouldn't tolerate these meetings anymore so now it's a different location this briefing by Joel Skousen today

the masks will never go away

No one's doing autopsies to see why people are having completely different reactions to the virus

Some students at Johns Hopkins published a paper showing the death rate in 2018-2019 and 2020 were all basically the same within a few thousand

Where are all these supposed Corona deaths coming from for one there's zero flu deaths and less heart attack deaths last diabetes deaths pure pneumonia etc it's all being labeled as COVID

An interviewer on KSL representing IHC said they aren't getting more money because of the virus cases when in reality they get \$11,000 for virus case and around \$30,000 when they put someone on a virus on a ventilator. He said

they're actually losing money well obviously they are losing money because they're shutting down all the other procedures that they could be doing stupidly.

If 2 million have died from COVID we should have 2 million excess deaths this year than other years in addition to all the other causes

The PCR test original designer said you should never use it to diagnose because it amplifies if something matches the primer RNA but the primer RNA is not covid-19 it's a generic mix of all coronaviruses. So when you test positive you usually just had a cold or something and 90% of positive cases have no symptoms and those who do have symptoms are usually mild.

the fearmonger by saying the hospitals are at 80% capacity but they were at 80% capacity in 2019 and 18 as well they're always at 80 at flu season

most of you think you are healthy you are walking healthy but you don't know if you're healthy until you run a long distance and see if your body complains.

The word of wisdom says you will be able to walk and not be weary and run and not faint but how can you have those two blessings if you never run and never walk.

In the 1980s is when autism and other autoimmune disorders really skyrocketed and what else came out in the 1980s it was this extended list of all the vaccines they wanted babies and hospitals and children's at schools to have. The vaccines create these autoimmune diseases your body tries to fight off the germs heavy metals and animal parts in them among other things. they are specially dangerous to babies and young people who don't have the developed immune system to combat these toxins. It should be criminal to give vaccines to babies. SIDS sudden infant death syndrome they get a vaccine in the next day they're dead in their crib. Doctors are trained to deny vaccines had anything to do with it.

ON CONSCIENCE, HOMESCHOOL, DISCIPLINE, AND FINAL THOUGHTS OF FUTURE LIFE WITH VACCINE ETC. TYRANNY:

The main ads on television are cars and drugs for the drugs they have to list all the side effects in the commercial cost them millions of dollars for that time but they do it to get immunity and in the ad they have all these smiling faces and say ask your doctor if it's right for you they know people will buy it.

The hypocrisy is that if a vitamin or herb shows one tiny side effect the FDA will ban it.

vaccine immunity is not as strong as natural immunity and it does not last as long.

Joel skousen is 74 years old and never gets the cold or flu. if he ever does start to feel a little bit of sniffles he takes a couple thousand milligrams of vitamin C and it's gone within an hour. this is what happens when you have a good immune system you eat healthy you exercise regularly you eat organic foods. You should do strong cardiovascular exercise two or three times a week.

Bill Gates prophesied that the next pandemic that's coming is going to be much worse than this one. They're producing it in a lab as we speak just like they produce this one in a lab.

The plagues prophesied of in the Bible and doctrine and covenants are not God made plagues it's God knowing that man will make biological weapon plagues which will get worse and worse.

the conscience gives little promptings all day long to discipline your children not take an extra portion go out and exercise not spend extra money. To get up to go help your wife.

When you ignore your conscience you're telling Christ to get lost. at the final judgment before you and Grace Christ and tell him how much you love him he's going to ask you to tell him why you told him to get lost 150,000 times.

One of the most pernicious doctrines in all of religion is unconditional love. we don't need more comfort in our religious speeches we need more get up and go listen to conscience listen to the promptings.

90% of all promptings you get are about temporal affairs it is through these that you learn to school your self control. It's through your temporal affairs that you prove to the Lord that you want to listen to what he wants to tell you.

Show the Lord that you will listen when he prompts your conscience so that when bureaucrats are coming to take away your children you can get that prompting ahead of time.

it's so difficult to listen to conscience because it comes in your own grammar it sounds like you talking to yourself.

Conscience is the receptor between the two the shoulder Angel and the shoulder devil it tells you which signals are from the angel which signals are from the Devil and signs will never prove conscience but you all know it is there

There are three voices in your head and they all sound like you there's the devil voice the angel voice and your voice and it's not easy to discern between them but you must and the way to tell is peace

The warning of conscience can be a fleeting second in and out.

Conscience tells you to pick up trash on the ground it tells you to put your tool back where it goes it tells you to do homework instead of play

Want to start to listen to promptings you won't believe how many more promptings you will get

the Lord really is interested in your perfection don't say someday

all of the covenants involve complete submissiveness to the Lord the blessing is protection of the heart.

The law just gets you in the ballpark it's just the beginning that's why Paul says the law means nothing to me I don't disregard the law but there's so much more than that

over time you will feel that things you used to approve of are not quite right not quite up to the standard of the Lord

it's not a temple recommended that shows if you are in good graces with the Lord It's whether or not you respond to promptings he gives you

listen to the little temporal signals and then you will get the large spiritual things

The vaccine will become the new way in which you are denied access to society

The government won't even have to mandate it the airports will the companies will Amazon will your boss will etc. It'll slowly squeeze you out of society.

The online public School did not work because there was no discipline kids weren't paying attention they were playing.

Universities are now requiring it as well.

He said that means for my kids no more University time to learn to be entrepreneurs and beat the system the sooner the better.

The low temperature is a key indicator of hypothyroid but the doctors won't accept this hypothyroid you need real thyroid.

The difference between homeschooled and public schools if you go to shake their hand the homeschooled will look you in the eye but the public school will not the public schools compartmentalize into these grades where they say you're inferior in these lower grades and oh I can't talk to you you're 15 months older than me. In homeschool they deal with adults all day and this is great.

You need to conscience-based discipline not a rule-based because there's no way you can think of enough rules. He hardly had to do any discipline for his children in their teenage years.

discipline them according to how they were feeling how they were warned how they were prompted. When they throw a ball in the living room it breaks a lamp tell them now didn't you have a bad feeling about that before you did it that's why you're getting disciplined is because you disregarded that bad feeling. ask them what they think they should be doing and what they feel comfortable about.

his kids would learn a foreign language and they would send them to that country for a while and they would love it they could trust them at that country because they'd taught them to listen to their conscience.

In England leaders of the brexit movement had their bank accounts closed for 3 months be prepared for that

You could be identified as someone who believes in conspiracy etc someone who questions the vaccine etc and they can close your bank account

Boycott Facebook don't use Google for searches

You can't find anything on a Google search about vaccine damage

DuckDuckGo has started to censor too

Resist the mask wherever possible when you go into a Walmart don't wear a mask if they ask you if you want to mask say no thank you I'm healthy I'm not a threat to anyone if they make you put one on do so and after you walk away from them take it off show them that you're resisting this try to find stores that don't enforce it Costco is the worst. If they say it's the governor's requirement tell them that mandate is illegal because the legislature refused to extend it

you need to have generators and solar because there's going to be no electricity for 6 months when the EMP strike happens with the war with China and Russia that will likely come in the later half of this decade when they're ready with all their weapons etc

the LDS community doesn't have food storage; less than 2% have a year and less than 10% have any significant amount of food

you have to learn how to leave The Establishment little by little

eventually you're not going to be able to fly internationally and probably eventually locally you won't be able to fly either if you're young enough to get a pilot's license get a pilot's license so you can bypass that

they might say you need the vaccine to drive at some point, so at that point he's probably just going to break the law and hope he doesn't get caught and be prepared to go to court about this stuff

he has a little family farm it's good living and it's not rocket science but it takes experience; crops fail animals die

Don't get into sharing your food storage you may as well not prepare at all because in a few weeks you'll have nothing people need to have the consequence of disregarding counsel of not preparing

he keeps some extra rice to share with some people but there's limits

Having barter items will be very important someday when they cut off cash we are already heading for digital and it's easy for them to shut you off digitally when you're not compliant

See his book 10 packs for survival and others.

You'll need a concealment room somewhere because in world war III those who believe in conspiracy and corruption of government will be the Jews of world war III

So be prepared to hide yourself and others for when they come with the mark of the beast card, vaccine mandates, etc.

Notes on Joel Skousen's Annual Overview Briefing: 2017

I suggest you watch the lecture and the Q&A session at the end.

Watch this lecture by using this URL:

<https://www.youtube.com/watch?v=SI7D0Evfi64>

At the video URL, you will find a full transcript of the lecture.

- Las Vegas shooting exposed, multi-shooters, various loopholes in what we've been told. Shows power of the deep state, a powerful cover-up, more so than some of the greatest. Witnesses dying from recent car accidents. Why didn't they cover the other venues attacked on the same day?
- How they could use N Korea as an excuse for WW3.
- Trump as devastating new world order, but instable and not to be relied upon. Specifics pointed out.
- Trump has made the media show their true colors; media used to play neutral, but they're now not even hiding their blatant anti-Trump.
- Government funding Syrian rebels, then took 50,000 and told them you are Isis. This large of an organization couldn't happen with a grassroots word of mouth situation.
- 9/11 started as an excuse to intervene in your personal life.
- JFK files released have been purged since they knew long ago that they would eventually be released.
- MLK Jr. collusions with communists and involvement in pornography in government locked files.
- Infowars.com has good info and good sources but the conclusions which they derive from that are often hyped up and wrong.
- must follow main stream news to see what the secret combination media and politicians are pushing to the people.; many are professional disinformation artists to make conservatives look bad by pushing false conservative materials; adhere to your conscience about what is disinformation
- Trump has good instincts but is often talked out of things. He hasn't a conservative background to help him counter the sophisticated excuses people give him.

-Globalists are upset that Israel hasn't attacked Iran yet, Syria needed by handled first, so the US attacked Syria 4 years ago to get things going under demise of chemical weapons being used by them. Propaganda made the chemical attack seem real, several large loop holes like wrong type of bullets they used in evidence pictures.

-a top level NSA analyst says when the CIA says "we have high levels of certainty" on an issue, they have no clue on it. When they do have evidence, they say "this is how it is" now "we have high certainty". The Russia involvement with Trump is all false.

-thousands of people work in area 51, not 1 in the last 30 years has talked about what has gone on there; so it is possible for a large conspiracy to be operating; people get killed and their family and grandchildren get killed if they talk; they've covered up the 9/11 conspiracy this way too.

-if someone like Skousen was in the white house advising Trump he would be dead in 3 days. The people who knew things about the Vegas shooting keep dying in car crashes into trees off the side of the road.

-Trumpcare is 99% Obamacare.

-China has said twice now that if we preemptively attack North Korea they (China) will attack us. Trump's threats to North Korea is something China and Russia aren't ready for WW3 yet, so China is trying to get N Korea to stop intimidating the US. N Korea is a trigger event for WW3 based on the way the globalists have been treating them, i.e. by allowing them to have nuclear weapons. China and Russia still need to build their new military equipment to get ready for WW3 so they're trying to hold off the N Korea war. They plan full production in this in 2020-2024. They won't take on the US until they have this top of the line equipment in place.

-PDD60 Presidential Decision Directive 60 tells US missiles not to rely on launch on warning, but to absorb a nuclear attack then retaliate rather than stopping a first strike. Trump doesn't even know about this. This is of course bad. Launch on warning is where we launch once they have launched so their missiles hit empty silos, and our (2nd fired) missiles hit actual targets, so the second person to launch wins in this scenario.

-China wants to take out the world power which is the US, so they'll strike our military, not civilian targets in their first strike.

-the elite and CIA higher ups & FBI have big deep underground safe rooms in them since they know something is coming. They aren't warning you though.

-Nov 1997 Arms Control Today magazine speaks of PDD60 which stops launch on warning, so we must absorb a first nuclear strike. It clearly says the military is not supposed to rely on launch on warning. The change is from winning a nuclear war to surviving one then retaliating.

-Russia and China have ability to do an EMP and they will do a nuke after that.

-the conservative are the permanent minority; the public schools lead people to the left; even BYU has taught socialism for 40 years; 30% of BYU students

voted for Hillary Clinton in the last election; 40 years ago it would have only been about 3%; so many people are being preached liberalism, anti-conspiracy, anti-constitution

-the thing that keeps conservatives and Christians in the big cities is jobs. Those jobs are gone in wartime; so prepare a retreat or some relationship with someone in a rural area you can go to in this time. You'll always have excuses about why to not prepare but the economy won't get better just worse; they're fudging the numbers. The time to prepare is now while things are available. Most living in Utah don't need the strategic relocation guide book but those in big cities do.

-like the Jews in WW2, those who believe in conspiracy will be the targeted persons in WW3; like the Jews, prepare safe places.

-do solar, have generators, store fuel, grow gardens

-ham radios are cheap and easy to get the license, he recommends everyone do that

-ANTIFA are really most of them communists at their core; like how Hitler was on the left but they don't want to own him so they put him on the right.

-stay away from bitcoin and crypto currency, its total speculation. Don't try to make money through outright speculation. It will collapse someday, guaranteed.

-see ldsconservative.com for more of these videos

-even on fox news they all know you can't touch conspiracy or you're out.

-Hitler was deep into the occult; Satan sacrificed Hitler to put up Russia, and now Russia is being sacrificed to put up China.

-Endorse Hans Anderson; he isn't into the development utopia demoralizing craze; everyone wants jobs and growth but growth has a real penalty

-the visions of glory book is from the devil, it is too much information, not even prophets today get that, there's lots of true there but there's always bad; the near death experience books too have a theme of going to heaven and no accountability, just Jesus saying everything is ok, and this is another doctrine of the devil; in these days it seems God has given much scripture and is now seeing how we will follow our conscience; if you have a dream or vision keep it to yourself since you don't know if it's true yet. Not every dream is from god.

-some say I'm getting wealthy it's a blessing from God for my faith, well actually it's a test.

-henry Kissinger had Richard Nixon on antidepressants so he could run the presidency behind his back

-Trumps cabinet are not loyal to him, and are globalists.

-Pence is sincere but folds quickly under pressure.

-N Korea has provoked war sufficiently to justify our attacking them; he said he is going to destroy us, so let's declare war and get him.

-Satan in the preexistence was playing upon the fact that everyone knew life was going to be hard. The 1/3 fell because they thought they had already messed up to make it in life. Evil was allowed to come to earth, like Cain master mayhem a son of perdition before he was born, and Hitler and other every evil men, they

didn't have to accept the Savior to come to earth, they just had to accept the consequences of what would happen if they would come to earth then serve Satan. In public schools we rub shoulders with some very bad people and it surely does affect our children; if you want to save the world, stop sending your kids to public school. It does affect them even if you do family home evening.

- Spirits are predisposed; they look to earth and say 'ah I want to do that when I go to earth!' this innateness is what makes it hard for people to change.
- at the Second Coming of Christ, Skousen thinks the entire world will be under the control of Satan, and the Second Coming happens to save when nothing else can; Cleon Skousen thought North and South America would be a Zion, but Joel says only the New Jerusalem will not have war; that there will only be small pockets of liberty.
- if says if you're faithful you shall not fear; that refers to not fearing for their salvation, but the torture and so forth will cause fear; the scripture also says that the 144,000 will cry day and night to God for deliverance in these days.
- those in the public schools who like it don't see what's going on with the morals and lack of discipline. Public schools aren't our schools, they are the governments' schools. You cannot undo the social contamination which occurs in public schools.
- Skousen homeschooled his children, they matured sexually later than most people since their minds were not contaminated with who is sleeping with who and all that from school;
- Skousen didn't let his kids just go play; there must be a purpose, that is the way real life is; the neighbors would come say 'can you go play?' 'play what?' there must be a purpose, like building some things in the garage, etc.
- Skousen believes in disciplining his kids, not the disrespect which public school tolerates.
- Skousen homeschooled all of his children, and they turned out great, they were able to talk to adults before being sexualized; they were able to go to college at age 14, and become engineers etc. They started dating at an older age because they weren't hypersexualized by public school, but when they did start dating they were mature, and they were using their young years to do productive things.
- a multicultural agenda to destroy us is bring in immigrants who don't integrate and they go into ghettos. Certain cultures don't mesh with western culture, Islamic culture in the way they treat women etc. is a culture that doesn't mesh with our culture.
- in our declaration we say "indivisible" but being indivisible is a bad thing, you must have a way out if things get bad, or else you are like the Soviet Union.

Notes on Joel Skousen's Annual Overview Briefing:

2016

For the video of this presentation, [click here](#) or use this URL:

<https://www.youtube.com/watch?v=4IQk-ifNcXU>

-Obama said illegals who vote won't be prosecuted; this calling for violation of law was an impeachable offence.

-When FBI director Comey exonerated Hillary Clinton saying that she was guilty but wasn't going to be prosecuted, this helped her lose the election more than anything, everyone saw this and said "so it IS rigged!"

-high ranks in military you start to see problems and the answer is "top secret can't tell you"; this is ideal ground for conspiracy to breed.

-Denver Colorado has a city underground the Denver airport; hundreds of black helicopters,

-if someone calls you and says they are an insider, well they wouldn't tell you things because the phones are tapped, and people who say they have sources on the inside, they become people who are fed disinformation.

-book Dagger in the Heart; about CIA setting up Castro etc.

-globalists used communism to destroy the western world, then come in and save them so they could be the ones in power.

-Isis was born overnight and 50k strong because it was a name change, and the US is behind their setup. Further the US keeps letting Isis fighters escape in battles.

-penniless refugees get to Syria to fight for Isis by CIA funding

-JFK guards were ordered to not ride the bumper of the car JFK was in when assassinated, riding the bumper is standard procedure to protect the president. These guards were never required to testify who told them to do that because it was US high officials. Also coverup about where the kill shot was from one direction not another, see lecture for more on this and its importance. The autopsy doctors changed the autopsy too. They aren't necessarily part of the conspiracy, they're just told you and your family die if you don't do this.

-Skousen trusts Ron Paul implicitly.

- J Reuben Clark said once you lose your liberty you never get it back without bloodshed

-the main reason for illegal immigration is to make sure the right never wins an election again; they get welfare and all vote for the left since the welfare comes from the left.

-the LDS is the only religious group which has scripture which warns them of secret combinations; though most of them are too interested about approval to

admit the conspiracy.

-for illegal aliens, give them 6 months to pack up and leave with their belongings and families, then after the 6 months, anyone caught gets deported immediately and all they have taken.

-fight to win, prepare to loose.

-insurance is what makes costs go up; it's a socialist program because it's to get us prices for medical things to go up, then you say "ah we MUST have insurance!" so we think it's a right and government must provide it; a 1300\$ MRI has you do a co-pay of 300\$. we say "ok i can handle 300". The insurance pays the rest. No one is resisting the full price because of insurance! The reason the MRI doesn't cost 300 is because of the insurance! We get to where we feel we need insurance then the government does it since it's a need etc.

-doctors don't know anything about internal medicine really; you must take your health into your own hands; eat right, exercise, etc.

-we live in a very complex society, that is why he writes the weekly World Affairs Brief, so we can see what's going on from the conspiratorial point of view.

-all over DC, Denver, west desert of Utah, huge bunkers are being built. The globalists know China and Russia will attack, they'll say they didn't know; they'll call for a global police force

-Russia and China always have the idea of attacking the west, but not destroying the west, just attacking and hurting so they can be in charge

-there are 30 million illegals here in the US

-they didn't want Romney in because he is a good person, and if he sees evil, he will send troops rather than assassinate people who know about it. However Romney is still trying to please the establishment and would put in globalists as his people.

-Russia and China are building massive weapons at this time, and they won't use them for peace. They want the US the bully as they say to go down. Just don't go around telling people a certain date that things are going down.

-many know the truth and are knowledgeable, but God is not putting us in the front to make change because the US doesn't deserve to be saved, we are already immoral beyond the point that we deserve to be saved.

-hundreds of times a day we are tested by promptings, no junk food, clean the yard, do the things that makes us better; when we ignore the promptings, we lose. Mormons are often the most obese people; those who exercise but also smoke and drink outside of the church look at the fat Mormons and say, 'word of wisdom? hypocrites!' Pop with or without caffeine, it doesn't matter, it's all junk food not to be had!

-economies never collapse without war; Argentina 2010 banking crashed but the people stored their own money and the economy survived; Soviet Union didn't really collapse that was a fake collapse.

-the social security system robs us because of the inflation; they control the

inflation too

-when the economy is about to collapse, the powers that be start a war and blame it on the war so they don't look bad.

-cash is king at the beginning of war, they won't be printing more

-when war is coming, cash out

-silver dollar is a heavy and recognized thing

-a major attack by North Korea, watch out you have about a week if that

-China controls North Korea; they keep a stupid leader in place there so that if a war happens they can blame it on the stupid NK leader

-the millennials voted in mass against Trump because of socialism taught in public schools; cutting remarks, badgering, bullying, other attitudes from public school can't be avoided so pull them out of public school.

-teach kids to go to sleep on time, etc., a little military drills, they need some hard learning not enabling

-teach kids to not violate nervous feelings; conscience they must learn to follow; if they do something bad ask them 'didn't you feel nervous about doing that?' and discipline them for not listening to conscience. if they say they are bored, ask them 'don't you have a feeling about something you could/should be doing?' teach them to not violate their conscience. then they can resist peer pressure better even if they go to public schools

-people say of homeschooling, 'do you want them to miss out on the social things?' Yes, we do! That's the very thing we are trying to avoid! Skousen's 6 homeschooled kids all did find in marriage, finding a spouse etc. They become successful people, not overly saturated in the sexualization which schools push formally and socially. His home-schooled kids developed later than others in the dating scene etc. but that worked in their favor. They didn't lack social skills, they just weren't obsessed with dating in their early youth!

-hypnosis is something where Satan takes partial control of the brain "release, release" well it's not right to release control of your mind!

-Alex Jones is sincere but is hyped up and without emotional and verbal control; he does have a good judgement of character usually.

Joel Skousen on Hypnotism, Children, Discipline, Mass Shootings, Why Nuclear Shelters, Food Storage, North Korea, Gathering During War, Globalists – 2016

<https://youtu.be/jOH4cNqIS0k>

The following notes of the lecture will not convince the reader of the points covered nor does it preview all topics covered. It will encourage the reader to see the entire presentation where reasons for these things are given. These notes I wrote for myself to remember some takeaway messages, but they don't come close to showing the reasoning behind these like the lecture brilliantly does.

-MASS SHOOTINGS: no human being would gun down children without being drugged or hypnotized. Skousen says he doesn't know of any mass shooting which doesn't have the fingerprints of being a government inside job. In the lecture, Skousen gives much evidence for these claims, in addition to similar claims about bombings and other terror attacks including 9/11. These help the gun control narrative advance.

-HYPNOTISM: this requires giving up the will; never do that; this allows the hypnotist and Satan to plant ideas in your head, and to leaving you thinking you had experiences which you thought you had which you didn't; records and video of US operations (named in the presentation) show the extent they can and do use this for

-DISCIPLINE, CHILDREN, SCHOOLS: there needs to be justice and guilt not just love and acceptance; we don't discipline our children; Christ does the full range of personality from mercy to fury and knows how to use it; anyone who listens to conscience knows you get more chastisement than praise. public schools you can't be thrown out for behavior because it's a right to be there. European schools are better because they are quiet, and a disruptive student can be permanently removed from the school; that's the main issue with public school, the attitudes and lack of discipline is toxic. False lessons we can fix when they come home, but the attitudes learned there stick to the children very powerfully.

-WHY NUKE SHELTER: 50% of Hiroshima who weren't even prepared survived, but were very sick; then many died later of terrible cancers; so you need a fallout shelter for the nuclear war. All of the retired CIA higher ups etc.

are building underground bunkers in remote locations because they know what's coming and you don't. Types of missiles and military strategies in US policy are disguised. Russia US agreements disguised including the 50% display US forces to not appear a threat policy which leaves us sitting ducks. Likely the US government will seek to imprison those who claim the US is responsible for the nuclear fallout out; you need to have set up like the Jews, places to hide people in your home.

-FOOD STORAGE: less than 10% of the active LDS have a 6-month food storage, even less have a year supply. Also have a place to grow food away from the city so neighbors don't steal it before it gets ripe.

-EMP: an EMP would take down the grid for 6-12 months. An effective one couldn't be a lone ranger event.

-NORTH KOREA: no sanctions, no military option on the table, no regime change required for North Korea; we give them a pass, unlike Iran. So they're keeping North Korea there, a living prison the worst place, keeping it there so that an attack on North Korea would be retaliated by them with a major war.

-GATHERING DURING WAR: in the war police won't come to work and there won't be jobs so there won't be a reason to stay in the cities; so people will flee cities. The prophecies say it will be safe among the Mormons, not because they are totally prepared, but because they will knit together faster than other groups and they have an alternate form of government, home teachers per every 5 families, hierarchy, etc. Then with these groups gathering together, we won't be a minority anymore, there will actually be sizable groups of people who are good.

-GLOBALISM: Obama is a-religious and doesn't believe any religion; Russia and China are promoting their own versions of the New World Order; a war is needed to push us into global government. Both political parties have for a long time had US Presidents puppeted by the globalists. Same with the Supreme Court, they aren't really 50% conservative, but have betrayed the conservatives last minute when getting notes from their leaders etc. in many cases, some presented in Skousen's lecture. Launch on warning explained. Presidential order 60 explained. Seems Russia not ready for a world war at this time, but would be in the early to mid-2020 2025-time frame. Reasons for this in the lecture. We don't know what type of weapons Russia has since they have a "mining area" underground city we've never explored. Russia and China do plan to nuclear strike the US.

Joel Skousen & Steven Jones on 9/11 & Conspiracy

Joel Skousen:

- local government in the USA is not so corrupt, but the higher is.
- he suggests Jack Monnett's book
- it's hard for good people to believe in systematic evil
- in the Soviet Union, communism never fell, it just went underground. This is a government coverup.
- people in Utah often have wistful thinking from all of their training on positivity
- Mormons have the Book of Mormon, and hence the greatest heritage in understanding secret combinations, but most of them choose to be blind to it.
- the government doesn't tax us for the war because they don't want us to feel the impact; they will endure war to get us into the new world order.
- the public news omits certain things, that is how they lie to you
- there is never a time in history where there has not been conspiracy; go study history and see
- assassins were not lone rousé based, but were covered up conspiracies.
- the biggest reason that people reject conspiracy is because they still want to have status in the world, to be popular, their views to be popular, to have the acknowledgement of the world in your professional life so they don't blackball you. Hence some of the most educated people will never be wise nor equipt to fight these battles. Blessed are the working class who don't care too much about their social status to get them not involved. It's on our shoulders to carry this work on.
- many have lost many of their children because they have sent their children to public schools rationalizing that.
- when we are overweight that can get in our way of survival as well
- listen to your consciousness that is the most crucial thing
- national security is the boon of secret combinations, they say trust us or you're fired
- they love to hire Mormons on the white side of the CIA, they are naive and trusting in their leadership.
- communists believe in killing the free market
- socialists believe in using the free market to feed the needs of socialism
- Orin Hatch was sold out to pleasing the Bush Admin. he was promised

Supreme Court and running for President; that's how they deal with people who aren't necessarily evil.

- the lesson people learned from Katrina was to not get in a FEMA, it turns into a prison camp;
- in the new world order they will impose upon us gay rights and international taxes; they know American's won't go for this, that is why they are going to have us get into war;
- the war with Iraq etc. they are using to get those areas of the world to hate the USA
- in the east, they don't hate the USA lifestyle like the script writers of Pres. Bush had him say, they are mad at the USA for getting in their way of their adapting the USA culture.
- the BYU political science experience is very liberal and socialist; it's because the professors there want to "make it in the world"
- USA will stupidly get involved with the new world order as the USA tricks us into thinking that we need to help the WW3 effort thereby. Then they will have us take an oath of allegiance to the new world order. (*another one of his lectures, he relates this to potentially being the mark of the beast spoken of in the Book of Revelation). You'll be tagged. Your neighbors will be asked to turn you in.
- at 2:32 he suggests books to read

Steven Jones:

- the Church now encourages us to have a 3-month rotating food storage
- Pres. Packer said that not all the persecution will come from outside of the Church, and to not be among those who persecute, and Packer read the secret combination warning scripture from the Book of Mormon, and Packer said the youth will see much trouble in their lives, but much inspiration. This was at a BYU devotional.
- Jones teaches the science behind how 9/11 was not just from planes crashing into the buildings.
- there are over 440 architects and engineers on the project showing how it was explosives
- stj911.org is a site which has their research on Scholars for Truth and Justice about 9/11.
- NIST refuses to release the videos they have about building 7. They investigated certain floors of it only, and the other floors are where the reported inner explosions were.
- the towers had government rooms and a terrorist couldn't just walk in there to plant bombs it was well guarded.
- the collapse is too rapid unless there are explosives moving materials out of the way.

- the NIST ignores the speed of collapse in their thousands of pages long report
- the year prior some 60 planes went to check out planes out of course; no planes were sent to see what was up with the planes coming towards the towers.
- one plane went off course about 50 min before crashing to pentagon; there was time for us to intersect but we did not.
- they knew of the plane coming to the pentagon 50 miles out yet none were warned to evacuate
- the government is hiding the videos of the pentagon getting hit
- sulfur in the beams of the building which weakens them
- thermite involved
- iron and aluminum
- iron rich spheres in the dust; these were 10-15 blocks away, so didn't come from cleanup.
- 3000 degrees Fahrenheit couldn't have happened by office supplies being burned; but thermite reactions give those high temperatures; the gov won't explain this
- they invested in the destruction in the stocks just before it happened; United and American Airlines.
- 9/11 commission report includes this on footnote in pg.499 on how there were allegations of insider trading, it says unusual trading occurring, but says that it wasn't tied to Alcaide. But the problem is that it was conspiracy from within the USA government like the Book of Mormon teaches in the book of Helaman.
- Pres. Hinckley said the Book of Mormon is as current as the morning news when it comes to politics
- Pres. McKay said that we should study constitutional principles and wake a sleeping nation
- Joseph Smith said we should waste and wear out our lives in bringing all the hidden things in of darkness to light.
- The Church manual which just came out now encourages us to always have at least 3 months of food storage which we rotate through and use daily in addition to having a 1 year food storage.
- North American Union: look them up

Joel Skousen on Inflation War Globalists Conspiracy & Food Storage

Nov. 2012

- half of computer hackers work for the government. They break down our computers, so we keep needing to buy new ones
- there are many false conspiracies, Joel helps sort them out and has an article on his site on how to sort them out

- the “right wing” news isn’t true right wing; they always push pro-war, and never have anyone debate against them with much of a different opinion than they have.
- Obama was a Marxist, but is now bought out by the globalists.
- to get on the dark side of the FBI and the CIA you have to violate all kinds of morality; you have to cheat your wife and all kinds of immoral behaviors like that.
- many former CIA agents are in prison for they wanted to blow the whistle on the dark side of the CIA.
- people in the CIA think they know there is no dark side, but they aren’t aware of how things operate on levels.
- they have a special ring they wear which designates that they are on the dark side of government (*they only wear it at certain times for what it seems)
- there will be a special medal in heaven for those who saw conspiracy when no one else believed it. They will all know “he is one who saw! And over there was one who did not see when it was right before them!”
- emails about Drake and Doug Hegman are not real conspiracies
- anyone who is former army and keeps getting feeds from his buddies is a scam, for the government is on every phone call ever make at least since 1983
- the collapse of the dollar will not happen; they don’t like to disturb too many people too much of the time or we will find out that they are maneuvering this
- they don’t intend to pay off the national debt; it can’t be done
- it should be illegal to make a contract that you cannot pay for
- for hyperinflation you need much money from the government and a way for the gov to put money into your pocket so you can pay the high prices; most people can’t pay high prices so this won’t happen; it causes stagflation.
- Satan tells people to help him overthrow God then he will void them of punishment; read in Isaiah, it tells how people are waiting in hell for deliverance, then they see Satan come down in chains and ask, “art thou become like one of us?”
- at BYU the political science school is corrupt
- one of the biggest things you can do to train your conscience is the temporal promptings, from there come ninety percent of the promptings
- at BYU now they want no more Hugh Nibley or Cleon Skousen or Truman Madsen, but they want yes men, predictable people is what some higher ups said.
- there is hands off policy with North Korea dispute all they do to us
- launch on warning is the best but Clinton stopped it. This is good because the ones who launch second in a nuclear war are the ones who win
- we have a pact with the Russians showing them that we can be taken over
- don’t send your children into the military for supposed patriotism, it’s a setup
- the globalist wars are to provoke hate against the USA.

- going to war more is falling into their hands; it's right where the globalists want us
- the best people in the world are who feel something is wrong with the government
- Mormon missionaries now have to leave Russia because the USA has provoked the anger of the Russians.
- in the next war they'll say it's the great patriotic war, don't believe it. They'll have you swear allegiance to the USA, to the new world government, and swear to how it wasn't the USA who bombed the world towers. Don't follow this, but they will hate us who think there are problems with the USA government.
- Mitt Romney is too feisty, wanting war, this gets us in the hands of the globalists.
- there will be an EMP where we lose our electricity
- we will be fat and rich and stupid right up to the day of the economic collapse.
- gold and silver save you from inflation; plan on selling it before the crisis comes
- get his weekly current events for 48\$ per year via his website
- baking soda softens the hard-old beans you stored
- get a ton or 2 tons of wheat; it's cheap
- get tons of the basics not the expensive freeze dried; it's better than nothing
- JFK set out to stop the black CIA group, and they the USA government killed him.
- Romney won't believe in conspiracy, this is so he can win President. But if he gets in then tries to dethrone the evil he will find, he will be assassinated like JFK when he tried to do that.
- he doesn't believe we will ever win back our liberty as a nation; Moroni said if you let the conspirators get power it won't turn out good, and they have. The USA is unrighteous, and is unworthy of being saved in general; but he always saves a remnant.
- if you become a chronic violator of conscience, you can't expect any protection.
- God lead the Mormons to the west for it's safer there than the east USA.
- the issue with the west USA is the Mormons who hate the Mormons who believe in the constitution and conspiracy
- he has a book on strategic relocation
- those of you who want liberty, you must learn how to re-establish the government
- share these things with people who have a sense that something is wrong, they are who will appreciate these things
- since the 1980's globalists have been trying to get the Russians to strike the USA, but our secret weapons scare them away.
- The USA will give their weapons to others who will use those to nuke the world

- there are no one but 'yes men' at the top ranks of the military
- there are no Chinese troops in China; they have enough thugs in the USA if they want to control America.
- Glen Beck when he started to talk about a new world order and at that point was kicked off of Fox News.
- Glen Beck is sincere but wrong in many things, like not believing that 911 was from the USA government, and refusing to believe conspiracy theory; he makes 40 million a month and such would jeopardize such.
- retirement savings with the government that we have the government will likely turn that into government retirement, so just get gold and store it
- Obama is a homosexual, various witness
- Obama is an illegal immigrant, didn't go to his class, was on international passport while in college
- they can control electronic vote machines; they can fudge 4-5%
- the numbers on who is in the lead are also fudged
- reporters are trained on neutrality, and hence are vulnerable
- Martial Law kills the economy and hence will not happen until the 3rd World War comes
- he thinks WW3 will not come until at least year 2020
- best defense against getting rounded up is to have a place to disappear; watch for when Joel Skousen disappears, then you know it's begun
- the government says the don't tread on me people are the future enemy of the USA
- it's false to think that all would repent if they knew the gospel
- Alex Jones is a flawed person, it makes it hard to believe in conspiracy when you listen to him.
- don't try to reform public schools, they are of the government, when you try to fix things the lawyers come in and say don't do that here are the laws
- get out of public schools asap; there are poisonous peer attitudes, forced vaccinations, and bad psychology pushed upon them.
- conspiracy theorists can't run for public office; if you're not known as such, then perhaps you can get into office and try to fix emigration law or something
- not even at BYU law school do they like constitutional lawyers.
- Ron Paul hasn't been sold out
- there will be gun control in the USA, Romney bought into the saying that we don't need assault rifles. Don't ever turn in your assault rifles. Have cheap guns to turn into the government when they ask for them.
- shielded wiring protects a home from an EMP, called tre wiring
- a basement and 3000\$ you can have a fallout shelter; the cheapest way is shown in his book
- have a strong bedroom door so who breaks in makes noise trying to get to you at night

-conceal your food storage so when the government comes to take it you cannot have it taken, leave for them the things in your pantry.

Joel Skousen on Bush, Obama, Romney, Russia

2013

- Obama is a-moral he has no morals; the globalists converted him to be a globalist instead of a Marxist by offering to not let the public know about his a-moral life.
- Obama isn't a Christian, he isn't a Muslim, he is an atheist. He cares nothing about religion or God. He is a puppet.
- Bush was a skull and crossbones man, and claimed to be a Christian. Skull and crossbones group is a Satanic group.
- the issue with us as Christians is that we are not skeptical enough of wolves in sheep's clothing.
- read the Naked Communist by Cleon Skousen and the Naked Capitalist by Cleon Skousen
- no one but Satan himself could've orchestrated the WW1 and WW2 and the power to the individuals it went to
- Vietnam war was a legitimate war against communism
- our wars today are for globalist purposes; they give the "support our troops" stickers out now to support such, but notice such was not given in the Vietnam war.
- The Chinese have a 30-mile underground bunker network in preparation for a nuclear war.
- The USA is now internationally hated not for its people but for its government.
- the USA in USA is seen as the savior of the world but elsewhere it's seen as the bully of the world because of these current wars
- the USA won the war with Iraq by buying them out not through millenarianism.
- Romney won by 8 million votes in the 2012 election, 8 million votes were buried we know since they said that many less people voted in 2012 than in 2008 when John McCain was running, and we know there was much more excited for Romney than McCain.
- USA has made themselves vulnerable the Russian to assure Russia that we can be their friends
- read the Naked Communist and the Naked Economist by Cleon Skousen
